This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: The Economics of Aging

Volume Author/Editor: David A. Wise, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-90295-1

Volume URL: http://www.nber.org/books/wise89-1

Conference Date: March 19-22, 1987

Publication Date: 1989

Chapter Title: List of Contributors, Indexes

Chapter Author: David A. Wise

Chapter URL: http://www.nber.org/chapters/c11589

Chapter pages in book: (p. 405 - 418)

Subject Index

Actuarial studies, S.S.A., 243
Age: ADL limitations and, 274; changing distribution of, in U.S., 119, 127; crude mobility vs., 57t; days hospitalized and, 270; expected retirement, 358; extreme, 50; housing consumption and, 101; income distribution and, 129; living arrangements and, 120, 125, 127, 132t, 133t, 141; mobility effects and, 2–3, 9, 17–31, 56–58, 73, 82t, 112; retirement, years of service, and, 323–28; role reversal and, 134t; vulnerability status and, 153, 154t, 156t; wealth holdings and, 197, 280, 284–87; West German population and, 94, 96

AHS. See Annual Housing Survey
Alternative living arrangements. See Extended families; Living arrangements
American Cancer Society, 234
American Housing Survey. See Annual Housing Survey
Annual Housing Survey (AHS), HUD (1973), 3, 13, 49, 84; limitations of, 121, 148; variables used in, 95–96
Annuities, defined, 220. See also Pensions; Social Security
Assets. See Financial status; Wealth; specific type

Baby boom, 228, 243
Bellman equation, 372

Bequeathable wealth, 11; defined, 220; housing sales and, 51; marginal utility of, 219, 221, 223, 228; marital status and, 179, 187, 190–92, 197, 212–13t, 215; Medicaid rules and, 261; moving choices and, 32–37; reserve mortgages and, 53; savings and, 362–63
Bernoulli model, moving choices and, 66–68, 88
Binary logit estimates, moving choices and, 108–12
Blackwell’s theorem, 371, 373
British National Health Service, 232
Bureau of Labor Statistics (BLS), poverty definition of, 178, 204–8
Capital gains, 53, 56, 59
Careerism, women and, 228
Cash flow income. See Liquidity
Children, 119; contact with parents, 4, 151–75; differential mortality and, 187–88; as source of care, 7, 183; support from, 194. See also Bequeathable wealth; Extended families
Chronic disease, 257–59. See also Disabled elderly; Long-term health care
Cigarette smoking. See Smoking
Community Development Block Grants, 53
Construction Reports, U.S. Bureau of the Census, 59
Consumer Price Index, 183
Consumption: earnings and, 362;
economic model of, 201-29; forecasts
of, 223; housing equity and, 9-10, 40-
41; labor supply and, 393; NLLS path
of, 204-8, 220-21; retirement and,
363; theory of, 2; utility-based model
of, 202-3. See also Life-cycle theory
of consumption
Continuous time hazard model, 21
Current Population Survey: March 1986,
224-26; Social Security Exact Match
sample (1973), 251

Dementia. See Disabled elderly
Demographic shocks: consumption
decisions and, 4, 81, 82t; lag structure
of, 83; living arrangements and, 119-
49; mobility and, 69-71, 72t; morbidity
and, 257-59. See also Marital
transition
Department of Housing and Urban
Development (HUD), 49-50
Disabled elderly: benefits for, 360, 365;
functional status of, 257, 264-74;
health service utilization by, 269;
hospitalization of, 271-74; savings
and, 366; SSA rules and, 381. See also
Long-term health care
Discouraged worker effect, 382
Discrete control process, 375-76
Dissaving, 56
Divorce, 224. See also Single elderly
Dynamic programming model of
retirement, 359-94

