

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Pensions in the U.S. Economy

Volume Author/Editor: Zvi Bodie, John B. Shoven, and David A. Wise, eds.

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-06285-6

Volume URL: <http://www.nber.org/books/bodi88-1>

Publication Date: 1988

Chapter Title: List of Contributors, Indices

Chapter Author: Zvi Bodie, John B. Shoven, David A. Wise

Chapter URL: <http://www.nber.org/chapters/c6049>

Chapter pages in book: (p. 191 - 202)

---

## List of Contributors

B. Douglas Bernheim  
Department of Economics  
Stanford University  
452 Encina Hall  
Stanford, CA 94305

Zvi Bodie  
School of Management  
Boston University  
704 Commonwealth Avenue  
Boston, MA 02215

Michael J. Boskin  
National Bureau of Economic  
Research  
204 Junipero Serra Boulevard  
Stanford, CA 94305

Gary Burtless  
The Brookings Institution  
1775 Massachusetts Avenue, NW  
Washington, DC 20036

Benjamin M. Friedman  
Department of Economics  
Harvard University  
127 Littauer Center  
Cambridge, MA 02138

Thomas A. Gustafson  
U.S. Department of Health and Hu-  
man Services  
HCFA/OLP

Hubert Humphrey Building  
Room 339H  
200 Independence Avenue, SW  
Washington, DC 20201

R. Glenn Hubbard  
Department of Economics  
Northwestern University  
Andersen Hall  
2003 Sheridan Road  
Evanston, IL 60201

Michael D. Hurd  
Department of Economics  
State University of New York at  
Stony Brook  
Stony Brook, NY 11794

Laurence J. Kotlikoff

# Subject Index

- Age:** age-consumption profiles, 66–68; age-tenure specific hazard rates equation, 176–77; annuity pricing and, 64–73, 78–79; pension values and, 143, 163, 169–74, 187; retirement income and, 5, 133; value of working additional years and, 179, 189–90; worker turnover and, 174, 186. *See also* Life expectancies
- Aged.** *See* Elderly
- Ameritech Corporation,** 93
- Annuities:** actuarially fair pricing, 64–74, 78–79; adverse selection problem, 3, 73, 79; average premium, 55; bequests and, 3, 53, 61, 64–73, 81; cost per unit of pay-off, 60; deferred nominal life, 141; demand for, 3, 66; government bonds and, 81; individual life, 55–60; individual savings for, 1–3; inflation and, 3, 82; interest rates and, 55; life-cycle models and, 82; life expectancies and, 54, 57–58; load-factor effects, 3, 59, 64–74, 78–79; lump sum value of, 66; market access value, 66; optimal purchase values, 60–64; premiums charged vs. fair values, 58–59; private market, 64; profit and, 53; saving behavior and, 3, 53–83; short sales of, 54; Social Security and, 68–69, 73, 78 n. 1, 80, 82 n. 7; wealth transferability and, 78
- Assets:** dominated, 60; leveraged physical, 100; pension contribution ratio, 87; pension plan composition, 99; transferability, 78; valuation vs. interest rates, 99–100; valuation equation, 108
- Backloading,** 143, 146–47, 159 n. 3
- Bequests:** annuity purchases and, 3, 53, 61, 64–73, 81; bonds and, 69; current consumption and, 64; family dependency and, 61; joy of giving motive, 76 n. 18; nonaltruistic (manipulative), 74; saving and, 71–72; unintentional, 59; valuation of, 69; wealthy individuals and, 81 n. 6
- Best's Key Rating Guide: Property-Casualty,*** 59
- Bonds:** annuity yield differentials, 81; bequest motives and, 69; direct placement securities vs., 57; interest rate effect on, 99
- Canada:** Consumer Price Index, 37; marginal tax rate in, 30, 36; tax deferred savings in, 10–11, 48
- Capital gains taxes,** 85
- Career average earnings:** income replacement rates and, 132; retirement income and, 119–27
- Carnegie Commission Survey,** 10
- Cat on a Hot Tin Roof*** (Williams), 82

