NATIONAL INCOME
AND CAPITAL FORMATION
1919-1935

A PRELIMINARY REPORT

NATIONAL BUREAU OF
ECONOMIC RESEARCH
NEW YORK - 1937
PUBLICATIONS OF THE
NATIONAL BUREAU OF ECONOMIC RESEARCH, INC.

NUMBER 32

NATIONAL INCOME
AND CAPITAL FORMATION
1919-1935
Officers

Joseph H. Willits, Chairman
George Soule, President
David Friday, Vice-President
Shepard Morgan, Treasurer
Joseph H. Willits, Executive Director
Martha Anderson, Editor

Directors at Large

Chester I. Barnard, President,
New Jersey Bell Telephone Company
Henry S. Dennison, Dennison Manufacturing Company
George M. Harrison, President,
Brotherhood of Railway and Steamship Clerks
Oswald W. Knauth, President, Associated Dry Goods Corporation
Harry W. Laidler, Executive Director,
The League for Industrial Democracy
L. C. Marshall, Johns Hopkins University
George O. May, Price, Waterhouse and Company
Shepard Morgan, Vice-President, Chase National Bank
Beardsley Ruml, Treasurer, R. H. Macy and Company
George Soule, Director, The Labor Bureau, Inc.
N. I. Stone, Industrial and Financial Consultant

Directors by University Appointment

William L. Crum, Harvard  Harry Alvin Millis, Chicago
Walton H. Hamilton, Yale  Wesley C. Mitchell, Columbia
Harry Jerome, Wisconsin  Joseph H. Willits, Pennsylvania

Directors Appointed by Other Organizations

Frederick M. Feiker, American Engineering Council
David Friday, American Economic Association
Lee Galloway, American Management Association
Malcolm Muir, National Publishers Association
Winfield W. Riefler, American Statistical Association
George E. Roberts, American Bankers Association
Matthew Woll, American Federation of Labor

Research Staff

Wesley C. Mitchell, Director
Arthur F. Burns  Frederick R. Macaulay
Solomon Fabricant  Frederick G. Mills
Simon Kitchens  Leo Wolman
Eugen Altschul, David L. Wickens, Associates
RELATION OF THE DIRECTORS
TO THE WORK OF THE NATIONAL BUREAU
OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No study shall be published until the Director or Directors of Research shall have submitted to the Board a summary report drawing attention to the character of the data and their utilization in the study, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion will serve to determine the suitability of the study for publication in accordance with the principles of the Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. If publication is approved each member is entitled to have published also a memorandum of any dissent or reservation he may express, together with a brief statement of his reasons. The publication of a volume does not, however, imply that each member of the Board of Directors has read the manuscript and passed upon its validity in every detail.

6. The results of an inquiry shall not be published except with the approval of at least a majority of the entire Board and a two-thirds majority of all those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed. The limit shall be forty-five days from the date of the submission of the synopsis and manuscript of the proposed publication unless the Board extends the limit; upon the request of any member the limit may be extended for not more than thirty days.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every Bureau publication.

(Resolution of October 25, 1926, revised February 6, 1933)
FOREWORD

The measures of national income and capital formation presented in this volume resulted from three studies that have been carried on at the National Bureau almost independently: national income and capital formation under my direction—the latter undertaken at the request of the Committee on Banking and Credit of the Social Science Research Council; and capital consumption under Solomon Fabricant's direction. Since the magnitudes that these three studies measure are closely related it seems advisable to present the preliminary summary of the first two, national income and capital formation, in a single volume, and make complementary use of Mr. Fabricant's estimates of capital consumption.

The measures of national income constitute a complete revision of the estimates for 1919–28 by W. I. King (National Income and its Purchasing Power), and their continuation through 1935. In utilizing the estimates prepared by the Department of Commerce in cooperation with the National Bureau for 1929–32, as revised and brought up to date by the former agency, we were permitted access to unpublished details.

Some of the national income measures have been published for circulation among National Bureau subscribers in National Income, 1919–1935 (Bulletin 66, National Bureau of Economic Research, September 27, 1937). The estimates presented below incorporate minor revisions made since that was written. These revisions are due to slight changes in the measure of capital consumption by government and in the data on building permits just released by the United States Bureau of Labor Statistics.

Detailed description of the sources and methods used in obtaining the estimates of national income and capital formation will appear in the final report on national income, and in Volume I of the final report on Commodity Flow and Capital Formation, which is now in press. These final reports may well include further improvements suggested by later data. But such changes are not likely to affect sensibly the estimates in this volume.

