

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Measuring Economic Sustainability and Progress

Volume Author/Editor: Dale W. Jorgenson, J. Steven Landefeld, and Paul Schreyer, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-12133-X (cloth); 978-0-226-12133-8 (cloth); 978-0-226-12147-5 (eISBN)

Volume URL: <http://www.nber.org/books/jorg12-1>

Conference Date: August 6–8, 2012

Publication Date: September 2014

Chapter Title: Indexes

Chapter Author(s): Dale W. Jorgenson, J. Steven Landefeld, Paul Schreyer

Chapter URL: <http://www.nber.org/chapters/c13790>

Chapter pages in book: (p. 643 - 659)

Subject Index

Page numbers followed by the letter *f* or *t* refer to figures or tables, respectively.

- Accounting principles, 380–81
Accounting software, personal financial, 130–31
Accumulation accounts, 281; status of availability of, 410–13
Affordable Care Act (ACA), funding for comparative effectiveness research, 35
Aggregate expenditure, 59
Aggregate income, reconciling household income and, 222–23
Aggregate statistics, 5, 18
Air pollution. *See* Environmental accounting
American Housing Survey (AHS) data, 256
American Opportunity Tax Credit (AOTC), 30–31
American Recovery and Reinvestment Act (ARRA) of 2009, 204, 206
AP2 model (integrated assessment model), 432, 439–40. *See also* Environmental accounting
Atkinson report, 36–37
Autonomous expenditure multipliers, 237–40
Average propensity to consume (APC), 235–36; multiplier analysis for, 237–40
Balance sheet approach (BSA), 387–89, 388t; compilation of, 389–90
Balance sheets: implementing, and SNA, 397–401; sectoral, status of availability of, 410–13. *See also* Wealth
Bank for International Settlements (BIS), 383; international banking statistics of, 392–93
BEA (Bureau of Economic Analysis), 215–16
BEA/BLS industry-level production account, 10–11, 323–27; asset detail, 343–44; capital stocks, 344–46; conceptual and measurement challenges, 348–50; conceptual overview of measurement, 339–40; future work, 350–52; government, nonprofit, and owner-occupied capital, 346; labor composition, 347–48; prototype results, 327–35. *See also* BEA/BLS industry-level production account estimation methods
BEA/BLS industry-level production account estimation methods: aggregation, 340–41; capital inputs, 343; gross output, value added, and intermediate inputs, 341–43; labor input, 346–47. *See also* BEA/BLS industry-level production account
Better life index, 19
Better Life Initiative (OECD), 39
Bhutan, kingdom of, 19

- BSA. *See* Balance sheet approach
- Bureau of Economic Analysis (BEA), 215–16
- Canadian hospital sector, 14, 575–77; data for, 581–84; direct output measures of, 584–91; methodology of study, 577–81. *See also* Medical-care expenditures
- Canberra report, 216
- Capital accounts, 281–83; challenges in linking, 286–89
- Capital gains, 198–99
- Capital income, 194–95, 198
- CDIS (Coordinated Direct Investment Survey), 391–92
- Centralized Securities Database (CSDB), 393, 396–97
- CEX. *See* Consumer Expenditure Survey (CEX) program
- Changing demographic weights, 558
- COINVEST project, 610
- Conference on Research in Income and Wealth (CRIW), 214
- Consumer behavior: econometric models of, 46–47; modeling, 81–84
- Consumer credit/debt, 266–67
- Consumer Credit Panel (CCP, New York), 267–70
- Consumer Expenditure Survey (CEX) program, 7, 47, 127, 137–41, 633–34; expenditure integration, 156–62; income integration, 143–56
- Consumer Price Index (CPI), 45
- Consumption: full, cross-country comparison of, 105–12; implications for measurement of, 124–26; macromeasures of, 140–41; macrosources of, 140–41; micromeasures of, 140; microsources of, 140. *See also* Expenditures integration
- Coordinated Direct Investment Survey (CDIS), 391–92
- Coordinated Portfolio Investment Survey (CPIS), 390–91
- CoreLogic national house price index, 256
- Cost-based approach, for measuring human capital, 497
- Cost-of-living index, 103–5; social, 73–74, 75–76t
- CPIS (Coordinated Portfolio Investment Survey), 390–91
- CPS-ASEC. *See* Current Population Survey
- Annual Social and Economic Supplement
- CRRA (constant relative risk aversion) utility function, utility maximization with, 120–21
- CSDB (Centralized Securities Database), 393, 396–97
- Current accounts, 280–81; challenges in linking, 286–89
- Current Population Survey (CPS), 7, 8, 127
- Current Population Survey Annual Social and Economic Supplement (CPS-ASEC), 137–42, 140, 224–33; comparison to other measures, 169–76; expenditure integration, 156–62; household breakdowns, 162–63; household type results, 168; income integration, 143–56; income quintile results, 163–67; main source of income results, 167–69
- Data Gaps Initiative (DGI; G-20), 373–74, 637, 640t, 641f
- Data sources: existing, and household spending behavior questions, 6–7; lack of comprehensive, 4; problems with, for dynamic household incomes, 126–29; Scandinavian, 131–32
- Degree of aversion to inequality parameter, 58
- Demographic weights: changing, 558; fixed, 556–57
- DGI. *See* Data Gaps Initiative
- Diary Survey, 140
- Disposable household income, 7. *See also* Household income
- Domestic Income and Product Account, 61f, 62–67, 63–64t, 66–67, 68–69t
- Double entry accounting principle, 60, 380
- Durable goods, 260
- Economic accounting, 4; expansion of, 26–27
- Economic flows, 380
- Economic growth, US, 70, 70t; accounts for sources of, 65–66, 66t
- Economic measurement, 17–18; traditional, 18; of well-being, 18–19
- Economics: psychology and, 19–20; purpose of, 17–18
- Economic Stimulus Act of 2008, 204
- Education, accounting for investment in, 27–32

