

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: The Allocation of Time and Goods over the Life Cycle

Volume Author/Editor: Gilbert Ghez and Gary S. Becker

Volume Publisher: NBER

Volume ISBN: 0-870-14514-2

Volume URL: <http://www.nber.org/books/ghez75-1>

Publication Date: 1975

Chapter Title: Index to "The Allocation of Time and Goods over the Life Cycle"

Chapter Author: Gilbert Ghez, Gary S. Becker

Chapter URL: <http://www.nber.org/chapters/c4583>

Chapter pages in book: (p. 147 - 150)

Index

- Absolute income hypothesis, 75
Age: and allocation of time and goods, 13, 135, 138-139; and consumption, 8, 11, 57-58, 60, 61-73, 76; consumption time and, 97-99, 101-102, 104-105, 106-109; hours worked and, 112-115, 122-125; of household head, 53; and nonmarket efficiency, 18; and post-school training, 117-120; and production of human capital, 24-27
Age-earnings profiles, 84
Aitchison, J., 79n
Ando, Albert, 17n, 65n
Annual earnings. *See* Earnings, family; Wage rates
Arithmetic mean, 79
Asset management, 29, 31
Assets, initial, 4
Automobile operation cost, 55
- Becker, Gary S., 1n, 3n, 4n, 21n, 31n, 35n, 52n, 61n, 72n, 77, 83n, 84n, 109
Ben-Porath, Yoram, 31n
Ben-Zion, Uri, 31n
Bodkin, Ronald, 64n
Brown, J. A. C., 79n
Brumberg, Richard, 17n
Budget constraint, 4, 21, 32, 38
Bureau of Labor Statistics:
 Expenditures on Current Consumption, 62-63; *Survey of Consumer Expenditures*, 53
- Capital accumulation, 31
Children, 35. *See also* Family size
Commodities, defined, 2, 36
Consumption, 6, 17-18; and age, 5, 8, 11; growth, 144; male, 135-136; planning over time, 1; and time preference, 8-14; unemployment and, 142-143; and wage rate, 10-15, 36
Consumption, household, 32-33, 52; and age of head, 57-60, 66-73; determinants, summary, 76-77; and earnings patterns, 57-67, 76; and education of head, 54, 58-61; effects of family size, 65; expectations model, 46-51; measures, 53-57; regressions, 61-75; substitution in, 8-15, 48-51; and wage rates of earners, 46-47; wealth effects, 49-52
Consumption time, 5, 10-15, 22; inversely related to wage rate, 36; male, and wage rate and age, 135-136; measurement, 93-95; in multi-earner household, 32-33; nonwhite men, regressions, 103-110; personal care as portion, 94-95, 141; and production of human capital, 24-25, 26-27; white men, regressions, 95-102, 103, 106-107; working time comparisons, 110-115
Cost minimization conditions, 5-6, 39
Credit ceilings, 66
Cross-sectional data, 47, 51, 133
Cyclical changes, 141-143
- Decision unit, 2
Demand: and age, 46-47; for goods and time, 6-8, 12-18, 33-34
Durbin-Watson statistic, 66, 121

- Earnings, family, 52, 56–59, 61–64, 67–75, 93, 118–119; and consumption, 136–141; male consumption time and, 97–99; nonwage income, 69–75, 98–99, 102, 104–105, 106–108; as price of time, 80–82; variables used, 130–131
- Earnings, male: Census data, 83–92; and family earnings, 56; hours worked and, 112–115, 122–129; profiles, 84
- Educational goods, 19–22, 23
- Educational level, 53–54, 58–63, 67–70, 73–74; and consumption time, 96, 98–99, 104–108, 136, 138–139; and earnings, 109, 116–117; hours and earnings by, 84–92; and hours worked, 112–115, 122–129
- Efficiency, 29–31, 51–52, 135
- Ehrlich, Isaac, 31n
- Eisner, Robert, 75n
- Equilibrium conditions, 1–6, 10, 28–29, 39
- Evans, Michael K., 75n
- Expectations, 47; model, 48–51
- Expenditures on Current Consumption*, 62–63
- Experience, 67, 117–120
- Factor shares, 48, 77–78
- Family size, 34–35, 61–68, 72–74, 76, 96, 98–99, 101, 104–109, 118–119, 137, 139–140
- Fisherian theory, 1, 16
- Friedman, Milton, 64n, 66n, 75n
- Full wealth, 32, 38, 49, 144–145; defined, 4, 21
- Future. See Time preference
- Ghez, Gilbert R., 1n, 2n, 14n, 26n, 28n, 46n, 48n, 72n
- Gifts, 56
- Goods, 2–4, 144–146; demand, 6–8, 12–18; durable, 48n, 55–56, 62; educational, 19–23; nondurable, 2; substitution for home time, 48–49. See also Consumption, household
- Gorman, William, 9n
- Grossman, Michael, 18n, 94n, 142n, 143n
- Heckman, James, 67n
- Home time, 10–13, 30–31, 36, 48–49, 77
- Hours worked, 12, 37, 80; consumption time comparisons, 110; and hourly earnings, 83–92, 110–115, 116–117; and production of human capital, 24–29, 93–94; "unexplained" time, 84; variables used, 130–131; and weeks worked, 120, 122–125
- Households: commodity output, 2, 36; cross-sectional data, 51–52; family size and productivity, 47; operation, 142; productivity, 51–52; productivity measures, 57; real wealth, 51; technology, 10, 17. See also Consumption, household; Production, household
- Housing costs, 55, 62
- Houthakker, Hendrik H., 75n
- Human capital: depreciation, 24–26; investment in, 29–31, 93–94; investment time, 24–25, 36–37; marginal cost, 22–29; production of, 2, 19, 22–30, 36–37, 42–45; rate of obsolescence, 25n; stock of, 19–20, 23–25
- Husband, in multi-earner household, 32–34, 35; unemployment of, 142; wage rate of, 56, 133–134
- Income stream, 57
- Income tax, 56n
- Interest rate, 4, 10, 14, 15–16, 33,

