American Express Company, travelers' checks, 60, 136
no legal reserve requirements against, 60n
question of money characteristics, 60n, 118n, 121
See also Travelers' checks
Andrew, A. Piatt, breakdown of deposits by, 265, 278–279
accuracy of, 279–280, 285
compared with 1909 data, 279–280
Angell, James W., money estimates of, 270–271
compared with ours, 303–309
Assets, nominal value, 2, 89
liquid:
  as definition of money, 126–127
  as joint products, 116–117
  as low capital risk, 133
  as short-dated, 132–134
  as weighted aggregate, 134n
conceptual problems in measuring aggregate, 128–130
double-counting, 134n
nonpecuniary services, 112n, 117n
restrictive vs. comprehensive totals, 132n
substitutability among, 127–128, 180–184
various measures of, 130–132
vs. overdraft facilities, 149
money:
  as demand determined, 123–126
  as limited to debt-discharge, 105–110
  as liquid assets, 126–130
  as noninterest-bearing net wealth, 110–118
  as sum of various components, 92
  as weighted aggregate, 92
  effect on loan market, 118–123
  lack of definite theoretical specification, 90–91, 137–138
  meaning in past usage, 93–102
near-money, 2, 89, 105; relation to money supply, 123n
nonliquid, 2
seven categories of, 148
characteristics of, 149–150
Bank charters:
effect on net worth if number restricted, 110–111
  effect of free entry and interest paid on deposits, 113
Bank notes:
distinction between bank and public holdings, 202–203
regarded as claims to money, 105, 201
treated as form of credit by metallists, 95n
Bank of the United States:
  First, 208, 237
  Second, 208, 235, 237, 241n
Banking School, opposition to bank note limitation, 95
definition of money, 94
Banks, all:
declared, 75, 332
nonreporting, 211–212, 241n, 262–270, 273–274, 359, 370
Banks, commercial:
as financial intermediaries, 111, 124n
as government depositaries, 332–333, 424
as part of public re: time deposit business, 83
as producers of deposits, 111
capital of, 233–234, 237–240
checking deposit controversy, 111, 113
classes of, 75, 317–318
clearinghouse, data for, used in interpolation, 79, 370, 377–378, 481–485, 590
defined, 75, 332
member, 332, 357, 359
net worth, 110–111, 113
nonmember, 332, 357, 359, 369
nonnational, 269, 275, 332
number of, 233, 317
private, 287n, 288n, 332
reports, accuracy of, 330
state member, 269, 332, 357, 359
weekly reporting, data used in interpolation, 268, 378–379, 498–503, 590–592
Banks, mutual savings:
defined, 75, 332
geographical coverage, 175, 531
coverage in more developed areas, 193
preference for time deposits in developed areas, 176n, 193
Banque Générale, 100
Barter economy, features of, 106, 119n
Bills of exchange as means of payment, 93, 98n, 105n
Blodget, Samuel, Jr., estimates of bank notes and specie, 233–234
Building societies, 120–121, 127
Call dates:
definition of, 79
frequency of, 1921–22, 79
meaning of “June,” 319, 427
Central banks:
effect of nonbank financial intermediary liabilities on monetary control, 127
open market operations, 125
Certificates of deposit:
before 1914, no uniform classification, 264, 275–280, 284, 294–295
in 1920’s:
demand, considered time by Angell, 269
so treated by Currie, 269
since 1961:
time, large negotiable, 80–81, 148, 170–171
ceiling interest rates, 169n
comparable to market instruments, 81, 148n
data on, 151n
excluded by us from M2, 81, 151
Checks in process of collection:
excluded from deposit estimates, 57
procedure questioned, 59n
with clearinghouses, 265n
with F. R. Banks, 424, 450
See also Float
Checks, postdated, as medium of exchange, 105n
Complementarity in demand, currency denominations, 141–142
opposed to substitutability in demand, 144
Comptroller of the Currency, U.S.:
reports from national banks, 208
deposit classes in, 265
savings deposits in:
as demand deposits, 263n
Comptroller’s doubts on accuracy, 281–282
meaning of, 278
variations in, 280–281
when first shown, 279
reports from state banks, 208–209, 286
incompleteness of, 208, 280n
Crawford, William H., monetary estimates of, 237–240
Currency:
data on, 207–208
American Express travelers’ checks excluded, 60
held by banks. See Vault cash
held by public, 57, 208, 336–337, 339, 395
coin:
complementarity of notes, 141–143
premium on and demand for, 143n
commercial bank deposits as substitutes, 144
defined, 333
estimates by us:
commercial bank, monetary authority holdings excluded, 82
correct only for M2 money definition, 83
dating of, 157
derivation, 76, 335–395
foreigners’ holdings included, 60
inclusion of some U.S. government holdings, 60, 564–565
Currency (cont.)

