Ruth P. Mack
Frederick C. Mills
Wesley C. Mitchell
Geoffrey H. Moore
Raymond J. Saulnier
George J. Stigler
Relation of the Directors to the Work and Publications of the National Bureau of Economic Research

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

(Resolution adopted October 25, 1926 and revised February 6, 1933 and February 24, 1941)
## CONTENTS

1 The Statement  
2 Illustrative Interpretations  
3 Relation to Official Reports  
4 Supplements to the Proposed Statement  
5 Conclusion  

### APPENDIX

**Text Tables**

1 United States Federal Government Consolidated Financial Statement  
2 Net Federal Funds Obtained through Financing  
3 Federal Expenditures  
4 Nonfederal Holders of Federal Debt Issues  
5 Estimated Federal Purchases of Gross National Product  

**Appendix Tables**

101 Financial Statement for Federal Government, General Fund  
102 Financial Statement for Unemployment Compensation Fund

104 Financial Statement for Old Age Insurance and Various Civil Service Retirement Funds  
105 Financial Statement for Miscellaneous Federal Funds  

**Charts**

1 Federal General Receipts and Expenditures and Gross National Product, 1936-1939  
2 Federal General Expenditures and Gross National Product, 1939-1942
THE FEDERAL FINANCIAL STATEMENT presented in this Paper is designed to facilitate tracing the impact of fiscal operations on business conditions. As a summary of federal fiscal operations, it is both simpler and more comprehensive than the official monthly statement issued by the Treasury Department. It covers all federal funds except those regarded as local government funds (such as the funds of the District of Columbia) and those regarded as parts of the banking system (such as the Postal Savings Fund).

Changes in established federal financial statements have been proposed by many people and for a variety of reasons. No one form of statement can be expected to serve all purposes; but it is believed that this new form fills an especially urgent need. If issued currently, it would be particularly useful to those concerned with the relation between fiscal policy and business conditions. For this type of use accounting accuracy is not essential. If statistical estimates (rather than exact figures) were employed, it should be possible to prepare such a statement for each quarter from existing accounting records.

This new financial statement is a byproduct of the exploratory study of Money Flows the National Bureau of Economic Research has been conducting at the suggestion of the Committee for Economic Development and with the support of a grant by the Committee. Both that study and the estimates for the federal government discussed here are confined to calendar year figures covering 1936-42. Recent figures would doubtless be more interesting, but the task of assembling them is such as to make it seem desirable to publish the illustrative retrospect figures for these seven calendar years at this time for criticism and comment.

Various persons have aided in the preparation of this Technical Paper. The writer wishes especially to acknowledge the helpful criticism of P. F. Brundage, T. O. Yntema, and George Jaszi, and the assistance of Paul Kohn, Dora Sherman, and Sylvia Levinson.

Federal financial records and reports are necessarily so complex and extensive that it is difficult in an undertaking such as this to be certain that some errors may not have been made in interpretation.
The over-all picture of federal finances presented is therefore tentative. The writer ventures to hope that any errors he has committed have been errors of detail only and that the main outlines of the tentative picture are substantially correct. He assumes sole responsibility for any errors this Technical Paper may contain and will be grateful to have them called to his attention. He assumes also sole responsibility for the views here expressed.
