

This PDF is a selection from a published volume from the
National Bureau of Economic Research

Volume Title: Hard-to-Measure Goods and Services: Essays
in Honor of Zvi Griliches

Volume Author/Editor: Ernst R. Berndt and Charles R. Hulten,
editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-04449-1; 978-0-226-04449-1

Volume URL: <http://www.nber.org/books/bern07-1>

Conference Date: September 19-20, 2003

Publication Date: October 2007

Title: List of Contributors, Indexes

Author: Ernst R. Berndt, Charles R. Hulten

URL: <http://www.nber.org/chapters/c11900>

Contributors

Jaison R. Abel
Analysis Group
111 Huntington Avenue, 10th Floor
Boston, MA 02199

Ana Aizcorbe
Bureau of Economic Analysis
1441 L Street, NW
Washington, DC 20230

B. K. Atrostic
Center for Economic Studies

Subject Index

Page numbers followed by t or f refer to tables and figures, respectively.

- 1990 Census of Population: previous matched data using, 34–35
- 1990 Decennial Employer-Employee Dataset (DEED), 32; estimates from, 50–55; fine-tuning matching for, 38–39, 39n8; introduction to, 33; matching workers and establishments, 37–38; overview of, 35–37; previous work on, 48–50; representativeness of, for manufacturing workers, 40–43, 40t; WECED results and results from, 55–59
- 1990 Standard Statistical Establishment List (1990 SSEL), 32, 34–35, 34n4
- Access providers. *See* Internet service providers (ISPs)
- Acute myocardial infarction (AMI). *See* Heart attacks
- Advanced Research Projects Agency Network (ARPAnet), 199
- Age-related depreciation, 125, 133, 136–38, 141–42
- Age-zero depreciation, 125
- Aggregate price indexes, elementary units and, 271–74
- Aggregation, 417, 459; of industry productivity measures, 422–30
- American Housing Survey (AHS), 157, 191–92; hedonic regression estimates of apartment rents from, 165–68; quality changes and, 168–72; quality issues in, 192–93
- American Time Use Survey (ATUS), 13; data collection, 74; demographic information, 75; household production questions and, 82–87; introduction, 73–74; labor force information, 75–76; measuring hours worked questions and, 87–94; *vs.* other time use surveys, 80–82, 81t; summary questions for, 77–78; time diary of, 76–77; time estimates from data of, 79–80. *See also* Time use data
- Annual Survey of Manufacturers (ASM), 45
- AOL, 204–5
- Apartment rents: Brown's evidence on quality change and, 178–82; evidence on quality change and, 182–83; hedonic regression estimates, for AHS data, 165–68; hedonic regressions based on Census of Housing data, 172–75; merging prehedonic and hedonic results for century-long perspective of, 158–86; study of, in Evanston, Illinois, 186–89; Weston data (1930-1970) for, 175–78. *See also* Rents
- Arrow-Debreu revolution, 15
- Assets: machine model to analyze assets of, 107–11; obsolescence and demise of, 117–19

- AT&T, 204–5
 ATUS. *See* American Time Use Survey (ATUS)
- Balancing, 460–63
 Baumol effect, 424n9
 Baumol's disease, 414, 414n1, 419
 Bias: in CPI, 235–37; in-sample, 236; out-of-sample, 236
 Block Numbering Areas (BNAs), 34n4
 Bulletin boards, 203
 Bureau of Labor Standards (BLS), 73
- Canada. *See* G7 nations
 Capital, IT, role of, 430–33
 Capital inputs, measuring, 384–85
 Capital measurement, 106–7; quality adjustment and, 103
 Capital models, 100–103
 Capital stock: calculating, 466; homogeneity assumption underlying measures of, 114–16
 CES. *See* Constant elasticity of substitution (CES)
 CEX. *See* Consumer Expenditure Survey (CEX)
 Chained-base fixed effects indexes, 249
 Chat rooms, 200
 Computer depreciation: age-related estimates of, 136–38, 141–42; data for, 127–30; decomposing, 143–47; estimates of, 136–43; modeling, 131–36; obsolescence and, 133–36; obsolescence estimates for, 138–40; overview of, 121–23; theoretical framework for, 123–27
 Computer inputs: empirical findings/discussion for relationships among computer networks, labor productivity and, 391–405; estimating relation of labor productivity to, 390–91; measuring, 386–87
 Computer investments, 386–87
 Computer networks: estimating impact of, 389–90; estimating relation of labor productivity to, 390–91; production function and, 383–84
 Computer semiconductor devices: changes in quality, NIPA and, 99–100; empirical findings/discussion for relationships among computer inputs, labor productivity and, 391–405; hedonic model for new prices of, 130–36. *See also* Microsoft's personal computer software products
 Computer services, 386
 Concordances, 457–58
 ConCORDING, 453, 463–65
 Conference on Research in Income and wealth (CRIW), 5, 6–7, 18n1
 Constant elasticity of substitution (CES), 484, 490–96
 Consumer Expenditure Survey (CEX), 13; comparison of expenditure means from two surveys, 526–28; description of, 520–26; introduction to, 516–20; wage inequality in, 528–30
 Consumer Price Index (CPI): belief in upward bias, 153–54; case for downward bias in, for apartment rents, 163–65; circumstantial evidence for downward bias of, 155; costs of bias in, 24; gross rents over century and, 158–61; logical case for downward bias of, 154–55; measurement bias in, 235–37; overstatement of inflation and, 6; sources of bias in, 20–21
 Consumer Price Survey (CPS), wage inequality in, 528–30
 Consumption, measuring and modeling, 12–14
 Consumption inequality, U.S., 530–33; introduction to, 515–16; results of study for, 538–41; studies of, 516–17
 Cost-of-goods index (COGI), 24
 Cost-of-living adjustments (COLAs), 23
 Cost-of-living index (COLI), 24–25
 CPI. *See* Consumer Price Index (CPI)
 CPS. *See* Consumer Price Survey (CPS)
 Current Population Survey (CPS), 74
- DEED, 1990. *See* 1990 Decennial Employer-Employee Dataset (DEED)
 Depreciation. *See* Computer depreciation
 Deterioration, 125, 125n3
 Diary Sample (DS), 517–18, 527; combining information from IS and, 533–38
 Diffusion: data for study of, 553–56; economic models of, 549; empirical results of study of, 556–65; factor analysis approach to, 552–53; Griliches *vs.* sociologists on, 547–52; measuring and modeling, 12–14. *See also* Technology adoption
 Disaggregation, 459–60

