

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Explorations in the Economics of Aging

Volume Author/Editor: David A. Wise, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-90337-0

ISBN13: 978-0-226-90337-8

Volume URL: <http://www.nber.org/books/wise09-2>

Conference Date: May 2009

Publication Date: March 2011

Chapter Title: Indexes

Chapter Authors: David A. Wise

Chapter URL: <http://www.nber.org/chapters/c12872>

Chapter pages in book: (377 - 388)

Contributors

Abhijit Banerjee
Department of Economics, E52-252d
Massachusetts Institute of Technology
50 Memorial Drive
Cambridge, MA 02142-1347

John Beshears
Graduate School of Business
Stanford University
518 Memorial Way
Stanford, CA 94305

Anne Case

Subject Index

Note: Page numbers followed by f or t refer to figures or tables, respectively.

- accumulated assets: health and, 4–5; use of, 3–4
- age: effect of, on religiosity, 238; religiosity and, 14, 239–40, 243–54
- Agincourt Health and Population Unit (AHPU), 352–55; summary statistics, 354t; summary statistics on deceased in, 355t
- aging: home ownership and, 25; in less developed countries, 16–19; religion and, 13–14
- AHEAD. *See* Asset and Health Dynamics Among the Oldest Old (AHEAD)
- anchoring vignettes, 15, 16. *See also* vignettes
- anemia, 17
- Asset and Health Dynamics Among the Oldest Old (AHEAD), 25; data problems of, 26–28; *person* as unit of analysis and, 29; summary of asset changes for cohort, 40–45
- asset changes: for AHEAD cohort, 40–45; analysis of, 26–33; based on SIPP cohort estimates, 51–54; for HRS cohort, 33–40; latent health index and, 56–60; of persons before, during, and after family status transitions, 45–51, 46t
- assets: at beginning and end of interval, for family status transitions, 45–51, 46t, 62; drawdown of, in retirement, 24; evolution of, and family status transitions, 26–33; levels of, and latent health, 56–60; studies on drawdown of, after retirement, 24–25
- Average Indexed Monthly Earnings (AIME), 196
- Balanced Budget Act (1997), 9
- burial societies, 359, 360t
- cognition: data and measures of, in Health and Retirement Survey, 213–17; economics and, 210–13
- cognitive economics survey (CogEcon), 13, 209–10, 216; advantages/disadvantages of, 226; individual-level analysis of, 222–30
- cognitive skills, 13; economic outcomes and, 209–10
- crystallized intelligence, 211–13, 214, 230
- decentralized iron fortification, 17
- differential item functioning, 275
- differential mortality, 11–12, 189–90; data for, 191–96; literature review of, 190–91; results, 198–202. *See also* Social Security progressivity
- disability insurance (DI): variance in fraction of Western European workers on, 269–70, 270t. *See also* work disability

