RELATION OF THE DIRECTORS TO THE WORK AND PUBLICATIONS OF THE NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions, and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

*(Resolution adopted October 25, 1926,
as revised February 6, 1933, and February 24, 1941)*

15. Outstanding Credit Held by Sales and Consumer Finance Companies and Direct Paper Outstanding, January 1953-December 1961	78

Acknowledgments

Like all research undertakings of the National Bureau of Economic Research, this study is the result of cooperative efforts involving the contributions of many people. I am particularly indebted to John M. Chapman of Columbia University, who was instrumental in initiating the project and who opened many doors for me in my search for data. Professor Chapman read several drafts of this report and made a number of useful suggestions.

I am also grateful to Geoffrey H. Moore and Robert P. Shay, of the National Bureau, for their generous assistance. Other members of the National Bureau staff who reviewed earlier drafts and made thoughtful suggestions were Raymond W. Goldsmith, Reuben Kessel, and Anna J. Schwartz. My thanks also go to the reading committee of the Board of Directors, comprised of Lester V. Chandler, Melvin G. de Chazeau, and Murray Shields.

Members of the Advisory Committee of the Consumer Credit Study who assisted in the planning and revising of earlier drafts are Paul W. McCracken, Chairman, University of Michigan; Gordon E. Areen, Associates Investment Company; Frank Barsalou, Pacific Finance Company; Dorothy S. Brady, University of Pennsylvania; John M. Chapman, Columbia University; Mona Dingle, Division of Research and Statistics, Board of Governors of the Federal Reserve System; Bertrand Fox, Harvard University; Raymond W. Goldsmith, Yale University; Robert E. Lewis, First National City Bank of New York; Roger F. Murray, National Bureau of Economic Research; Roland I. Robinson, Michigan State University; Herbert Stein, Committee for Economic Development; Van Buren Thorne, Jr., General Motors Acceptance Corporation; and William L. Wilson, C.I.T. Financial Corporation. Others who formerly served on the Advisory Committee are George Dimmler, George W. Omacht, Sidney E. Rolfe, and LeRoy A. Weller.

Mention must also be made of the many financial institutions that

Acknowledgments

have provided information about their operations in the commercial paper market. These include several large finance-company borrowers of commercial paper funds: Associates Investment Company, C.I.T. Financial Corporation, Commercial Credit Company, General Electric Credit Corporation, General Finance Corporation, General Motors Acceptance Corporation, Pacific Finance Corporation, Sears Roebuck Acceptance Corporation, Westinghouse Credit Corporation, and Yellow Manufacturing Acceptance Corporation. I have learned a great deal about commercial paper from representatives of five dealer organizations: A. G. Becker & Company, Inc.; Goldman, Sachs & Company; Lahey, Fargo & Company; Salomon Brothers & Hutzler; and Weil, Pearson & Company. Another valuable source of information was Allen Rogers, Manager of the Bank Service Division of the National Credit Office.

Statistical assistance was performed capably by Vivian Reich and Florence Liang, of the National Bureau. Ester Moskowitz and Marie-Christine Culbert provided editorial assistance, and H. Irving Forman drew the charts.

This report is part of a broad study of consumer credit being conducted by the National Bureau, made possible by research grants from Associates Investment Company, C.I.T. Financial Corporation, General Motors Acceptance Corporation, and Pacific Finance Corporation. Needless to say, these firms are not to be held responsible for any of the statements made or views expressed in this report.