- Dummy time (variable) hedonic (DTH) indexes, 237, 247–48; *vs.* hedonic imputation indexes, 252–54
- Econometric analysis, 15
- Economic growth, labor and, 4
- Economics, post–World War II revolutions in, 15
- Economic systems, feedback mechanisms in, 22–23
- Economic theory, accurate measurement and, 4
- Elementary units, aggregate price indexes and, 271–74
- Factor analysis model, 552–53
- Feedback mechanisms, 22–23
- Fisher hedonic index, 246
- Fisher Ideal price index, 274
- Fisher price indexes, 272–74
- Fixed-base–fixed-effects indexes, 249
- Fixed-basket indexes, 272–74
- Fixed effects (panel) estimators, 248–49
- France. *See* G7 nations
- Fully constrained fixed effects index, 249
- G7 nations: alternative approaches to measuring economic growth of, 344–47; impact of investment in IT on economic growth of, 325–28; importance of investment and productivity for economic growth of, 336–44; investment/productivity in, 328–35; investment in IT in, 336–44
- General equilibrium analysis, 15
- Geometry, and hedonic indexes, 244–45
- Germany. *See* G7 nations
- Griliches, Zvi, 547; contributions of, 15–16, 573–74; hedonic indexes and, 577–83; impact of, on productivity research, 576–77; influence of, on statistical agencies, 585–86; MFT mismeasurement hypothesis of, 574–76; research themes of, 16; topics that didn't interest him, 583–85
- Hall equation, 102–3
- Heart attacks: Medicare claims data on treatment of, 554–55; other data on quality of medical care for, 555; treatment of, 546
- Hedonic approach, 237–41
- Hedonic imputation (HI) indexes, 237; *vs.* dummy time hedonic indexes, 252–54; unweighted arithmetic means of relatives, 245; unweighted geometric means, 242–44; weighted arithmetic means of relatives, 246; weighted geometric means, 244–45
- Hedonic price indexes: concern of, 241; for CPI measurement, 236–37; data for study of, 254–55; Griliches's contribution to, 577–83; for ISPs, 216–22; mean value function for, 247; methodology for studying, 251–54; methods of, 241–49; regressions for, 255–56; research questions for studying, 249–51; results for study of, 256–62; theory of, 237–41; weighted, 228–29. *See also* Price indexes
- Hedonic regressions, 236
- Hicks-Samuelson revolution, 15
- HI indexes. *See* Hedonic imputation (HI) indexes
- Hours worked, measuring, 87–94
- Household production: defined, 83; National Income and Products Accounts and, 82–87
- Human capital, 4
- Hybrid corn, adoption of, 546–47
- Hybrid indexes, 241
- IBM, 204–5
- ICT capital, 466–67, 466n12
- ICT workers, 467n13
- Indexes. *See* Price indexes
- Index numbers: integrating economic and stochastic approaches to, 487–89; introduction to, 483–85; stochastic approach, 485–87
- Indirect current-period HI index, 244
- Industry productivity: aggregating measures of, 422–30; measurement issues, 436–45
- Inflation, overstatement of, CPI and, 6
- Information technology (IT), 112; contribution of, to U.S. labor productivity growth, 418; impact of investment in, on G7 nations, 325–28; investment in, 336–44
- Information technology (IT) capital, role of, 430–33
- Information technology (IT) industries, studies of growth outside of, 433–36