Earnings. See Wage earnings
Economic status. See Financial status;
Wealth
Education: death rates and, 251;
retirement predictions and, 336
Elderly households, defined, 84
Employment. See Labor force
participation
Equity, housing, 2, 31, 179; bequeathable
wealth and, 32-37; changes in, 35-36t;
consumption and, 9-10, 40-41;
disabled care and, 273; estimating of,
52-53; family attributes and, 33; home
equity loans, 48; income and, 75, 76t;
market value and, 32; movers vs.
stayers, 32-37; moving decisions and,
2-3, 9, 47, 51, 72, 76t; wealth ratios,
15, 16t, 17t. See also Home equity
loans
Extended families, 4; demographic
composition of, 155t; elderly-children
contacts in, 162-68t; 170-71t;
estranged, 161; geographic location of
child in, 156-57t; nucleus of, 122;
widows and, 226-27. See also Living
arrangements
Families: change in size of, 18, 20t;
defined, 122; parent vs. child income
in, 173-75t; support from, 2-4, 119,
148. See also Extended families;
Households
See West Germany–U.S. Housing
Survey
Females: careerism of, 228; divorcees,
224; as head of household, 134t, 139,
141-42t. See also Single elderly;
Widows
Financial status, 1, 5-6; of the elderly,
177; indexing and, 202; long-term care
and, 264; 1983 survey of, 10; of
widows, 5-6. See also Income; Wealth
Fixed point algorithm, 360, 375-76, 384-
85, 391, 393
Food consumption, elderly retirement
and, 357
F.R.G. See West Germany–U.S. Housing
Survey
Funeral expenses, 188
Germany. See West Germany–U.S.
Housing Survey
Hazard rate, 18-31, 88
Health care: economics of, 6-7, 255;
family support and, 2-4, 119, 148;
home, 7, 255, 259, 273; housing equity
and, 18; as income, 183. See also
Health status: Long-term health care
Health status, 1; age indicator for, 121;
AHS and, 148; effects of, 83;
functional measures of, 257, 264-74;
labor force and, 367; lifetime earnings
and, 188; moving decision and, 28;
multi-nuclei households and, 132t, 133;
retirement and, 365; saving rate and,
193; smoking and, 231-53; subjective
indicators of, 194t. See also Disabled elderly; Vulnerable elderly

Hebrew Rehabilitation Center for the Aged (HRCA) Elderly Survey, 4; age and vulnerability status, 154t, 155, 157t; parent-child contact data, 158-69, 170-71t; parent vs. child income, 172-75t; purpose of, 151. See also Extended families

Hebrew Rehabilitation Center for the Aged-NBER (HRC-NBER) Child Survey, 151; contact of elderly with children, 158-69, 170-71; description of, 152-53; preliminary findings, 169. See also Extended families

Home equity loans, 18. See also Reverse annuity mortgages

Homeowners: disabled, 267; F.R.G.-U.S. differences in, 98, 99t, 116; overconsumption by, 99-103, 104t; probit estimates of interval hazards for, 23-27t; subletting by, 117; tenure change of, 9, 46n.2, 47n.14, 49-50, 59; tenure choice of, 73t; two-generation family of, 133, 134t; user costs of, 31-32, 38, 45t. See also Housing; Moving decision

Hospitalization, tobit estimation of, 271-72. See also Institutionalized elderly; Vulnerable elderly

Households, 178; consumption forecasts of, 209; elderly, 122, 184; endogeneity of, 147; four types of, 122; F.R.G.-U.S. data on, 96-108; nonrelated members of, 127; saving rates of, 221; two-generation, 3-4, 125-32, 145. See also Extended families; Living arrangements; specific surveys

Housing: cross-country differences in, 94; deferred property taxes on, 54; demand-location relationship and, 118; demographic variables and, 4; downsizing decision and, 1, 13, 65-84, 90, 100, 114n.7; of excess size, 59t; F.R.G.-U.S. comparisons of, 93-115; HUD survey of, 49-50; inappropriate, 55, 58, 75t; index of, 139; investment motives and, 87-89; living arrangements and, 119-49; multinomial logit choice model and, 135-44; overconsumption of, 93-94, 96, 99-103, 104t; price data on, 83, 89; price-income gap and, 130; ratchet effect and, 93; real price change of, (1969-79), 51; shared, 3-4; substandard, 48; tenure choice and, 61, 71, 73t; unaffordable, 58; unit costs of, 71, 74t; user costs of, 38-40, 58, 86, 147-48. See also Equity; Homeowners; Renters; Reverse annuity mortgages

Housing and Urban Development Department (HUD), 49-50

Illness, long-term care and, 255-75. See also Vulnerable elderly

Impairment indices, 257, 264-74, 366

Income, 130; age and, 135; consumption forecasts and, 201-29; cross-national differences of, 98, 99t, 113n.1; defined, 46n.4; of disabled, 267-68; distribution hypothesis, 135; earning estimates, 237; economies of scale and, 183; equity and, 75, 76t; head of household status and, 129-30, 147; housing consumption and, 93-94, 100t, 101-2; housing equity and, 2-3, 15, 16t, 28; housing user cost and, 60; life-cycle consumption and, 205; living arrangements and, 121, 128-29t, 140-44; by marital status, 180, 184t, 187t; measures of, 179; mobility and, 112; parent vs. child, 173-75t; parent-child contact and, 172t; parent-child transfers, 168-69; permanent, 84-85; PSID, 11, 56, 84, 89, 94; real gains in, 177; regional variation in, 129; renters vs. owners, 15t; siblings, 152-53