held by public (cont.)
estimates by us (cont.)
monthly and quarterly, 57–58, 395
mutual savings bank holdings, 86n
reliability, 401, 415, 417
Treasury holdings excluded, 565
estimates by F.R., 57, 83, 85n, 395
individual vs. business, size of holdings, 107, 109
notes, denominations:
size of, and inflation, 143n
substitution of, in supply, 142–143
slow recognition of concept, 202–203
substitutes in panics, 60n, 415, 417
types of, substitution in demand, 141
held by Treasury. See Treasury cash
at call dates, 79, 357
composition, 353
defined, 333
lost, 395
monthly, 79, 357
pre-Civil War series defective, 249–250
quarterly, 339–351
revisions of basic data, 353–357
seasonal adjustment, 357
stock, 2
before 1789, 257n
commodity vs. fiduciary, 89
data, 205–209, 352–357
denominations over $100 discontinued, 105n
Currency School, definition of money, 94
support of bank note limitation, 95
Currie, Lauchlin, money stock estimates of, 268–269
Deposits, commercial bank:
data on, a by-product of regulation, 2, 150, 201
include bank-issued travelers’ checks, 74
large fraction unclassified, before 1914, 76–77, 264–265
demand less duplications, defined, 233
gross, defined, 483
individual, classes of, 264
Andrew’s data, 265
in Comptroller’s Report, 265n
“not classified,” 264–266
interbank, excluded for money defined as M2, 83–84
long distinguished from public’s, 202
part held for time, should be in money defined as M1, 85n
misleadingly termed, 59
net, defined, 482–483, 499–500
restrictions on convertibility of, 81
taxes on, post-Civil War, 78, 335, 337
Deposits, commercial bank, adjusted demand and time:
change in supply conditions, 155, 163, 166–167, 170
common percentage decline, 1929–33, 167
dating, 1867–1968, 58
difference in reserve requirements, 156
differential growth rates, 156
division before 1914 questioned, 154–155, 274, 330
estimates by F.R. before 1914, 76–77
conceptually different from later, 76–77, 153, 275, 302
inadequate data, 275, 425
possible errors, 274–275, 285–286, 301–302
estimates by us, 1914–45, 78–79
at call dates, 79, 432–445, 454–471
member, 474–476
national, 451–452
nonmember, method of interpolation, 453, 473–474; recon-
ciled with nonnational, 473–474
nonnational, compilation problems, 423–426; problem of discrepant dating, 426–427
nonnational, interpolators used, 431, 446–451; sample of states, 427–431
reliability, 477–480
subtraction of redeposited postal savings, 423–424, 475–476
subtraction of U.S. deposits, 476–477
monthly, 481
by groups of states, 1914–19, 486–487
nonmember, interpolators used, 1919–45, 503, 522–523
reliability, 525–527
subtraction of U.S. deposits, 498 quarterly, 58
exclude bank and Treasury holdings, 57
exclude U.S. holders’ dollar deposits abroad, 74
holder vs. bank records, 150
homogeneity, 155
ignore mail float, 59
include foreigners’ and foreign commercial bank holdings, 74
include foreign institutional holdings at F.R. Banks, 74
interest payments on, average rates, 158–159
declining differential, 1933–45, 167
postwar widening differential, 168
shift in favor of time, 1914–29, 159
once treated as claims to money, 95, 201
pecuniary vs. nonpecuniary returns, 159–160
debits as measure of nonpecuniary returns, 158–161
same total returns, demand and time, 161
per capita, correlated with income, compared with broader deposit totals, 177–178
quantity as measure of net wealth, 110