In the preparation of the estimates of national income the writer has been assisted by Lillian Epstein and Elizabeth Jenks from the beginning of the study, and by Edna Ehrenberg during recent months. Throughout the investigation of capital formation assistance was rendered by William H. Shaw; and for various intervals by Grace W. Knott, Edith Handler, Lawrence Robinson, Richard Machol and Natalie Brown. The writer is indebted for help also to the research staff of the National Bureau, particularly to Solomon Fabricant who prepared the estimates of capital consumption, and to Arthur F. Burns whose suggestions led to a revision of the original manuscript.

CONTENTS

Foreword vii
Introduction 1

I DEFINITIONS AND SCOPE
1 Gross and Net National Product 3
2 The National Product at Successive Stages of Economic Circulation 4
3 Scope of the Estimates 5
4 Limitations of the Estimates 6

II TOTAL NATIONAL PRODUCT
1 The Totals and Their Changes 8
2 Comparison with Population Changes 10

III DISTRIBUTION ACCORDING TO INDUSTRIAL ORIGIN
1 Meaning of Classification 12
2 Distribution in Current Prices 13
3 Distribution in 1929 Prices 20

IV DISTRIBUTION ACCORDING TO TYPE OF INCOME
1 Meaning of Classification 23
2 Importance of Savings of Enterprises 26
3 Changes in Distribution by Type of Payment 27

V CROSS-CLASSIFICATION BY TYPE OF PAYMENT AND BY INDUSTRIAL SOURCE 29

VI THE DISTINCTION BETWEEN CONSUMERS' OUTLAY AND CAPITAL FORMATION 34
1 National Product, Consumers' Outlay and Capital Formation 34
2 Methods of Estimation and the Classification of Commodities 35
3 Variants of the Distinction between Consumers' Outlay and Capital Formation 37

VII APPORTIONMENT OF GROSS NATIONAL PRODUCT BETWEEN GROSS CAPITAL FORMATION AND CONSUMERS' OUTLAY 39
1 Gross Capital Formation—Characteristics of the Estimates 39
2 Volume and Composition of Gross Capital Formation 41
3 Apportionment between Gross Capital Formation and Consumers' Outlay 44

VIII APPORTIONMENT OF NATIONAL INCOME BETWEEN NET CAPITAL FORMATION AND CONSUMERS' OUTLAY 47
1 Net Capital Formation, Volume and Composition 47
a Characteristics of the estimates 47
b Comparison with gross capital formation and capital consumption 49
c Absolute volume compared with wealth 50
d Distribution among component elements 51
2 Apportionment of National Income between Net Capital Formation and Consumers' Outlay 52

IX THE COMPOSITION OF CONSUMERS' OUTLAY 55

X SUMMARY 58

APPENDIX
A National Income and Aggregate Income Payments to Individuals by Type of Income and Industrial Branch, Basic and Other Variants 61
B Comparison with Department of Commerce Estimates 76
C Changes in Procedure and Scope since the Publication of Preliminary Estimates of Capital Formation in Bulletin 52 78
1 Flow of Finished Commodities 78
2 Volume of Construction 79
3 Repairs, Maintenance and Servicing 81
4 Net Changes in Commodity Inventories 81
D Comparability of Estimates of Capital Formation with Those of National Product 82
## TABLES

7. Change in Percentage Share of Various Types of Payment within Each Industrial Branch
8. Change in Percentage Share of Various Types of Payment in Aggregate Income Payments to Individuals, Total and Resulting from Intra-Industry Shifts in Types of Payment and Inter-Industry Shifts in Total Payments
9. Employees’ Compensation and Aggregate Income Payments, Percentage Distribution among Industrial Branches
10. Gross Capital Formation, by Type of User, 1919–1935
11. Average Volume and Distribution of Gross Capital Formation
14. Average Volume of Gross Capital Formation, Capital Consumption and Net Capital Formation
16. Composition of Consumers’ Outlay, 1920–1934
17. Average Value of Significant Items

## APPENDIX TABLES

1. National Income and Aggregate Income Payments to Individuals by Industrial Branches, Basic Variant, 1919–1934
2. National Income and Aggregate Income Payments to Individuals, Other Variants, 1919–1934
7. Value of Repairs, Servicing and Maintenance of Durable Commodities, 1919–1933

## CHARTS

5. Percentage Distribution of Aggregate Income Payments among Major Types of Payment, 1919–1934
10. Composition of Consumers’ Outlay, 1920–1934
