American Depository Receipts (ADRs), 213, 231, 291

Asset pricing models: country attributes in predicting returns, 61–63, 65–66, 93–99, 140–43, 144–45; global risk factors, 63–65, 99–106, 143–44; predetermined instruments for, 50; standard test limits, 3–4; to test for market integration, 233–35. See also Capital asset pricing model (CAPM); Net asset values (NAVs); Portfolio mean-variance model

Barriers to foreign investment: criteria used for investability indexes, 264–66; in developing countries, 232–33, 243–45; effect on capital flows, 307; restrictions of selected countries, 266–69; tests of limits to integration, 13, 233–35. See also Capital flows; Equity flows; Investability indexes

Bearer instruments tax, U.K., 291

Betas: differences in equity returns related to, 59–60; risk of foreign investment, 207

Business cycles, worldwide, 28–30, 44–49, 55–57

Capital asset pricing model (CAPM): alternatives to, 60; choice of instruments to estimate, 54–57; identification of state variables, 25; prediction of rates of return on currencies, 44; in Stehl methodology, 235; tests of, 2, 3, 5; tests using balance of payments data, 9–10; in U.S. investor portfolio allocation, 208–12, 219–20. See also CASE (constrained asset share estimation) method

Capital asset pricing model (CAPM), classical: estimates with U.S. main economic indicators, 30, 35; estimates with U.S. NBER instrumental variables, 41, 43; in pricing kernel methodology, 26

Capital asset pricing model (CAPM), international: CASE method to estimate, 155–62, 166, 169–70; estimates with U.S. main economic indicators, 30, 35–36; estimates with U.S. NBER instrumental variables, 41–43; in explaining worldwide rates of return, 23; pricing kernel methodology to test, 25–26; using financial variables as instruments, 51–53

Capital flows: constraint of balance of payments on, 218; controls in developing countries, 243–45; correlation with net equity flows, 217–18; effect of cross-border restrictions, 307

CASE (constrained asset share estimation) method: advantages, 7–8; to estimate CAPM international, 155–62, 166, 169–70; to estimate portfolio mean-variance model, 149–50

Center for International Business Cycle Research (CIBCR) forecasts, 44–47
Subject Index

Collateralized Mortgage Obligations (CMOs), 213
Country attributes, 61–63, 66, 92, 98–99, 142–43
Country equity funds: advantages in analysis of investor sentiment, 349; initial public offerings and returns, 345–46; investor sentiment model applied to prices, 353–56; predictive power of discounts in, 366–70; in restricted and unrestricted foreign markets, 357–58, 362–63; time-series behavior of discounts and premia, 359–74
Cross-border restrictions. See Barriers to foreign investment

Derivatives tax, 294–95, 304–5
Developing countries: barriers to foreign access, 232, 243–45; equity flows to, 231–32; imperfect integration, 13; restrictions on foreign investors, 266–69. See also Barriers to foreign investment; Emerging countries; Investability indexes
Discounts: average discounts and aftermarket performance of country fund, 359–63; common risk components in country funds, 367, 370–74; of country funds using investor sentiment model, 353; predictive power, 366–70; sources of variation in country fund, 374–92; stationarity tests of, 363–65; to value of country funds, 346–50
Dividend-to-price ratios, country versus world, 129–35
Economic performance: as country attribute, 62, 92, 94–98; as measure of country risk exposure, 141–42
Emerging countries: equity flows to, 231; equity markets, 389–91; investability indexes of market access, 243–45; restrictions on foreign investors, 266–69; returns on stock markets, 232; test market segmentation, 235–43. See also Barriers to foreign investment; Developing countries; Investability indexes
Equities tax: transaction tax on brokerage services in Sweden, 280–81; U.K. stamp duty tax on, 289–90
Equity flows: across Canadian border, 192–94, 197; across U.S. borders, 189–92; correlations across markets, 195–97; to developing and emerging countries, 231
Equity flows, net: across U.S. borders, 189–92, 197–200, 223–25; autocorrelation, 192; balance of payments influence on, 218; correlations across markets, 195–97; correlation with capital flows, 217–18; correlation with U.S. and foreign returns, 207; crossing Canadian borders, 192–94; defined, 188; factors influencing changes over time, 217–18; U.S. purchases of foreign equity, 205
Equity markets, international: comparison of turnover rates across, 200–205; home country bias, 11–12, 200, 219; long-term marketable securities, 213; portfolio-balance models of, 9, 149; tests for integration or segmentation, 235–43; trends, 1–2; U.S. foreign investment positions, 197–200; U.S. reporting of transactions, 213–14. See also Barriers to foreign investment; Developing countries; Emerging countries; Investability indexes
Equity returns: empirical evidence of country, 65–81; relation to covariance or beta, 59–60; relation to investability indexes and P/E ratios, 244–62
Exchange rates: in cross-border investment decisions, 207; effect on country fund equity prices, 375; risk in dynamic...
portfolio-balance model, 177–80; risk in international CAPM, 23; risk premia, 177–81

