

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Improving the Measurement of Consumer Expenditures

Volume Author/Editor: Christopher D. Carroll, Thomas F. Crossley, and John Sabelhaus, editors

Series: Studies in Income and Wealth, volume 74

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-12665-X, 978-0-226-12665-4

Volume URL: <http://www.nber.org/books/carr11-1>

Conference Date: December 2-3, 2011

Publication Date: May 2015

Chapter Title: List of contributors, indexes

Chapter Author(s): Christopher D. Carroll, Thomas F. Crossley, John Sabelhaus

Chapter URL: <http://www.nber.org/chapters/c13884>

Chapter pages in book: (p. 493 – 504)

Subject Index

- Active saving, 403–9
- Aggregate coverage rates: within expenditure categories, 280–83; international comparison of, 270–71; reasons for declining, 272–80
- Aggregate spending: CE Survey and, 241–45; reasons for low levels of, in CE Survey, 256–59
- American Life Panel (ALP), 350; eliciting total household spending and, 370–71; financial crisis surveys, 368–69; indicators of data quality of, 371–77; overview, 367; spending trends, 377–81
- Australia, 265–66
- Balance edit approach, 42, 371; design objectives, 348–49; future research priorities, 363–64; gaps in existing research, 351; introduction, 347–48; prior research, 349–51; study design and procedure, 351–54; study discussion, 362; study limitations, 362–63; study objectives, 348–49; study results, 354–62
- Bracketed questions, 32; follow-up, 32
- British Social Attitudes Survey, 33–34
- CAMS. *See* Consumption and Activities Mail Survey (CAMS)
- Canada, 263–64, 266–67, 349–50
- Canadian Food Expenditure Survey, 29–30
- Canadian National Budget Survey, 29
- Canadian survey, 42
- Cash-flow reconciliation, 371. *See also* Balance edit approach
- CentER panel (the Netherlands), 34
- CE Survey. *See* Consumer Expenditure (CE) Survey
- Closed-response formats, 31–33
- Collection strategies, survey design and, 26–31
- Computer-assisted personal interviews (CAPI), 26; reliability and, 41
- Consumer Expenditure (CE) Survey, 2, 23, 268–69, 365; about, 207–8; aggregate spending in, 241–45; benefits of panel data, 77–84; CAMS vs., 395–96; comparisons to National Income Accounts, 211–21; Consumer Price Index and, 54–55; coverages differences of, vs. PCE, 189–90; data, introduction to, 53–54; data validity of, introduction to, 204–7; definition differences of, vs. PCE, 190–94; distinguishing features of, 75–77; durables in, 221–24; early comparisons, 208–11; evaluation of existing, 7–11; future research suggestions, 71–72; goals for redesign of, 4–7; implications for uses of current, for redesigning, 233–36; income distribution data in, vs. other data sources, 245–47; international comparison of, 269–70; measurement differences of, vs. PCE, 194–95; for modeling household demand, 141–44; nondurable expenditures and, 120–23; panel data and

