How to Obtain
National Bureau Publications

The National Bureau of Economic Research is a nonprofit membership corporation organized to make impartial studies in economic science.

Its books are published and distributed (since April 1, 1953) by Princeton University Press; its Occasional Papers and Technical Papers are published and distributed by the National Bureau itself.

Publications may be obtained either on contributing subscriptions or by purchase.

A contributor of $25 or more a year is entitled to receive a complimentary copy of each current publication — books, Occasional Papers, Technical Papers, and the Annual Report — in advance of release to the public and, in addition, is entitled to a one-third discount on all National Bureau publications purchased.

An associate contributor of $10 a year receives a complimentary copy of each Occasional Paper, Technical Paper, and the Annual Report, and is entitled to a one-third discount on all publications purchased. Only the following are eligible to become associates; teachers, students, and libraries in recognized educational institutions; members of scientific societies or of private nonprofit research agencies.

A contributor of $4 receives the next five Occasional Papers (or, if desired, any Technical Paper issued during this period may be substituted) and the Annual Report.

Contributions to the National Bureau are deductible in calculating federal income taxes.

Non-contributors should send orders for books to:

Princeton University Press
Princeton, New Jersey

Non-contributors should send orders for Papers and requests for the Annual Report directly to:

National Bureau of Economic Research, Inc.
261 Madison Avenue
New York 16, N. Y.

Contributors should send all orders for books and Papers, and requests for the Annual Report directly to:
