Subject Index

Airbus Industrie, 102–3
Armington assumptions, 218–19, 223, 244n.1
Assets: household decisions for allocation of, 15–16, 37, 45; substitutability of, 7, 11, 16–18
Automobile industry, 102–3
Average total cost (ATC), 220–22
Bertrand conjecture equilibrium, 133, 138–39
Canada: direct investment in U.S. by, 53–58, 70; export industry pricing in, 187–88, 194–96, 197–203; and free trade agreement with U.S., 217–18, 250–53
Capital: flow of, 45; mobility or immobility of, 7, 26–33, 39, 45, 47
CES. See Constant elasticity of substitution (CES) function
CGE. See Computable general equilibrium (CGE) model
Comparative advantage, 146, 154. See also Competitiveness, international, 6–7
Computable general equilibrium (CGE) model, 5–6, 7–22, 46–47
Computational model, to analyze effects of trade liberalization, 228–42
Conjecture variations equilibrium. See Nash-Cournot noncooperative equilibrium Conjecture(s). See Bertrand conjecture equilibrium; Consistent conjecture; Cournot conjectures
Consistent conjecture, 133, 138
Constant elasticity of substitution (CES) function, 16, 18, 220
Consumption: of manufactures in Japan, 145–46; tax to promote savings, 26–30; treatment in CGE model of, 18, 34, 37
Contract costs, effect on foreign direct investment decisions of, 58–62. See also Licensing
Cournot conjectures, 138
Cournot followers, 226–28
Current Population Surveys (CPS), 88–92
Data sources, 22–25, 196–97
Demand elasticities, 247, 249–50
Derationalization of production, 242
Differentiated products models, 219–26, 242–43. See also Derationalization of production; Rationalization of production
Dixit-Stiglitz-Spence utility function, 219–20
Duopoly, international: analysis using output adjustment costs, 125–37
Elasticity of substitution, 37
Equilibria, intra- and intertemporal, 20–22. See also Expectations
European Community (EC), direct investment in U.S. by, 53–58, 70
Excess demand, 39–40
Exchange rates: effect on export prices of changes in, 197–203; effect on relative price of changes in, 185–86; elasticities of, 191–92, 203–4, 213–14; export industry model to estimate effect of change in, 188–96; temporary decline in, 62–63, 82
Expectations, perfect foresight, 11, 15, 22, 40–41, 45
Export industry model, 188–96
Export subsidy policy, 125–27
Factor endowments, 146; for interindustry trade model estimates, 153–54, 158–59; for intraindustry trade, 150–53, 164; in Japan, 175–77. See also Hausman’s Test; Heckscher-Ohlin model
Flow-of-funds activity. See Capital
Foreign direct investment (FDI): and contract costs, 58–62; decision to undertake, 58–62, 79, 81–82; effect of intraindustry trade on, 66, 70; effect of protectionism on, 53–54, 66; as risk-management technique, 78–79; and the U.S., 53–58, 62–63, 66, 70, 77–78. See also Contract costs
Free trade agreement, Canada and U.S., 217–18, 250–53
Game model, comparison of steady state and static output for duopoly analysis, 127–30, 138–39
Government sectors, U.S.: treatment in CGE model of, 10, 18–19
Hausman’s Test, 158–59
Heckscher-Ohlin model, 146–48, 150–53
Helpman-Krugman model, 150–52, 171, 178
Horstmann-Markusen model, 224–25
Household behavior: in CGE tax policy analysis, 15–18; effect of simulated tax policy change on, 26–27, 29–30
Industrial policy, 85–86; in U.S., 105–6
Industry: disaggregation in CGE tax policy model, 10; production decisions for international competition of, 6, 12–15, 39; simulated tax policy changes and behavior of, 33–34; treatment in CGE model of U.S., 12–15; wage structure and differentials in, 86–97
Input-output matrices, 23–24
Interindustry trade: estimates of model for, 153–58; under free trade area, 218; in trade liberalization analysis, 238, 242–43. See also Heckscher-Ohlin model
Intraindustry trade: and comparative advantage, 148; country participation in, 146–48; effects on foreign direct investment of, 66, 70, 79–80; in trade liberalization analysis, 218, 224, 233, 242–43
Investment, behavior in CGE tax policy model, 10. See also Foreign direct investment (FDI)
Investment tax credits (ITCs), effect of simulated restoration of, 30–33, 37, 50–51
Japan: direct investment of, 53–58, 70, 80; factor endowments in, 175–77; intraindustry trade of, 146–48; trade structure of, 145–48, 150, 155, 164–68, 175–82
Labor market: importance of rents for, 102–5; trade policy and imperfections in, 98; wage differentials and rents in, 93–97, 117
Licensing, as alternative to direct investment, 58–62
Manufactured goods: Japanese intraindustry trade in, 146–48; limited access to Japanese markets for, 145–46
Manufacturing industry, U.S.: foreign investment in, 54–58, 70, 77
Market segmentation (MS) model, in trade liberalization analysis, 228–33, 239–43
Market structure, in trade liberalization model, 231, 246, 253. See also Differentiated products models; Market segmentation (MS) model; Perfect competition (PC) model
Monopolistic competition (MC) model, analysis of trade liberalization using, 219, 223–24, 228–39, 243
Nash-Cournot noncooperative equilibrium, 126, 129–30, 132–43
Nash equilibrium, 128, 131–32, 142
National product differentiation (NPD). See Differentiated products models
Perfect competition (PC) model, analysis of trade liberalization under, 228–39
Pontryagin conditions, 128–30
Prices, effect of exchange rate changes on, 185–88, 207
Production: decisions for international competition, 6, 12–15, 39; rationalization of, 221–23
Protectionism: foreign direct investment and, 53–54, 66; in Japan, 167–68, 175–77, 179; in U.S., 53–54. See also Trade structure
Public policy: analysis of real and simulated changes in, 7–33; decision for optimal, 130–35, 139; effect of changes in, 11; employment allocation and, 98; for export subsidy under duopoly theory, 125–27; to promote savings, 26–30, 33. See also Subsidies, Tax policy, Trade policy
Purchasing power parity (PPP), and exchange rate changes, 185–86
Rationalization of production: in monopolistic competition (MC) analysis, 232, 238–39; with tariff liberalization, 221–23, 246–49, 250
Rents: labor market, 93–97, 102–5, 117; labor market and monopoly, 86. See also Wage differentials
Rent-seeking behavior, 104–5
Savings, consumption tax policy as subsidy for, 26–30, 33–34, 37, 48–50
Tax, ad valorem: as subsidy, 127
Taxation, effect on wage differentials, 100
Tax policy: CGE models for analysis of, 7–22; international competitiveness and, 6–7; simulated changes in, 26–33
Terms-of-trade: in NPD analysis, 219, 223–24; trade policy and changes in, 118
Trade, treatment in CGE model of, 19–20. See also Interindustry trade; Intraindustry trade; Trade structure
Trade liberalization, bilateral: models to evaluate, 218; production rationalization and, 217–18, 221–23; and terms of trade, 223–24. See also Computational model; Derationalization of production; Differentiated products model; Market segmentation (MS) model; Monopolistic competition (MC) model; Perfect competition (PC) model; Rationalization of production
Trade policy: Airbus and auto industry as examples of, 102–3; analysis of U.S., 106–12; interindustry wage differentials and, 86–87; labor market imperfections and, 98
Trade structure: differences in, 149–50; of Japan, 145–48, 150, 155, 175–82
Unions and wage setting, 90, 100
United States: direct investment abroad by, 53, 63, 70, 77; export industry pricing in, 197–203; foreign direct investment in, 53–58, 62–63, 66, 70, 77–78; and free trade agreement with Canada, 217–18, 250–53; industrial policy in, 105–6
Wage differentials: in closed economy, 98–100, 117; interindustry, 86–97; and labor market rents, 93–97; in small open economy, 100–103, 118; and trade policy, 98; union wage setting and, 90, 100; use by firms of, 88
Wage structure, interindustry and international, 91–93, 109–10
Welfare, economic: analysis of, 130–37; bilateral tariff elimination and, 217–18; effect of trade policy and wage differentials on, 98; import reduction policy and, 87; in MC analysis, 232–33; in NPD analysis, 219; relative price changes and, 223; trade policy and, 112–13

