RELATION OF THE DIRECTORS TO THE WORK AND PUBLICATIONS OF THE NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions, and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this reservation shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

*(Resolution adopted October 25, 1926
and revised February 6, 1933 and February 24, 1941)*

This monograph is part of a larger investigation of trends and prospects in capital formation and financing made possible by a grant from the Life Insurance Association of America.

ACKNOWLEDGMENTS

PART I is essentially a combining of the materials first published in National Bureau Occasional Papers 41 (*Capital and Output Trends in Manufacturing Industries, 1880-1948*) and 45 (*Capital and Output Trends in Mining Industries, 1870-1948*). The material comprising Part II and all three appendixes is published for the first time in this volume. Accordingly we should like to acknowledge the generous assistance given to us in the preparation first of the Occasional Papers and more recently of the monograph.

We are all greatly indebted to Simon Kuznets for posing the general problems dealt with in this volume and for his continuous counsel along the way. At one stage or another helpful critical comments were gratefully received from Moses Abramovitz, Harold Barger, Solomon Fabricant, Michael Gort, Raymond Goldsmith, Millard Hastay, Geoffrey Moore, Anna J. Schwartz, Eli Shapiro, George Stigler, Alvin Tostlebe, and Melville J. Ulmer, all of the National Bureau Staff, and from Bureau Directors Harold Halcrow, Frank W. Fetter, and Oswald W. Knauth. To others outside the National Bureau, we are also obligated for assistance: to those who made unpublished data available—the Internal Revenue Service, in particular Mr. E. J. Enquist, Jr., and Raymond C. Peacock; Stanley S. Schor, University of Pennsylvania—and to those who graciously permitted us to benefit from their experience in related studies: Frederick J. Moore, Sidney Sonenblum, and W. H. Young of the Bureau of Mines, Arnold C. Harberger when he was engaged on the President's Materials Policy Commission, and Lawrence Bridge of the Office of Business Economics.

Special thanks are due the members of the National Bureau Advisory Committee of the American Institute of Certified Public Accountants. Among them were Messrs. C. W. Bastable, Percival F. Brundage, Albert E. Hunter, J. J. Kesselman, C. H. Martin, Maurice E. Peloubet, A. C. Tietjen, Hassel Tippit, and Edward B. Wilcox, who broadened our understanding of the nature of the changes in accounting practices in the valuation of assets. We are also grateful for the general guidance and review performed by the Advisory Committee on the Study of Capital Formation and Financing. Members of the Committee were Leo Wolman, chairman; Sherwin C. Badger, Donald R. Belcher, Claude L. Benner, Percival F. Brundage, Arthur F. Burns, W. Braddock Hickman, Edgar M. Hoover, Delong H. Monahan, and Geoffrey H. Moore.

There are still other debts: to those who diligently performed the tedious and lengthy transcriptions from the volumes of the *Census of Manufactures*—Madeline Edelstein, Martin Segal, and Ibson Wu; to

those who processed the statistical data with skill, patience, and imagination—Martin Bernstein, Nancy Byrne, and John Myers; to Elizabeth Jenks, whose critical reading of various drafts has rescued us from committing innumerable errors; and to those who prepared the volume for the printer—Ester Moskowitz for her editing and H. Irving Forman for his charts. To all, our sincere thanks.