- Chrysler Corporation, 93
- Constrained optimal savings choices, 18
- Consumption: behavior model, 60–64; interest rates and, 153; lifetime uncertainty, 82; marginal utility of, 153; preferences, equation for, 17; preretirement, 81; profile, 66–67; retirement and, 155
- Corporate saving, 4, 85–113. *See also* Pension plans
- Corporations: household equity holdings in, 88; investment incentives, 85; pension contribution decreases, 86; saving behavior, 4, 85–113
- Current Population Survey (May 1983), 24
- Dedicated portfolio, 93
- Deferred nominal life annuities, 141
- Defined benefit pension plans: advantages of, 158–59; backloaded benefits, 143; benefits paid equation for, 151; benefit valuation, 139, 141–44; compensation variations, 188; complications of, 162; consumption and, 153; contribution elasticity, 87; corporate perspective, 4; defined contribution plans vs., 4–6, 87, 88, 139–62; earnings risk and, 161; employer's liability, 86, 144; funding of, 144–45; growth of, 88; implicit securities, 145; inflation and, 112–13, 141, 143–44, 158; interest elasticities, 87, 94–101; postretirement interest rates and, 148; preretirement uncertainty and, 148; target saving aspect, 97; termination causes, 88; value to workers, 188; wealth conversion risk, 155
- Defined contribution pension plans: advantages of, 145–48, 158–59, 161; backloaded, 143; benefit valuation, 139–40; benefits paid equation for, 151; consumption and, 153; defined benefit plans vs., 4–6, 87–88, 139–62; efficiency advantage, 152; funding of, 144; inflation and, 7, 145; optimal consumption program equation, 156; present value of contributions equation, 150; retirement capitalization rate, 155; subcategories of, 159 n. 1; wage diversification attribute, 153
- Desired contributions to tax-deferred saving, equation for, 23
- Dissaving, life expectancies and, 53
- Disturbance term, heteroscedastic, 23
- Divorcees, income collapse of, 131
- Dominated assets, 60
- Economic Recovery Tax Act (1981), 2, 9
- Education: IRA contribution levels and, 28; retirement income and, 132
- Elasticity: of income, 23; of interest rates, 94–101; of IRA contributions, 24, 27–28, 50; of net pension saving, 98; of pension fund assets, 97; of pension plan contributions, 4, 106–11; of worker turnover, 183
- Elderly: age-wealth profiles and, 53; bequests vs. annuities, 64–73; economic welfare factors, 115; individual annuity ownership, 75 n. 2; inflation and, 115; life annuities and, 53; lifelength uncertainty, 82; low retirement incomes, 125; poverty of, 5, 115–38; unintentional bequests, 59. *See also* Retirement
- Employee Retirement Income Security Act (ERISA) (1974), 2, 9, 88, 96, 139
- Employers, pension liabilities of, 86, 144. *See also* Corporations
- Employment date, pension plans and, 171
- Equilibrium analysis, savings and, 79 n. 2
- Equity risk premium, pension contributions and, 106
- ERISA. *See* Employee Retirement Income Security Act
- Federal Reserve Flow of Funds, 88
- Financial Accounting Standard Board (FASB), 144
- Financial markets, pension funds and, 86. *See also* Annuities; Bonds; Pension plans; Stock market
- Fixed-income investment, price/yield relationship, 54
- Flows, of pension benefits, 169–70
- 401 (k) plans, 25, 159 n. 2
- 403 (b) plans, 25, 159 n. 2
- Gender: divorcee income collapse, 131; IRA contributions and, 11, 26, 28; life expectancies and, 57; pension values and, 171; retirement poverty and, 131

- Georgia-Pacific Corporation, 160 n. 9  
Gordon effect, 132  
Government bonds. *See* Bonds  
Government guarantees, of pension plans, 144  
Government pension plans: financial wealth and, 123; size of, 88; vesting date, 164  
Great Atlantic and Pacific Tea Company, 92  
  