Books of Related Interest

**Trade Policy Issues and Empirical Analysis**  
*Edited by Robert E. Baldwin*

This volume will interest those concerned with the effect international trade has on domestic economies and with the role policy plays in that relation. The contributors apply new trade theories to existing world cases and also present complementary empirical studies of trade policy issues that are grounded in more traditional trade theories.

*An NBER Conference Report*  

**Issues in US-EC Trade Relations**  
*Edited by Robert E. Baldwin, Carl B. Hamilton, and André Sapir*

These essays by prominent North American and European trade specialists provide in-depth analyses of the economic causes of US-EC disputes and thorough consideration of the various policy options for resolving them. Contributors consider such topics as the legal aspects of trade between the two regions, agricultural policy, different ways the United States and members of the Community use embargoes, international trade in services, trade policy in oligopolistic environments, and the growing trend toward protectionism.

*An NBER Conference Report*  

**The United States in the World Economy**  
*Edited by Martin Feldstein*

Among the topics considered in this volume are foreign competition in Latin America and the Asian Pacific Rim, Third World debts, innovations in international financial markets, changing patterns of international investment and capital flows, and worldwide competition in goods, services, and agriculture.

"This is an extraordinarily comprehensive and valuable collection that deserves wide readership."—Stanley Fischer, Massachusetts Institute of Technology

*An NBER Conference Report*
