

This PDF is a selection from a published volume from the
National Bureau of Economic Research

Volume Title: Commodity Prices and Markets, East Asia Seminar
on Economics, Volume 20

Volume Author/Editor: Takatoshi Ito and Andrew K. Rose, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-38689-9

ISBN13: 978-0-226-38689-8

Volume URL: http://www.nber.org/books/ito_09-1

Conference Date: June 26-27, 2009

Publication Date: February 2011

Chapter Title: Indexes

Chapter Authors: Takatoshi Ito, Andrew K. Rose

Chapter URL: <http://www.nber.org/chapters/c12879>

Chapter pages in book: (325 - 335)

Contributors

Subject Index

Note: Page numbers followed by f or t refer to figures or tables, respectively.

- Annual Report on Exchange Arrangements and Exchange Restrictions (AREAER, IMF), 95, 95n14
- Autoregressive (AR) model of forecasting, 22
- Baltic Dry Index (BDI), 21, 28
- Bank of Japan, 9
- Capital controls, exchange rate volatility and, 102, 104t
- Commodity currencies, 52–53
- Commodity/currency relationships, literature on, 48
- Commodity futures markets: data and methodology used for study of, 50–57; relationships among currency and, introduction to, 47–50; results for study of, 57–65
- Commodity price cycles: inflation and, 16; interpreting, 18–21
- Commodity price fluctuations, 1
- Commodity price index, 4, 4f
- Commodity prices: assessing forecasting properties of, 25–27; conclusions for study forecasting, 35–37; data description for study of, 27–29; exchange rate fluctuation and, 17, 21; forecasting currencies with, 5–6; inflation and, 15; pass-through of, to general price level, 8–10; pass-through of, to retail prices, 15–16; prices of goods and services vs., 7; reasons for interest in, 6–7; results for study of, 29–25; shocks to, 7; specifications of forecasting equation of, 21–24
- Commodity-to-currency lead-lag relationships, 62–65
- Consumer Price Index, intensity of use of commodities and, 16
- Consumption terms of trade, 123–24, 131, 131t; for United States, 129, 130f. *See also* Terms of trade
- Consumption terms of trade at local prices, 124, 139–42
- Consumption terms of trade at world prices, 123–24, 129
- Country commodity return indices, 53–55
- Currencies, forecasting, with commodity prices, 5–6
- Currency boards on trade, 98, 99t
- Currency-to-commodity lead-lag relationships, 59–62
- Currency unions, 98, 99t
- Diesel fuel, pass-through rates for, Japan, 176–77
- Dow Jones-AIG Commodity Index (DJ-AIG), 27; forecasting results for using, 30–31, 31t, 32t

- Dynamic stochastic general equilibrium (DSGE) model: data for, 307–8; empirical results of, 319; estimation and evaluation of, 305–7; of oil sector in Korea, 280–87, 296–304
- Economist Intelligence Unit, 144
- Electricity, pass-through of oil prices to, in Japan, 170–71, 171f, 177–78
- Exchange rate-based model of forecasting, 22
- Exchange rates: commodity prices and, 17, 21; exogenous shocks and, 90–92; forecasting commodity prices with, 5–6
- Exchange rate volatility: capital controls and, 102, 104t; developed vs. developing exporting countries and, 102, 103t; distance between trading partners and, 79–82; empirical model of, 93–94; endogenous, 90–92; four-country, two-sector model, 84–90; introduction, 79–84; measurement of, 95–96; reducing relative effect of commodity trade and, 102, 105f, 106f; results for study of, 96–102, 97t; sensitivity of study's results to alternative measures of, 98–102, 101t; trade and, 79–81, 90–91
- Exogenous shocks, exchange rates and, 90–92
- Factor-augmented regressions, 22, 23
- Fixed exchange rates, trade and, 98, 100t
- Flexible exchange rate regimes, criticism of, 79
- Forecasting: assessing properties of, 25–27; autoregressive (AR) model of, 22; exchange rate-based model of, 22; random walk (RW) model of, 22
- Four-country, two-sector trade model, 84–90
- Futures prices, 20
- Gasoline, pass-through of oil prices to, in Japan, 169, 170f, 175
- Global oil market, structural shocks to, 199–203
- Goods prices, terms of trade and, 134–39
- Haver Analytics DLX database, 28
- IMF Nonfuel Commodity Prices Index (IMF), 27; forecasting results for using, 31, 34t, 35t
- Inflation, 1; commodity price cycles and, 16; commodity prices and, 15; monetary policy credibility and, 16; oil price shocks and, 3, 266; world, 125–29
- Input-output (IO) tables, Japanese: predictions of, for 1980 to 2000 period, 171–82; predictions of, for 2000 to 2007 period, 182–86
- Japan: basic statistics on industrial structures for, 209–10, 209t; effects of oil price changes on industry-level production and prices in, 210–19; effects on aggregate production of oil price changes in, 206, 207f, 208f; input-output tables for, 1980 to 2000 period, 171–82; input-output tables for, 2000 to 2007 period, 182–86; oil price changes in, 195; oil price changes in, vs. United States, 227–28; responses of production and prices to global demand shock in, 219, 221f; responses of production and prices to oil-specific demand shock in, 222, 224f; transmission mechanisms of oil price changes in, 222–27. *See also* Oil price changes
- Korea: composition of oil use in, 296, 296t; data for economy of, 266–70; DSGE model of oil sector in, 280–87, 296–307; effects of oil price rises in, 11–12; empirical results of VAR estimates, 273–78; historical simulation of oil prices shocks on economy of, 278–79; monetary policy responses toward oil price inflation in, 287–89; structural vector autoregression (VAR) model for study of, 270–73
- Mean of squared forecast errors (MSE), 25–26
- Monetary policy credibility, inflation and, 16
- Oil: nominal price of, 2f; overview of nominal price of, 2–3
- Oil market, global, 199–203
- Oil price changes, 195–96; comparing U.S. and Japan and, 196–97; effects of, on industry-level production and prices, 210–19; effects on economy of, 295; industry-level effects of, 206–22; inflation and, 266; macroeconomic effects of, 203–6; transmission mechanisms of,