Factor models: components and strategies, 139; for security returns, 144

Floating rate notes (FRNs), 213

Global depository receipts (GDRs), 231

Heterogeneity of beliefs, 341–43

Home-country bias: differences in bond and equity portfolios, 11–12; explanations of, 219; factors in, 182; in international equity markets, 200; in portfolio allocation, 185, 216–17; in portfolio-balance model, 154; problem of, 139–40, 143–44

Indicators, economic: in asset pricing theory, 51; to explain asset price returns, 23–24; as predictors, 41, 55–57; in pricing kernel methodology, 28–43

Industry structure as country attribute, 62–63, 66, 92, 98–99, 142–43

Information: analysis based on beliefs in market behavior, 341–42; asymmetric effect, 383–86; influence on investor sentiment, 382–83; lagged spillovers from foreign markets, 311; during October 1987 Crash period, 321–23; in opening stock quotes, 319; related to international market timing, 339–41; relation of flows to price volatility and trading volume, 326, 335–37; STT effect on acquisition, 305–6; trading conditions with, 307

Informational efficiency hypothesis: defined, 311–12; rate of information effect, 324–25, 337

Integration: barriers to, 13; imperfect, 12–13; tests for market segmentation or, 235–43, 271–75; trend in equity markets, 1

Investability indexes: criteria for stocks in, 264–66; for developing countries, 243–45; relation to P/E ratios and equity returns, 244–62; stocks for inclusion, 263

Investment, foreign: barriers in developing countries to, 243–45; beta measurement, 207; effect of STT on, 306–7; turnover rates for, 202–3; turnover rates for U.S. and foreign investors, 203–5; U.S. positions, 197–200. See also Barriers to foreign investment; Capital flows; Equity flows; Investability indexes

Foreign Direct Investment
Edited by Kenneth A. Froot

Over the past decade, foreign direct investment (FDI) around the world has nearly tripled, and with this surge have come dramatic shifts in FDI flows. This volume examines changes in FDI, including historical trends, specific country experiences, developments in the semiconductor industry, and variations in international mergers and acquisitions.

An NBER Project Report

Studies in International Taxation
Edited by Alberto Giovannini, R. Glenn Hubbard, and Joel Slemrod

This volume presents pioneering empirical research on how taxes affect the investment and financing decisions of multinational corporations in today's global economy.

An NBER Project Report

Winner of the 1994 Masayoshi Ohira Memorial Prize for outstanding work in economics relating to the Pacific Basin Community Concept

Regionalism and Rivalry
Japan and the United States in Pacific Asia
Edited by Jeffrey A. Frankel and Miles Kahler

Is Japan forming a trading bloc in Pacific Asia? Does Japan use foreign direct investment in Southeast Asia to achieve national goals? Does Japan possess the leadership qualities necessary for a nation assuming greater political responsibility in international affairs? Leading economists and political scientists contend that the rapid growth of intraregional trade in East Asia is not due to a trade bloc, but can be explained by the rapid growth of East Asian economies.