- earnings. *See* income, lifetime
- economics, cognition and, 210–13
- education: effect of, on religiosity, 238; religiosity and, 243–54, 252–53
- employment status, 286–88
- episodic memory, 214, 215, 220, 222, 228, 230
- evolution of assets. *See* asset changes
- family status transitions: asset changes of persons before, during, and after, 45–51, 46t, 62; evolution and assets and, 26–33; studies of, 25; use of accumulated assets and, 4
- fertility, age gap in religiosity and, 252
- financial circumstances, 3
- financial decision making, 3
- financial literacy, age and income factors of, 229
- fluid intelligence, 211–13, 214, 230
- 401(k) assets, 24; measurement of, and HRS and AHEAD data, 26–27
- funeral policies, 359, 360t
- funerals: Agincourt demographic surveillance site for study of, 352–55; discussion of studies of results of, 368–72; expenses for, 356–60; high-price, effects of, 18–19; household and individual outcomes of, 360–68; purchases for most recent, 356t; purpose of, in South Africa, 351–52; South African saving mechanisms for, 358–59, 360t; spending on, 358t
- Gallup World Poll, 14, 238, 241–43
- gender: effect of, on religiosity, 238; religiosity and, 14
- gender gap, religiosity and, 247–48
- health: effect of religion on, 237–38, 240–41; HRS data on, 55; religion and, 14; religiosity and, 254–60; socioeconomic circumstances and, 11–16; use of accumulated assets and, 4–5. *See also* latent health
- Health and Retirement Study (HRS), 25; data and measures of cognition in, 213–17; data problems of, 26–28; dimensions of cognitive skills included in, 210; health information and, 55; individual-level analysis of cognition in, 217–22; measuring change in assets with, 28–29; *person* as unit of analysis and, 29; questions in, for latent health index, 55–56; summary of asset changes for cohort, 33–40
- health care costs, 7–11
- high-priced funerals. *See* funerals
- home equity, drawdown of, in retirement, 24
- home ownership, aging and, 25
- household deaths: anxiety and, 366–68, 369t; children's outcomes and, 363–66, 365t; depression and, 366–68, 367t, 369t; expenditures per member, 360–62; problems in household and, 363, 364t
- HRS. *See* Health and Retirement Study (HRS)
- IDA. *See* iron deficiency anemia (IDA)
- income, lifetime: data for, 194–96; mortality and, 189; religiosity and, 243–54
- income growth, religiosity and, 14
- intelligence, dimensions of, 211–13
- internal rates of return (IRRs), 11; computing, 198–202; defined, 197; results, 198–202
- IRA assets, 24
- iron deficiency, 17, 317–18
- iron deficiency anemia (IDA), 318
- iron fortification. *See* iron supplementation
- iron supplementation, 17, 318–20
- iron supplementation program, community-level: baseline descriptive statistics for, 321–22; data collection for, 326–27; described, 322–25; evaluation design for, 325–26; evaluation objectives for, 320–21; impact on anemia and hemoglobin levels for, 329–35; impacts on health and work outcomes of, 335–41; program take up results for, 327–29
- IRRs. *See* internal rates of return (IRRs)
- justification bias, 15, 286–90, 289f
- latent health, effects of, 58–59. *See also* health
- latent health index, 55–56; asset levels and evolution and, 56–60, 62
- MCBS. *See* Medicare Current Beneficiary Survey (MCBS)
- medical procedures, growth rates in, 9
- Medicare, 104–5; cost growth in, 133–34; factors associated with changes in spending in, 152–55; geographic varia-

- tions in cost growth in, 149–52, 155–56; methodology for examining spending in, 136–37; reimbursements data for, 135–36; results for aggregate trends in enrollment and spending in, 137–48
- Medicare Current Beneficiary Survey (MCBS), 106–7
- Medicare Expenditure Panel Survey (MEPS), 106–7
- Medicare Part B, 155
- Medicare Part D prescription drug program, 10–11; analysis of consumers' decisions for, 172–78; institutional design, 160; policy goals of, 160; research on, 164–67; review of, 161–64
- Medicare spending, 8–9
- memory measures, 214
- mental status, 214, 215
- MEPS. *See* Medicare Expenditure Panel Survey (MEPS)
- mortality, data on, 191–94
- mortality differences. *See* differential mortality
- Mozambique, 352; deaths in, 355; effects of death of family member in, 362
- net present values (NPVs), 12, 197; computing, 198–202; results, 198–202
- number series test, 214, 215, 218–19, 230
- numeracy, 13, 215, 216–17, 220, 222, 228, 230
- out-of-pocket (OOP) health care expenditures, 7–8; challenges in measuring, 102–3; conclusions about, 123–27; data for study of, 108–14; differences in spending on, 103; distribution of, 103; evidence on, 104–7; results of study of, 114–23; in survey data, 101–2; variance in, 103
- Panel Study of Income Dynamics (PSID), 25
- pension assets, 27n1
- personal retirement accounts, 23–24
- Primary Insurance Amount (PIA), 196
- prospectuses, 75–76. *See also* Summary Prospectuses
- religion: aging and, 13–14; consequences of, 13–14; cross-country analysis of importance of, 243, 244t; determinants of, 13; effect of, on health, 237–38; health and, 14; literature on consequences of, 240–41; within-country analysis of importance of, 243–47, 245t
- religiosity: age and, 14, 239–40, 249; education and, 252–53; effects of education, age, and sex on, 238; fertility and age gap in, 252; gender and, 14; gender gap in, 247–48; health and, 254–60; income growth and, 14
- religious capital, 248
- response scales, 15–16; model estimates for, 281–86
- Retirement Perspective Survey (RPS), 10, 167–72
- retirement savings, 3–6; adequacy of, 62–63; previous studies of, 24–25
- retrieval fluency, 215, 218
- risk-taking theory, 250
- RPS. *See* Retirement Perspective Survey (RPS)
- secularization hypothesis, 239; role of state and, 240; shortcoming of, 249–50
- self-reported work disability, model estimates for, 281–86. *See also* work disability
