

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: International Differences in the Business Practices and Productivity of Firms

Volume Author/Editor: Richard B. Freeman and Kathryn L. Shaw, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-26194-8

Volume URL: <http://www.nber.org/books/free07-1>

Conference Date: January 2006

Publication Date: September 2009

Chapter Title: List of Contributors, Indexes

Chapter Author: Richard B. Freeman, Kathryn L. Shaw

Chapter URL: <http://www.nber.org/chapters/c11929>

Chapter pages in book: (p. 263 - 272)

- United States: adoption of information technologies in valve-making industry in, 66–67; conditions of valve-making plants in, 64–69; survey data on valve-making industry in, 57–61. *See also* Valve-making industry
- Value-added gain-sharing plan (VAG), 231; impact of, 249–52; interaction of other policies and, 237–47; introduction of, 236–37; timeline for implementation of, 232–33
- Valve-making industry, 56; adoption of human resource management practices in, 67–68, 68f; adoption of information technologies in, 66–67, 67f; automated inspection machines in, 59–60; CNC technology and, 56–59; computerization of, 58–69; flexible manufacturing systems and, 59; impact of adoption of new human resource management practices and demand for worker skills in, 74–77; impact of human resource management practices on product-level efficiency, 70, 71t; impact of information technology on, 69–71; impact of information technology on customization in, 72–74; impact of information technology on production efficiency, 69–70, 71t; information technology and, 57–69; operational imperatives for remaining competitive in, 60–61; product customization and, 60–61; production efficiency and, 60; survey data on, in United States and United Kingdom, 57–61; survey of, 61–64; three-dimensional computer-aided design (3D-CAD) in, 60; trends in measures of production efficiency in, 65t, 68

- Valve-making production process,  
57–60; CNC machines, 58–59; flexible manufacturing systems, 59–60; three-dimensional computer-aided design and, 60
- Valves, 57
- Worker skills, demand for, in valve-making industry, 74–77
- Work-life balance (WLB): competition and, 32–34, 33t; correlation between management practices and, 17, 17f; data for, 19–28; empirical predictions of different models for, 20t; findings of literature on, 16–17; good management and, 15–16; management practices and, 30–32; modeling approach to, 18–19; multinational firms and, 35–37, 36t; outcomes and practices, 28–30, 29t; productivity and, 15–16, 34–35, 34t; results for, 28–37; results for competition and, 32–34; results for management and, 30–32, 31t; scoring data for, 22–23
- Work organizations, importance of, 174
- Work practices, importance of, 174