Independent elderly, 124-25, 139. See also Homeowners

Inflation, housing and, 87-89

Infratest (1985), 95

Inheritance. See Bequeathable wealth

Institute for Social Research, 95

Institutionalized elderly: asset depletion and, 275; children and, 160t, 161, 164t, 167t, 170-71t; community-based alternatives to, 262-64, 294; intermediate care and, 148; parent vs. child's income and, 175. See also Long-term health care; Vulnerable elderly

Interest, mortgage, 18, 148, 362
Intergenerational transfers. See
Bequeathable wealth
Intermediate care facilities, 148

Labor force participation, 1; future
poverty and, 202; health status and,
367; informal caregivers and, 261;
market re-entry rates, 368; older
males in, 364–65; part-time, 367–68,
379; pension effects and, 279–333;
retirement behavior model and, 364–
65, 367, 399; Social Security and, 4–5,
364; transitions in, 372; of widows,
225, 227–28. See also Retirement
Labor supply models, 367, 393
Logit analysis, 135–44, 381–82
Longitudinal Retirement History Survey.
See Retirement History Survey
Long-term health care, 6–7, 255–75;
Channeling demonstration, 275;
community-based interventions and,
262–63; definitions of, 262; financing
Marital status: bequeathable wealth and,
191; poverty status and, 182, 186; support from children and, 195. See also Widows
Marital transition: median total wealth
and, 187; percentage poor and, 184;
Social Security vs. other wealth and,
193; subjective health indicators and,
194. See also Single elderly; Widows
Markovian analysis, 360, 371–72
Medicare/Medicaid programs: benefit
predictions and, 383; eligibility rules
of, 18, 53, 259, 261; as income, 180–
81, 183; long-term care and, 259–61;
medigap policies and, 260; NTLCS
study (1982) of, 165; out-of-pocket
costs of, 255, 259; poverty rates and,
199; PPS and, 255–56; smoking and,
233; stability of, 201; value of, 179,

The Economics of Aging

Edited by
DAVID A. WISE

The Economics of Aging presents results from an ongoing National Bureau of Economic Research project. Contributors consider the housing mobility and living arrangements of the elderly, their labor force participation and retirement, the economics of their health care, and their financial status. The goal of the research is to further our understanding both of the factors that determine the well-being of the elderly and of the consequences that follow from an increasingly older population with longer individual life spans. Each paper is accompanied by critical commentary.

Jonathan Feinstein and Daniel McFadden find that wealthier households are less likely to move than poorer households and that changes in family composition or retirement status increase the likelihood of moving. After studying the housing wealth of high- and low-income families, Steven F. Venti and David A. Wise conclude that reverse mortgage annuities are likely to increase the income of the poor elderly. Konrad Stahl, comparing housing mobility patterns of the elderly in the United States and West Germany, finds that moving is associated with substantial increases in the ratio of housing costs to income in both countries. Axel Börsch-Supan studies the economic and demographic determinants of the decision to live independently.

Laurence J. Kotlikoff and John Morris present the findings of a new survey of extended families in Massachusetts that suggest that a significant minority of the elderly in need of assistance either have no children or receive little care from their children. Laurence J. Kotlikoff and David A. Wise describe the pension plan of a typical large firm, which provides strong incentives to retire at age

Pensions in the U.S. Economy  
*Edited by Zvi Bodie, John B. Shoven, and David A. Wise*

*Pensions in the U.S. Economy* is the fourth in a series on pensions from the National Bureau of Economic Research. For both economists and policymakers, this volume makes a valuable contribution to current research on pensions and the economics of the elderly. The contributors report on retirement saving of individuals and the saving that results from corporate funding of pension plans, and they examine particular aspects of the plans themselves from the employee’s point of view.

Issues in Pension Economics  
*Edited by Zvi Bodie, John B. Shoven, and David A. Wise*

In the past several decades, pension plans have become one of the most significant institutional influences on labor and financial markets in the United States. *Issues in Pension Economics*, the third volume to result from an NBER study of this growth, covers a broad range of pension issues and utilizes new data sources richer than those previously available. Contributors address such issues as the interaction of pension-funding decisions and corporate finances, the role of pensions in providing adequate and secure retirement income, the effect of pension plans on savings behavior, the incentive effects of pension plans on labor market behavior, and the implications of plans for different demographic groups.

*An NBER Project Report*

Pensions, Labor, and Individual Choice  
*Edited by David A. Wise*

Contributors to this volume address two aspects of the relation between varieties of pension coverage and participation in the labor force. First, age at retirement may be correlated with kind of pension coverage. The papers, in fact, provide strong evidence that individual decisions about when to retire are directly influenced by pension options. Second, pension plans usually impose a high cost on workers who change jobs, which suggests that pension coverage reduces instances of job change. *Pensions, Labor, and Individual Choice* quantifies these correlations and proposes a conceptual framework within which to view them.