- 36, 47, 52, 64, 66-67, 135; by age of family head, 57; effects of, 37-41
- Klein, Lawrence, 62n
- Lamale, Helen H., 53n
- Lancaster, Kelvin, 3n
- Landsberger, Michael, 66n
- Lazear, Edward P., 28n
- Leibowitz, Arleen, 101n
- Leisure, 143
- Life cycle productivity, 6-14
- Life history data, 47
- McFadden, Daniel, 49n
- Malinvaud, E., 100n
- Men: nonmarket time of, 145-146; nonwhite, 83-85, 89-92, 103-109, 114-116, 119, 124-125, 128-129; white, 83-88, 96-102, 106-109, 112-113, 116, 118, 122-123, 126-127; white-nonwhite comparisons, 103, 106-109, 116, 118-119, 129. See *also* Husband, in multi-earner household
- Michael, Robert T., 3n, 18n, 28n
- Mincer, Jacob, 18n, 24n, 35n, 64n, 67n, 94n, 117n
- Modigliani, Franco, 16, 17n, 65n
- Modigliani-Brumberg model, 65
- Morgan, James A., 111n
- Net worth, 71
- Nonwage income. See Earnings, family
- Nonwhites. See Men
- Ofek, Haim, 31n
- Personal care time, 94-95, 110, 141-142
- Prices, 4-8, 10
- Production functions, 1-2, 5, 6, 7, 17, 21, 22, 38; for multi-earner household, 32; and stock of human capital, 29
- Production, household, 1-2, 6, 7, 10-11, 32, 52
- Productivity effects: market, 6-15; nonmarket, 17-18, 30-31, 36-37, 41-42, 51-52, 57
- Projector, Dorothy S., 71n
- Property income, 4
- Property insurance, 56
- Razin, Assaf, 31n
- Schooling, 18, 26, 53-54, 67
- Schultz, T. W., 35n
- Seasonal changes, 141-142
- Secular changes, 141-146
- Self-employment income, 56
- Shadow price: consumption, 27; time, 26
- Shadow wage rate, 29
- Smith, James, 56n, 101n, 107n, 108-109, 110n, 117n
- Strotz, Robert H., 38n
- Substitution, 5, 6-9, 33-35, 95; in consumption, 8-15, 17-18, 141-142; in expectations model, 48-51, 67; in production, 6-7, 10-15, 137-146
- Survey of Consumer Expenditures*, 53
- Szalar, A., 95n
- Technological improvement, 17, 18n
- Time, 1-3, 6; price of, 80-82; for production of human capital, 18-26, 36-37; "unexplained," 84. See *also* Consumption time; Home time; Hours worked
- Time constraints, 3-6, 21, 32, 38
- Time preference, 8-14, 15-16, 33, 36, 47, 52, 64, 66-67, 135
- Training, 18, 26, 28, 117-120
- Unemployment, 142-143
- "Unexplained" time, 84

- U.S. Census of 1960, 83
- Utility function: for multiple earners, 32, 38; and production function, 5, 17; restrictions on, 8-10; two-stage formulation, 2-3
- Uzawa, Hirofumo, 48n
- Wage rates, 4, 6, 16, 19, 29; annual earnings as measure, 52; changes in, 22; and consumption, 144; consumption time and, 97-101, 103-107, 109, 121; and full wealth, 49; hours worked and, 110-115, 121, 122-129; and household demand for goods, 46-47; of husband and wife, 32-33, 56; husband's, and family consumption, 133-141; and interest rate, 37-41; male, 1960 Census data, 83; real, 6-7, 23-25, 33; seasonal changes in, 142; variations with age, 10-14, 24-25. *See also* Earnings, family
- Watts, Harold W., 66n
- Wealth. *See* Full wealth
- Whites. *See* Men
- Wife, in multi-earner household, 32-34, 35; steady wage rate of, 56; unemployment of, 142-143; wage rate measures for, 107-109
- Working time. *See* Hours worked