- Consumer Expenditure (CE) Survey (*cont.*)
 research, 84–95; panels, 76; precision and frequency of reported purchases in, 224–32; reasons for low levels of aggregate spending in, 256–59; reasons for underrepresentation of highest income households, 247–56; redesign goals for, 23–24; relationship of PCE data and, 181–89; representativeness of, 232–33; for studying income inequality, 100–101, 109–12; synthetic panel data vs. true panel data, 95–96; use of, for studying inequality, 109–12; use of incentives, 41. *See also* Household expenditures; Joint CE-to-PCE concordance; Personal consumption expenditures (PCE)
- Consumer Price Index (CPI), 58n9; Consumer Expenditure data and, 54–55; entry level items and, 58; hybrid index design and, 55–56; methodologies, 58–63; previous comparisons, 56–58
- Consumption: after-tax income and, 390; income inequality vs., 104–5
- Consumption and Activities Mail Survey (CAMS), 39, 366, 393–95; vs. Consumer Expenditure (CE) Survey, 395–96
- Consumption inequality, 120–23; income inequality and, 123–31. *See also* Income inequality; Leisure inequality
- Consumption surveys, 308–9
- CPI. *See* Consumer Price Index (CPI)
- Cross-sectional surveys, 83
- Danish Family Expenditure Survey, 289, 294
- Demand. *See* Household demand
- Demand systems, 154–69
- Denmark: accuracy of survey day, 292–93; administrative register data, introduction, 289–91; income data, 297–304; matching administrative register data with survey data, 291–92; suggestions for future work for survey data, 304–6; total expenditure data, 294–96
- Dependent interviewing, 78n7
- Diaries, design of, 33
- Diary methods: disadvantages of, 28–29; recall methods vs., 29–30
- Durables, in CE Survey, 221–24
- Engel curves, 159
- Entry level items (ELIs), 58–59, 58n9, 59n11, 59n12
- Expenditure categories: desegregation of, 33–35; prediction of, 35–36; survey design and, 33–35
- Expenditure data: future research priorities for collection/analysis of, 42–46; recall vs. diary strategies for collection of, 26–27
- Expenditure survey methodologies, 265–66
- Expenditure surveys, design of, 24–42; approaches to reduce/correct response errors, 41–42; data collection strategies, 26–31; defining response units, 36–38; expenditure categories, 34–35; predicting aggregates, 35–36; reference periods, 38–40; response formats, 31–33; role of incentives, 40–41; survey modes, 24–26. *See also* Consumer Expenditure (CE) Survey
- Family Expenditure Survey (United Kingdom), 142
- Follow-up bracketed questions, 32
- Gemini Project, 24, 24n1, 263
- Health and Retirement Study (HRS), 389, 392–96
- HES. *See* Household Expenditure Survey (HES, Australia)
- Home scanner data approach, for data collection, 27. *See also* In-home scanners
- Household demand: data and sample for, 149–54; demand systems, 154–69; modeling, 144–49; using CE Survey for modeling, 141–44
- Household expenditures, 1–2; about, 23–24; alternative approaches to data collection for, 11–20; current knowledge of, 3–4; personal expenditures vs., 36–38; survey design for, 24–42. *See also* American Life Panel (ALP); Consumer Expenditure (CE) Survey
- Household Expenditure Survey (HES, Australia), 265–66
- Household expenditure survey data, international comparison of, 263–64. *See also specific countries*
- Household savings: challenges in empirical analysis of, 389–90; data, 392–96; introduction, 388–89; study results, 403–9; theoretical background, 391–92
- HRS. *See* Health and Retirement Study (HRS)