ratio of demand to time, changes and supply conditions, 170
erratic since 1946, 170
substitutability in supply, 142, 163
Feige’s evidence, 180
for currency, 144
Deposits, commercial bank, demand adjusted:
bank services, 168, 172
business holdings, 107, 109
greater than personal, 109, 141
index of business money balances, 142
response to yield on savings and loan shares, 183
components, 263n
defined, 233, 269
interest payments, and moneyness, 116
and marginal nonpecuniary services, as free good, 113
before 1914, 77
interpreted as money-debt, 111
legal prohibition since 1933, 165–167; evaded, 117n
services on, 168n, 172
no bank incentive to distinguish from time (pre-1914), 77
per capita, correlated with income, 177, 193
personal holdings, attributable to asset motives, 109
response to yield on savings and loan shares, 183
service charges, 163
since 1933, only class transferable by check, 81
subject to check, a component of, 263 total debits, 109n
transactions services, zero marginal, positive average yield, 114 vs. dominant money, 114–115
Deposits, commercial bank, time adjusted:
  a misnomer, 81
  elasticity of response to yields on savings and loan shares, 183
  holdings, geographical concentration, 176
  mainly by individuals, 107, 141–142
  number of accounts, 141–142
  interest payments on:
    ceiling rates payable, 148n, 165, 169n
    decline and excess reserves, 1933–40, 165
    services substituted for, 131n
  growth rate, since 1945, 169
  meaning different after 1914, 77
  moneyness of, 175
  per capita, correlated with income, by states, 177, 193
  See also Certificates of deposit
  Deposits, commercial bank, total adjusted:
    defined, 333
    estimates:
      aggregate:
        annual, 1867–1906, 335–339
        monthly, 1907–14, 486–497
        quarterly, 1867–1907, 342–343
        national, 337–339
      nonnational:
        by Fand, 1875–96, 78, 337–338
        by Kindahl, 1867–75, 78, 335–336
        by us, 1907–23, 423–431
    reasons for, before 1914, 76–77, 138
    velocity, whether lower than that of bank notes or coin, 97
  Deposits, Federal Reserve:
    commercial bank:
      held against time, should be in \( M_3 \), 84, 85n
      not subtracted from monetary totals, 83
  other financial institutions, 84n
  Treasury, 565–566, 573
  Deposits, mutual savings bank:
    estimates, 1867–1946, 336–339, 538–554
    compilation problems, 532–553
    discrepant dating, 533
    reliability, 548–558
    sample of states, 534–536
    scheme of interpolation, 530–531, 537
    sources of data and revisions, 558–561
    estimates by F.R., 1947–68, 58, 554, 556
    seasonal adjustment, 555n
    moneyness, 116–117, 152–153
    pecuniary and nonpecuniary returns, 175
    compared with commercial time, 172
    ratio to commercial demand, by states:
      higher than in nonmutual savings states, 189
      substitutability for commercial time, 176
      vs. ratio of commercial time to demand, 176
    reasons not defined by us as money:
      cyclical behavior, 178
      per capita correlations with income, 177, 193
      ratios to commercial demand, 189
      rise in, 1929–33, 163
      substitutability for currency and commercial demand and time, 144, 176
  Diamond-water paradox, 112–113
  Economic theory:
    no precise definition of money in, 91, 94
    price vs. monetary theory, 90
  Elliott, Roy, on weighting assets by moneyness, 152n