- Education sector, real output of, 481–84
- Efficiency: money measure of, 51; quantity index of, 72–73
- Egalitarian index of relative inequality, 76, 77–78t
- Egalitarian social welfare function, 58
- Enterprise Classification System, 632
- Environmental accounting, 429–36; empirical model for, 439–40; framework, 436–39; literature on, 433–34; NIPAs and, 430–32; results of AP2 model, 440–53; valuation of environmental damage and, 432–33
- Environmental accounts, 431
- Environmentally adjusted value added (EVA), 431; comparisons of GED and, 433; defined, 430; results of model for, 440–53
- Equity: defined, 73; money measure of, 51; in noncorporate business, 260–61; quantity index of, 73
- EU KLEMS project, 67. *See also* KLEMS
- Euro area accounts (EAAs), 386, 394–97
- EVA. *See* Environmentally adjusted value added
- Exact aggregation, 54–56
- Expenditure multipliers, autonomous, 237–40
- Expenditures integration: definitions, 156–57; matches and indicators, 158–62; scope adjustments, 157–58
- Federal Reserve Board, 245
- Federal taxes: income inequality and, 203–9; progressivity of, 207; progressivity of, by source, 208–9
- FFA. *See* Flow of Funds Accounts
- Financial accounting software, personal, 130–31
- Financial accounts, 281; challenges in linking, 286–89
- Financial assets, household, 261–65
- Financial instruments, presentation of, by creditor and residency of debtor, 414–23
- Financial Stability Board (FSB), 373–74
- Fisher price index, 438, 457t
- Fixed demographic weights, 558
- Flow of funds: defined, 386–87; experiences in compilation and use of, 386–87
- Flow of Funds Accounts (FFA), 245, 247–48; conceptual adjustments to net worth, 252–53; data, 9; durable goods, 260; equity in noncorporate business, 260–61; household balance sheets, 250t; household financial assets, 261–65; household net worth, conceptual adjustments to, 252–53; measuring household liabilities, 265–70; owner-occupied real estate, 256–60; tangible assets and, 255–61
- From-whom-to-whom framework, 374; applying, for financial positions and flows, 401–5; deposits and loans on, 394; Euro area accounts and, 394–97; integrating money and credit in, 407; monitoring government debt in, 395–96; monitoring monetary transmissions processes in, 394–95; monitoring securities issues and holdings in, 396–97
- GDP. *See* Gross domestic product
- GED. *See* Gross external damage
- GED/VA, by sector, 456t
- GED/VA index, 434–35
- GED/VA ratio, results of model, 442–43
- Gemini project, 634
- Genuine Progress Indicator, 39
- Gini index, 193, 195–97, 196t, 200
- Government output, improving measurement of, 36–38
- Government transfer payments, income inequality and, 200–203
- Gross domestic product (GDP), 214, 601–2; BEA/BLS collaboration in measuring, 325–26; empirical model for, 439–40; industry statistics, 323–24; results of model for, 440–53; statistics, 10–11; as welfare measure, 26–27
- Gross external damage (GED), 11–12; calculating, 436–37; comparisons of EVA and, 433; from electric power generation, 457t; empirical results, 434; factors driving changes in, 435; NIPAs and, 430–32; tabulating for deflation and real values, 437–39; tabulating using alternative mortality parameters, 457t
- Gross National Happiness index (Kingdom of Bhutan), 19, 213n1
- Gross National Happiness index (United Nations), 213
- Growth, income inequality and, 216

