RELATION OF THE DIRECTORS TO THE WORK AND PUBLICATIONS
OF THE NATIONAL BUREAU OF ECONOMIC RESEARCH

1. The object of the National Bureau of Economic Research is to ascertain and
to present to the public important economic facts and their interpretation in a
scientific and impartial manner. The Board of Directors is charged with the re-
ponsibility of ensuring that the work of the National Bureau is carried on in strict
conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of
Research.

3. The Director or Directors of Research shall submit to the members of the
Board, or to its Executive Committee, for their formal adoption, all specific proposals
concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall
have submitted to the Board a summary drawing attention to the character of the
data and their utilization in the report, the nature and treatment of the problems
involved, the main conclusions, and such other information as in their opinion would
serve to determine the suitability of the report for publication in accordance with
the principles of the National Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to
each member of the Board. For each manuscript to be so submitted a special com-
mittee shall be appointed by the President, or at his designation by the Executive
Director, consisting of three Directors selected as nearly as may be one from each
general division of the Board. The names of the special manuscript committee shall
be stated to each Director when the summary and report described in paragraph (4)
are sent to him. It shall be the duty of each member of the committee to read the
manuscript. If each member of the special committee signifies his approval within
thirty days, the manuscript may be published. If each member of the special com-
mittee has not signified his approval within thirty days of the transmittal of the
report and manuscript, the Director of Research shall then notify each member of
the Board, requesting approval or disapproval of publication, and thirty additional
days shall be granted for this purpose. The manuscript shall then not be published
unless at least a majority of the entire Board and a two-thirds majority of those
members of the Board who shall have voted on the proposal within the time fixed
for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the
special committee, until forty-five days have elapsed from the transmittal of the
summary and report. The interval is allowed for the receipt of any memorandum
of dissent or reservation, together with a brief statement of his reasons, that any
member may wish to express; and such memorandum of dissent or reservation shall
be published with the manuscript if he so desires. Publication does not, however,
imp{y that each member of the Board has read the manuscript, or that either mem-
bers of the Board in general, or of the special committee, have passed upon its
validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be
printed in each copy of every National Bureau book.

(Resolution adopted October 25, 1926,
as revised February 6, 1933, and February 24, 1941)
This report is one of a series emerging from an investigation of postwar capital market developments in the United States. The costs of the study were financed in large part by a grant to the National Bureau from the Life Insurance Association of America supplemented by funds from the Research and Educational Trust Fund of the Mortgage Bankers Association of America. Neither of these organizations, however, is responsible for any of the statements made or views expressed in the report.