- Hybrid index design, Consumer Price Index and, 55–56
- Incentives, role of, in survey design, 40–41
- Income inequality: consumption inequality and, 123–31; consumption vs., 104–5; dimensions of, 106–7, 131–34; evolution of, 115–20; introduction, 101–4; measurement error and, 107–9; measures of, 105–6; use of CE Survey for studying, 100–101; use of PSID for studying, 112–14. *See also* Consumption inequality; Leisure inequality
- Index methodologies, 58–63
- India, 39
- Inequality. *See* Consumption inequality; Income inequality; Leisure inequality
- “Infrequency of purchase” problem, 83
- In-home scanners, 83; comparing data from, to other expenditure data, 449–74; data for study of, 443–46; prior research, 446–49; surveys with, introduction, 441–43; using data for prediction, 474–80
- Internet surveys. *See* American Life Panel (ALP)
- Item representation, 63–67
- Joint CE-to-PCE concordance: described, 196–200; future directions for, 200–201; motivation, 195–96
- Kantar, 444–46
- Leisure inequality, time-use surveys for studying, 114–15, 134–38. *See also* Consumption inequality; Income inequality
- Living Costs and Food Survey (LCFS, United Kingdom), 267–68, 422, 443–44
- Longitudinal Individual Data (LINDA, Sweden), 311, 333
- Mail-mode designs, 26
- Measurement error, 45–46; accounting for, in income inequality, 107–9; in consumption data, 309
- Mixed data collection methods, 31
- Mixed-mode designs, 26, 31
- National Income Accounts: comparisons of CE Survey data to, 211–21
- National Income and Product Accounts, 241
- National Sample Survey Organization (NSSO, India), 39
- Netherlands, 34
- Nondurable expenditures, CE Survey and, 120–23
- Nonsampling error, 78–79
- Omnibus survey (Office for National Statistics, United Kingdom), 33–34
- Open-ended response formats, 31–33
- Panel data: accuracy of expenditure measurement and, 77–81; measurement of standard of living and, 81–84; research and, 84–95; synthetic vs. true, 95–96; wealth change in, 389–90
- Panel Study of Income Dynamics (PSID), 35, 112–14, 365
- Panel surveys, benefits of, 76–77
- Paper questionnaires, 24–25
- PCE. *See* Personal consumption expenditures (PCE)
- “Permanent income hypothesis” (Friedman), 81–82
- Personal consumption expenditures (PCE), 65; coverage differences of, vs. CE Survey, 189–90; definition differences of, vs. CE Survey, 190–94; future research suggestions, 71–72; index levels and change, 67–71; item representation, 63–67; measurement differences of, vs. CE Survey, 194–95; relationship of PCE data and, 181–89. *See also* Consumer Expenditure (CE) Survey; Joint CE-to-PCE concordance
- Personal expenditures: household expenditures vs., 36–38
- Personal interviews, 24; confidentiality and, 25
- Questionnaires: paper, 24–25; self-administered, 24–25
- Questions, survey: data set for study of, 417–18; descriptive statistics of study results, 423–26; experiment design for study of, 418–23; introduction, 414–17; regression analysis of study results, 426–38
- Recall methods: diary methods vs., 29–30; disadvantages of, 27–28

- Recall periods, 38–39
- Reference periods, survey design and, 38–40
- Registry-based consumption: constructing, 312–13; constructing, details, 339–42; details, 333–39; external validation, car transactions, 328–31; properties, 313–28; sampling restrictions, 342–44
- Reliability, approaches to improve, in survey design, 41–42
- Research, panel data and, 84–95
- Respondents, choosing, 36–38
- Response formats, survey design and: open-ended vs. closed-response, 31–33
- Response units, defining, 36–38
- Sampling error, 80–81
- Savings. *See* Household savings
- Scanners, in-home. *See* In-home scanners
- Self-administered questionnaires, 24–25
- Specific past recall periods, defining, 422–23
- Stiglitz-Sen-Fitoussi commission, 1
- Survey costs, 44–45
- Survey design: approaches to improve reliability, 41–42; collection strategies, 26–31; expenditure categories, 33–34; measuring household vs. personal expenditures and, 36–38; modes of, 24–26; prediction and, 35–36; reference periods for, 38–40; response formats, 31–33; role of incentives in, 40–41
- Survey modes: effect of, in household surveys, 25–26; survey design and, 24–26
- Survey of Consumer Payment Choice (SCPC), 414–15
- Survey of Health, Ageing and Retirement in Europe (SHARE), 365–66
- Survey of Household Spending (SHS, Canada), 263–64, 266–67, 349–50
- Sweden: constructing registry-based consumption for, 312–13; data set for, 311–12; properties of registry-based consumption in, 313–28
- Synthetic panel data, 95–96; wealth change in, 390
- Telephone interviews, 24
- Time frames, recall, 415–17; descriptive statistics results, 423–26; experiment, 418–23; regression analysis results, 426–38; sample for experiment, 417–18
- Time-use surveys, for studying leisure inequality, 114–15, 134–38
- Unfolding brackets, 32
- United Kingdom, 267–68
- Wealth changes, 389–90; data, 392–96; results, 397–403; study conclusions, 410–13; theoretical background, 391–92
- Wealth paths, 409–10
- Web-survey modes, 26
