Asset and Health Dynamics among the Oldest Old (AHEAD), 52n5
Average Indexed Monthly Earnings (AIME), 47

Belgium, 179–80; convention early retirement (CER) program, 190; empirical approach to study of retirement decisions, 187–96; implications of results of study, 201–7; measurement of health status for, 188–89; option value calculations, 193–96; pathways to retirement in, 179, 189–93; results of study, 196–201; role of disability insurance in, 180–86; simulations of results, 202–7

“Boxed economy” proposition, 2

Britain. See United Kingdom (UK)

Canada: background on retirement and disability policy in, 138–44; Canada and Quebec Pension Plans (C/QPP), 138–44; data for study effect of disability benefit program on retirement decisions in, 144; health index for, 145–47; Old Age Security (OAS) program, 138–39; option value calculations, 147–56; pathways to retirement in, 137–38, 145; results of study of, 156–73; simulations of study, 173–75; system for disability benefits in, 138

Canada and Quebec Pension Plans (C/QPP), 138–45
Continuing disability reviews (CDRs), 48

Defined benefit (DB) pensions, 54

Denmark: background on disability insurance in, 333–45; empirical approach to study, 345–51; health index for, 347–48; implications of study results, 361–66; introduction to disability insurance and retirement in, 331–33; model fit, 360–61; option value calculations for, 348–51; pathways to retirement in, 345–47; results of study, 351–60

Disability benefits: effect of, on retirement decisions in Canada, 144; in United Kingdom, 90–96

Disability insurance: in Belgium, 180–86; in Canada, 138–44; in Denmark, 331–45; in France, 251–54; in Germany, 297–302; in Italy, 416–17; in Japan, 498–507; in the Netherlands, 211–22; in Spain, 455–57, 462–66, 468–73; in Sweden, 369–70, 373–75; in United Kingdom, 90–95; in United States, 45–66. See also United States (US) Disability Insurance (DI) program
Disability insurance (DI) benefits, 7–9; changes in percent of men on, 8t; proportion of men sixty to sixty-four receiving, in 2009, by country, 4–5, 4f; share of population receiving, across countries, 4–5

Disability insurance (DI) participation: education and, 14, 14f; by education and health, 10f, 14–16; health and, 13–14; trends in, by country, 5–10, 6–7f; trends in, vs. trends in employment, 10–13, 11–12f, 13f; trends in, vs. trends in health, 9–10

Disability insurance (DI) programs, 1

Education, DI participation and, 10f, 14, 14f

Employment: by health and by education, 16–17, 18–19f; trends in, vs. trends in DI, 10–13; youth, 2–3

English Longitudinal Study of Aging (ELSA), 17, 20, 41, 99, 101

Estimation, 20–31, 41–42

France: development of pension system in, 254–56; empirical approach to study, 256–58; employment data, 268–69; health measurements for, 268; introduction to retirement and disability in, 251–54; option values computations, 264–68; pathways to retirement, 258–63; results of study of retirement, 269–78; simulations of results, 278–82

Germany: benefit formula for pensions in, 291–93; data sources, 293–95; disability insurance participation trends for, 297–302; effect of financial incentives by education level, 317–18; effect of financial incentives by health status, 316–17; effect of health on retirement, 315–17; effect of retirement incentives, 312–15; empirical approach to study, 302–3; history of pension system in, 289–91; implications of study results, 318–24; introduction to retirement decisions in, 285–89; measuring health for, 295–97; model fit, 319; option value calculations for, 305–11; pathways to retirement in, 303–5; relationship between OVs and retirement, 319–21; results of study, 311–18; simulation of pension reform, 321–24; unemployment benefits at older ages in, 293

Great Britain. See United Kingdom (UK)

Health: DI participation and, 10f, 13–14; disability insurance participation and, 10f, 13–16; measuring, 17–20; trends in, vs. trends in DI, 9–10; US Disability Insurance (DI) program and, 56–57

Health and Retirement Study (HRS), US, 41, 52

Health index, PVW (Poterba, Venti, and Wise), 17–19

Health measurements: for Belgium, 188–89; for Canada, 145–47; for Denmark, 347–48; for France, 268; for Germany, 295–97; for Italy, 434–36; for Japan, 515; for the Netherlands, 228

Inclusive OV (option value), 25, 46–47, 308–11

International Social Security (ISS) project, 1–4

Italy: data construction for study, 436–44; disability insurance in, 416–17; empirical approach to study, 431–36; employment and disability rates in, 423–29; employment rates by health and education in, 429–31; health measurements, 434–36; introduction to disability insurance and retirement behavior in, 411–13; model of it, 445–50; pathways to retirement in, 431–34; recent trends in program participation, 417–19; simulations of results, 444–52; social security system in, 413–16; take-up of disability insurance benefits in, 419–23

Japan: changes in disability program participation over time in, 501–3; counterfactual simulation analysis for, 527–28; current scheme in, 501; data source and sample for study of, 507–8; disability program participation by individual characteristics in, 503–7; earnings and pension benefits, 510–12; empirical model, 508; hazard rate for OV model, 522–25; health measurements, 515; history of social security and disability program in, 498–501; introduction to retirement decisions and health status in, 497–98; model fit, 522–27; option
value calculations for, 508–9, 512–15; overview of social security programs in, 530–32; pathways to retirement in, 509–10; results of study, 515–22