- 222–27; VAR model for study of, 198–203. *See also* Japan; United States
- Oil price increases, 1; as cause of U.S. recessions, 264–65; economic growth and, 263–64; geopolitical conflicts and, 264
- Oil prices: causes of post-war shocks in, 3; effects of, on domestic prices, 155–56; effects of changes in, 195–98; fluctuations in, 2; macroeconomic effects of, 10–12; macroeconomic fluctuations and, 3; timing of changes in, 3
- Oil price shocks. *See* Oil price changes
- Partial least squares (PLS) regression, 23–24, 23n14
- Pass-through of commodity prices: to general price level, 8–9; to retail prices, 15–16. *See also* Japan; Taiwan; United States
- Portfolio balance model, 48–49
- Price pass-through, 237; empirical procedures for case of Taiwan, 252–54; studies of factors affecting extent of, 239. *See also* Taiwan
- Production terms of trade, 123, 131, 131t
- Random walk (RW) model of forecasting, 22
- Rauch classification of trade, 94–95
- Retail prices, pass-through of commodity prices to, 15–16
- Reuters/Jefferies CRB Index (CRB), 27, 51; forecasting results for using, 29–30, 30t, 31t
- Speculation, spot prices and, 20
- S&P/Goldman Sachs Index (SPG), 27, 51; forecasting results for using, 30–31, 33t
- Spot prices, speculation and, 20
- Taiwan: conclusions of study of price pass-through in, 250–52; data availability for, 239; economy of, 237–38; empirical procedures for price pass-through in, 252–54; estimating commodity price pass-through for, 241–45; impacts of price pass-through for, 245–46; price pass-through distribution effects upon consumers in, 246, 247f; price pass-through distribution effects upon producers in, 247–50, 249t; transmission mechanisms and empirical procedures for price pass-through in, 240–41
- Terms of trade: consumers and, 6–7; consumption, 123–24, 129, 130f, 131, 131t, 139–42; data for study of, 124–25; features handicapping value of theoretical models of, 120; goods prices and, 134–39; movements in, importance of understanding, 119–20; production, 123, 131, 131t; shocks, commodity-to-currency relationships and, 49; use of retail prices in studying, 120–22; variance decomposition of, 132–34. *See also* Consumption terms of trade; Trade
- Time-varying parameter VARs (TVP-VARs), 162–71, 186–88
- Trade: empirical model of, 93–94; exchange rate volatility and, 79–82, 90–91; fixed exchange rates and, 98, 100t; four-country, two-sector model of, 84–90; Rauch classification for studies of, 94–95; real exchange rate data and, 94–96; results for study of, 96–102, 97t. *See also* Exchange rate volatility; Terms of trade
- Transmission mechanisms, of oil price changes, 222–27
- Type A fuel, pass-through rates for, Japan, 176–77
- United States: basic statistics on industrial structures for, 209–10, 209t; effects of oil price changes in, 195; effects of oil price changes on industry-level production and prices in, 210–19; effects on aggregate production of oil price changes in, 203–6, 204f, 205f; oil price changes in, 195; oil price changes in, vs. Japan, 227–28; responses of production and prices to global demand shock in, 219, 220f; responses of production and prices to oil-specific demand shock in, 222, 223f; transmission mechanisms of oil price changes in, 222–27. *See also* Oil price changes
- Vector autoregressions (VARs), 9, 156, 157; evidence from regular, 158–62; for studying oil price changes in United States and Japan, 198–203; time-varying parameter (TVP), 162–71
- Volatility of exchange rate. *See* Exchange rate volatility
- World inflation, 125–29