- Growth accounting, implications of intangible capital for, 616–19
- Growth accounting model, 598
- G20 economies, 373–74, 375; availability of data on financial assets and liabilities in, 412t; availability of data on nonfinancial assets in, 413t
- Haig-Simons equation, of income, 217, 220
- Happiness, economic perspective of, 18
- Health, accounting for investment in, 32–36
- Health Care Cost Institute (HCCI), 4, 35
- Health-care expenditures. *See* Canadian hospital sector; Medical-care expenditures
- Health-care spending, 13–14, 34–35
- Household balance sheets, 245, 250t, 251t, 271–72
- Household equivalence scales, 47–48, 56
- Household expenditures. *See* Consumption
- Household financial assets, 261–65
- Household income, 119–20; analysis limitations, 186–90; changes in distribution of, 8; data for, 214, 215f; disposable, 7; distribution of, 8–9, 190–99; issues limiting analysis of, 186–90; macroestimates of, 137–38; methodology for study of distribution of, 182–86; microestimates of, 137–38; reconciling aggregate income and, 222–23; specific model of, 120–24; top 1 percent and, 197–99; trends in distribution of, 181–82; underreporting in surveys of, 223. *See also* Income
- Household liabilities, 265–70
- Household production, 5–6; illustrative cross-country comparison of full consumption, 105–12; model of, 92–105
- Household's dynamic budget constraint, 118–199; existing data sources and, 126–29; implications of, for measuring consumption and saving, 124–26; strategies, 129–32
- Household spending: models for, 116–17; questions about, and existing data sources, 6–7
- Household surveys, underreporting of, 223
- Household types, 162–63; disposable household income by, 167, 168–69t
- Human capital, 461–62, 487–89t, 493–96; accounts, 12; application of, to measure output of education sector, 481–84; approaches to, 462–65; approaches to measuring, 496–507; cost-based approach, 462, 497; defined, 493–94; direct approach for measuring, 497–98; discount and income growth rates for measuring, 470–74; estimated value of, 13; future research suggestions for, 484–86; income-based approach, 462–63, 465, 470, 497; indicators approach, 462, 497–98; indicators measuring stock of, 12–13; indirect approach for measuring, 496–97; Jorgensen-Fraumeni approach to measuring, 470; measuring, for international and intertemporal comparisons, 12–13; measuring national investments in, 29–30; measuring total stock of, 496–507; OECD's project to measure national investments in, 29; recent efforts in measuring, 462–65; smoothing and imputation of, 474–78; updated measures for United States, 466–70; valuation of nonmarket time of, 478–81; volume measures of, 13
- Human capital volumes, 504–7
- Human Development Index (United Nations), 39
- IMAs. *See* Integrated macroeconomic accounts
- Income: adjustments for “real” and equivalent, 221–22; comparison of concepts, 218–21, 219t; data and results, 224–33; distribution of consumption and, an application, 235–36; Haig-Simons equation of, 217, 220; integration of micro- and macromeasures of, 143–56; Katz categories included in adjusted personal, 220t; macromeasures of, 140–41; measuring, 215–23; micromeasures of, 140; money, CPS measure of, 218; “more complete income” concept, 220–21; personal, defined, 218; reconciling household income and aggregate, 222–23; retirement, 218–20; sources of, 163, 167–69, 170–72t; underreporting in household surveys of, 223. *See also* Household income
- Income-based approach, for measuring human capital, 497
- Income distribution, 216
- Income inequality, 8, 197–99; effect of tax and transfer system on, 199–209;

- federal taxes and, 203–9; government transfer payments and, 200–203; growth and, 216; literature on measurement of, 71; measure of, defined, 43–44
- Income integration: definitions, 143–46; matches and indicators, 150–56; scope adjustments, 146–50
- Income quintiles, 162, 163–67, 164–65t, 237–40
- Indicators-based approach, for measuring human capital, 497–98
- Individual welfare: implementing measures of, 53–59; measuring, 46–48; money measures of, 48–53. *See also* Social welfare