Japan Study of Aging and Retirement (JSTAR), 17, 41, 498, 503–4

Jobseeker’s Allowance (JSA), UK, 96

Labor force participation, 1–2

Mortality, decline in, at age sixty-five, by country, 9, 9f

Netherlands, the: disability insurance participation by level of education and gender in, 214–22; empirical approach to study, 222–32; health index for, 228; health shocks and exiting labor force, 245–46; implications of results for, 240–45; introduction to health, disability insurance, and labor force exit of older workers in, 211–12; model fit for, 237–40; option value calculations, 228–32; pathways to retirement in, 223–28; results of study, 232–37; trends in disability insurance participation and program reforms in, 212–14

Normal retirement age (NRA), 47–48

Old Age Security (OAS) program (Canada), 138–39

Option value (OV), 43, 46; by age, by country, 25–26, 26–27f; effect of inclusive, on probability of retirement, 28; estimated effect of inclusive, 25–26; as forward-looking measure, 54–56; incentive measure, 43; inclusive, 25, 46–47

Option value (OV) model, 24, 26–27f, 98–99

Option value calculations: for Belgium, 193–96; for Canada, 147–56; for Denmark, 348–51; for France, 264–68; for Germany, 305–11; for Japan, 508–9, 512–15; for the Netherlands, 228–32; for Spain, 475–77; for Sweden, 382–86; for United States, 54–56

Pathways to retirement, 25; in Belgium, 179, 189–93; in Canada, 137–38, 145; in Denmark, 345–47; in France, 258–63; in Germany, 303–5; in Italy, 431–34; in Japan, 509–10; in the Netherlands, 223–28; in Spain, 473–75, 477–79; in Sweden, 375–82; in United Kingdom, 103–4; in United States, 53–54. See also Retirement

Primary insurance amount (PIA), 47

Private pension systems, in United Kingdom, 88–90

PVW (Poterba, Venti, and Wise) health index, 17–20

Retirement: estimated effect of inclusive OV on, 25–26, 28, 29t; incentive to delay, 23–25; multiple pathways to, 25–27; US pathways to, 53–54. See also Pathways to retirement

Simulations, of results, 31–40, 42; for Belgium, 202–7; for Canada, 173–75; for France, 278–82; for Germany, 321–24; for Italy, 444–52; for Japan, 527–28; for United Kingdom, 122–24; for United States, 73–78

Social security accrual, 23–24

Social security wealth (SSW), 23–24

Spain: disability insurance in, 462–66; empirical approach to study, 473–82; health measurements, 479–82; introduction to disability insurance and retirement in, 455–57; old-age pensions in, 466; option value calculations for, 475–77; pathways to retirement in, 473–75, 477–79; reforms of disability system in, 468–73; results of study, 482–92; trends in employment and participation in social security systems in, 457–62; unemployment insurance in, 467

Survey of Consumer Finances (SCF; Canada), 150

Survey of Health, Ageing and Retirement in Europe (SHARE), 17–19, 41, 180, 294–95

Survey of Labour and Income Dynamics (SLID; Canada), 144–50

Sweden: data for study, 380–81; descriptive results of study, 397–98; development of disability rates and employment in, 374–75; disability insurance system in, 373–74; health measurements, 382; implications of changes in disability insurance eligibility screening in, 398–401; income tax system, 407–8; introduction to disability insurance and
Sweden (cont.)
retirement in, 369–70; means-tested benefits, 408–9; model fit, 396–97; occupational pension plans in, 374, 402–6; old-age pension system in, 370–73; option value calculations for, 382–86; pathways to retirement in, 381–82; results of study, 386–96; social insurance pathway to retirement in, 375–80

Unemployment insurance (UI) benefits, US, 53n7

United Kingdom (UK): constructing option values for study of retirement in, 104–14; data used for study of retirement in, 99–103; defining option values for retirement, 98–99; disability benefits in, 90–95; disability system reforms in, 1948 to present day, 91; effect of disability benefits on incentives to work or retire in, 95–96; effect of state pensions on incentives to work or retire in, 87–88; employment rates for older workers in, 81–86, 82f, 83f, 84f; institutional factors affecting employment rates of older people in, 96–97; Job- seeker’s Allowance (JSA), 96; pathways to retirement in, 103–4; private pension system in, 88–90; results of study of retirement in, 114–22; simulating alternative disability insurance programs for, 122–24; state pension system in, 86–87

United States (US): pathways to retirement in, 53–54; unemployment insurance (UI) benefits in, 53n7

United States (US) Disability Insurance (DI) program, 45–47; application process, 48; data for, 52–53; descriptive analysis of incentive measures in, 63–66; descriptive analysis of participation rates in, 57–62, 58f, 59f, 60f; differences between SS program and, 49; effect of, on labor force withdrawal or retirement, 46; findings about, 47; growth of, 45; health status and, 56–57; institutional features of, 47–49; literature review, 49–52; option value calculations, 54–56; as pathway to retirement, 53–54; regression results for, 66–73; screening process, 48–49; simulations of, 73–78; trends, 45–46

United States (US) Social Security (SS) program, 47; differences between DI program and, 49

Youth employment, 2–3