Hewlett-Packard Corporation, 160 n. 9  
Homeowners, retirement income and, 131  
  
Immunized portfolio, 93, 144  
Income: allocation preferences equation, 17; allocation variables, 18; collapse, 131; elasticity, 23; IRA contribution correlation, 2, 10–13, 19–24, 27–28, 38, 48; marital status and, 128–29, 131; pension plan funding and, 112; planning and, 146; postretirement earnings and, 135–36; tax-deferred savings and, 10–13; widows, 127–32  
Income replacement rates: calculation for, 116; career average earnings and, 132; low, 127–32; retirement and, 119–27; Social Security and, 121–23; stable, 6; variables for, 132–33  
Individual life annuities, 55–60  
Individual Retirement Accounts (IRAs): average contributions, 12, 31–33; vs. Canadian savings, 11, 35–38; contribution determinants, 9–52; contribution estimation methods, 39–43; contribution limits, 9; contribution variables, 11, 51; data sources for, 43; family contributions, 29; limit change effects, 9–52; elasticity of contributions, 24, 27–28, 50; vs. employer pension benefits, 9; expected contributions equation, 46 n. 9; gender and, 11, 26, 28; income correlation, 2, 10–13, 19–24, 38, 48; individual savings for, 1–3, 51, 85; limit change contribution relationship equation, 22; marginal tax rate and, 29–30, 36, 38; married women and, 28; national saving and, 9; net personal saving and, 51; one-earner family contributions, 31–32; pension acquisitions and, 89; potential contributor status, 33–34; private pension plans and, 2, 10, 13, 28, 30, 38, 49; probability of positive contributions equation, 24; probit model for, 33–35, 40; salary reduction plans and, 28, 30; spousal restrictions, 31; Tobit model for, 19, 21, 29, 40, 49–50; two-earner family contributions, 32; unmarried men and, 26; women's contribution levels, 11. *See also* Tax-deferred savings  
Inflation: adjusted retirement benefits and, 6; annuities and, 3, 82; defined benefit pension plans and, 112–13, 141, 143–44, 158; defined contribution pension plans and, 7, 145; elderly and, 115; nominal interest rate and, 143; pension plans and, 106, 112, 140, 157–58, 161; portfolio hedges for, 145  
Insurance: load factors, 3, 59–60; widows and, 121  
Interest elasticity of pension fund assets equation, 97  
Interest rates: annuity premiums and, 55; asset values and, 99–101; backloading and, 143; bonds and, 99; consumption and, 153; defined benefit pension plans and, 94–101; effects on equity values equation, 100; elasticity of pension plan contributions, 106–8; inflation and, 143; pension fund elasticity equations, 94–101; pension funding and, 87, 92–111; portfolio risk and, 93; retirement consumption stream and, 155; saving and, 87; stock market and, 100; uncertainty model, 148–56; working additional years and, 179  
Internal Revenue Service, 112  
  
Keogh Plans, 85  
  
Labor-income uncertainty model, 156–57  
Leisure value, 189  
Leveraged physical assets, 100  
Life annuities: deferred nominal, 141; elderly and, 53; opportunity costs of, 59  
Life-cycle models, 53–54; annuity purchases and, 73–74; expected lifetime utility, 61; model draw-backs, 78