- In-sample bias, 236
- Internet service providers (ISPs), 200; data set used for studying, 207–10; elementary price indexes for, 210–28; hedonic price indexes for, 216–28; history of, in U.S., 199–207; introduction to, 197–99; market/pricing structure of, 204–6; number of, in U.S., 203; organization of, 201f; price determinants for, 213–16; price indexes of, 206–7; pricing by, 200–204; size of, 202; weighted, 228–29
- Interview Sample (IS), 517–18, 527; combining information from DS and, 533–38
- Investment, productivity and, 328–35
- ISPs. *See* Internet service providers (ISPs)
- IT. *See* Information technology (IT)
- Italy. *See* G7 nations
- Japan. *See* G7 nations
- Jevons index, 242
- Knowledge capital, measurement of, 20–21
- Labor: as component of R&D cost, 301–2; economic growth and, 4; measurement, 31–32; quality of, in production function, 43–48
- Labor input, quality of (*QL*), 45–46
- Labor productivity: empirical findings/discussion for relationships among computer inputs, computer networks and, 391–405; services industries and, 414; time series estimates of, 101; trends in, 418–22. *See also* Services productivity
- Labor productivity growth, measuring, 418
- Laspeyres price indexes, 243, 246, 272–74
- Listserve, 200
- Longitudinal Research Database (LRD), 35, 44–45, 44n14
- Machine model, 103–7; for aggregate capital measures, 111–12; marginal product of machines and, 112–14; nominal earnings of assets described with, 107–11
- Marginal product, of machines, 112–14
- Matched-Model price indexes: elementary units and, 271–72; for Microsoft's software products, 274–78
- MCI, 204–5
- Measurable sectors, 5
- Measurement, theory and, 16–19
- Microsoft's personal computer software products: background of, 270–71; introduction to, 269–70; matched-model price indexes for, 274–78; results of price changes for, 278–83
- Multifactor productivity (MFP), 5, 101; in IT-producing industries, 433–35; services industries and, 414; trends in, 418–22. *See also* Services productivity
- National Income and Product Accounts (NIPA), 15, 20; household production and, 82–87; quality change in computers and, 99–100
- National Science Foundation, 199
- Negative productivity growth, 440–43
- Negative rents, 110–11
- Networks. *See* Computer networks

- Rents: extraction of, from machines, 107–8; negative, 110–11. *See also* Apartment rents
- Research and development (R&D), 10–11; intensities, 314–18
- Research and development (R&D) PPP: alternative versions of, at country level, 311–12; alternative versions of, at industry level, 312; alternative versions of, for 1987, 312–13; computation of, 300–305; estimation in manufacturing, 298–308; introduction to, 291–94; for 1987, 307–8; over time, 313–14; previous research on, 294–98; sensitivity of, 308–11
- Residual model, Solow's, 100–101
- Sample Edited Detail File (SEDF), 34–35, 34n4
- Sato-Vartia price index, 490–91
- Scrapage, 126
- Semiconductor devices: calculations for relative importance of, 376–77; construction of price indexes for, 355–63, 369–76; introduction to, 351–55; prices of, and prices of end goods, 363–68. *See also under* Computers
- Services productivity: introduction to, 413–16; measuring, 415–16. *See also* Labor productivity; Multifactor productivity (MFP)
- Singapore: application of study results to productivity in, 500–511; TFP for, 485
- Software products: impact of quality change/inflation on, 286–98; studies in price changes of, 283–84; U.S. government producer price indexes for, 284–86. *See also* Microsoft's personal computer software products
- Solow's residual model, 100–101
- Solow vintage capital model, 101–2
- SSEL, 1990. *See* 1990 Standard Statistical Establishment List (1990 SSEL)
- Statistical agencies, Griliches's influence on, 585–86
- System of National Accounts (SNA), 82–83
- Szalai International Study, 73
- Technology adoption: introduction to, 545–47; measures of nonmedical, 553–54; state-level factors influencing rate of, 556. *See also* Diffusion
- TFP. *See* Total factor productivity (TFP)
- Theory, measurement and, 16–19
- Time use data: activities of nonworker uses of, 95–96; household production and, 82–87; income/well-being uses of, 94–95; intrahousehold allocation of time uses of, 94; measuring hours worked and, 87–94; uses of, 82–96. *See also* American Time Use Survey (ATUS)
- Törnqvist hedonic-imputation index, 246
- Total factor productivity (TFP): growth, 101; requirements for measuring, 450–51
- Translog function, 496–99; with stochastic prices, 499–500
- “Tree of Zvi,” 585n13
- United Kingdom. *See* G7 nations
- United States. *See* G7 nations; Services productivity
- Unmeasurable sectors, 5
- Unweighted hedonic indexes, 242–45

- U.S. labor productivity: basic industry data for, 465–66; contribution of IT to growth of, 418; investment data for, 465; labor services and, 466–67; methodology for measuring growth of, 418; in nonfarm business, 467–69; outside computer/semiconductor manufacturing, 417; overview of growth of, 416–18; Y2K and, 469–72
- Vintage aggregation, introduction to, 99–100
- Vintage capital model, Solow, 101–2
- Wage inequality, in CEX/CPS, 528–30
- Weighted hedonic price indexes, 228–29
- Women, productivity of, 32
- Worker-Establishment Characteristics Database (WECD), 34–35, 40n9; DEED results and results from, 55–59
- World Wide Web (WWW), 200
- Write-in file, 36–38
- Y2K, 469–72