- Life expectancies: annuities and, 54, 57–58; dissaving and, 53; lengthening of, 115; male improvement in, 57; pension plans and, 162; saving and, 53, 83
- Lifetime individual utility function, equation for, 152
- Load factors: annuity effects, 3, 64–74, 78–79; calculation of, 57–60
- Loanable funds, pension plans and, 86
- Longitudinal Retirement History Survey, S.S.A., 116–17
- Manufacturing industries, pension benefit calculations, 170
- Marginal tax rate: Canada and, 30, 36; IRA contributions and, 29–30, 36, 38; savings and, 18, 50. *See also* Taxes
- Marginal utility of consumption, 153
- Marital status: income changes and, 128–29, 131; IRA contributions and, 26, 28; poverty and, 129–32; retirement income and, 128–31
- Men. *See* Gender
- Mining industries, pension benefit calculations, 169
- National Income and Product Accounts (Department of Commerce), 90, 104
- National savings: annuity prices and, 3, 53–83; IRAs and, 9; need to increase, 2. *See also* Savings
- Net pension saving, equations for, 97–98
- Opportunity cost, of life annuities, 59
- Optimal savings choices, equation for, 18
- Option value of working, 165–68, 188–90
- Option value of working additional years, equation for, 165–67
- Pension Benefit Guarantee Corporation (PBGC), 91–92, 139, 141, 144–45
- Pension benefits paid, equation for, 151
- Pension contribution schedule, equation for, 150
- Pension funding: asset earnings ratio, 87; benefits maturity equation, 95; contribution elasticity, 4, 111; contribution equations, 97, 150; corporate contribution decrease, 86; default risk, 144; full funding maintenance equation, 96; interest rates effects, 87, 92–93, 99–111; I.R.S. limitations, 112; loanable funds and, 86; maintenance of, equation for, 96; overfunding, 87, 92–93, 99; stock market and, 87, 93; target, 86–87; underfunding, 99, 111; value of benefits to be paid out, equation for, 95
- Pension plans: acquisition rates, 89; age vs. value of, 171–74, 187; aggregate size of, 88; asset composition of, 99; asset valuation equation, 108; benefit calculations, 169–70; capital formation incentives, 110; employment date and, 171; ERISA regulations, 96; expected present value of benefits, 164, 170–71; 401 (k) plans, 25, 159 n. 2; 403 (b) plans, 25, 159 n. 2; gender vs. value of, 171; government guarantees, 144; immunization, 144; incentive effects of, 7, 163–90; income planning role, 146; inflation and, 106, 140, 157–58; integrated, 139; interest rates and, 4, 11, 92–93, 102–9, 147–56; IRA contributions and, 2, 10, 28, 30, 38, 49; labor-income uncertainty and, 156–57; life-length uncertainty and, 162; net acquisitions rate, 88; option value of working and, 165–90; personal saving and, 4, 85–113; poor man's, 136; portability of, 146; present value of, 170–71; rate effects, 102–9; retirement date value, 163–64; reversions, 92; salary incentives, 146; termination and, 146; underfunding, 111; wage indexation and, 157–58; wage-path risk, 147; wage uncertainty and, 148–52; widows and, 121; worker turnover and, 163–90; working additional years and, 143. *See also* Defined benefit pension plans; Defined contribution pension plans; Government pension plans
- Pension Reform Act (1974), 111
- Personal saving: pension plans and, 4, 85–113; IRAs and, 1–3, 51–52, 85; pension contributions and, 86, 98; pension fund acquisitions and, 89; tax effects on, 9–52
- Population demographics, pension plan funding and, 112
- Portfolio(s): dedicated, 93; inflation hedges, 145; interest rate risk, 93

### **Financial Aspects of the United States Pension System**

*Edited by* ZVI BODIE *and* JOHN B. SHOVEN

“This volume represents a fundamental contribution to the analysis of the financial and economic aspects of the private pension system in the US. It is a collection of fourteen papers, each followed by a comment, by 30 contributors who represent the country’s leading experts in the field—from Martin Feldstein to Paul Samuelson. . . . It is essential reading for scholars, practitioners, and policymakers who are concerned with pension planning or regulation.”

—*Choice*

“*Financial Aspects of the United States Pension System* is an important book undoubtedly destined to become a standard reference in the study of pensions.”

—Dennis W. Coffey, *Wall Street Review of Books*

An NBER Project Report

1983 x, 452 pages Cloth ISBN 0-226-06281-3

### **Pensions, Labor, and Individual Choice**

*Edited by* DAVID A. WISE

The papers in this volume address two aspects of the relation between varieties of labor coverage and participation in the labor force: first, the strong correlation between age at retirement and kind of pension coverage and, second, the high cost imposed by pension plans on workers who change jobs, thus reducing instances of job change.

“By its introduction of frontier statistical and theoretical modeling this volume heralds a new beginning to the evaluation of the impact of pensions on labor markets.”—Richard V. Burkhauser, *Journal of Economic Literature*

An NBER Project Report

1985 x, 454 pages Cloth ISBN: 0-226-90293-5

### **Issues in Pension Economics**

*Edited by* ZVI BODIE, JOHN B. SHOVEN, *and* DAVID A. WISE

In the past several decades, pension plans have become one of the most significant institutional influences on labor and financial markets in the United States. *Issues in Pension Economics*, the third volume to result from an NBER study of this growth, covers a broad range of pension issues and utilizes new and richer data sources than have been previously available. The contributors address such issues as the interaction of pension-funding decisions and corporate finances; the role of pensions in providing adequate and secure retirement income; the effect of pension plans on savings behavior; and the incentive effects of pension plans on labor market behavior and the implications of plans for different demographic groups.
