

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Strategic Factors in Nineteenth Century American Economic History: A Volume to Honor Robert W. Fogel

Volume Author/Editor: Claudia Goldin and Hugh Rockoff, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-30112-5

Volume URL: <http://www.nber.org/books/gold92-1>

Conference Date: March 1-3, 1991

Publication Date: January 1992

Chapter Title: Biographies, Indexes

Chapter Author: Claudia Goldin, Hugh Rockoff

Chapter URL: <http://www.nber.org/chapters/c6975>

Chapter pages in book: (p. 475 - 492)

Biographies

Howard Bodenhorn is assistant professor of economics at St. Lawrence University in New York State.

Michael D. Bordo is professor of economics at Rutgers University and was previously at the University of South Carolina. He is also a research associate of the National Bureau of Economic Research.

Ann M. Carlos is associate professor of economics at the University of Colorado at Boulder and has recently moved there from the University of Western Ontario.

Stephen Crawford is an advertising executive with Leo Burnett, Inc. in Chicago.

Stanley L. Engerman is the John H. Munro Professor of Economics and professor of history at the University of Rochester and a research associate of the National Bureau of Economic Research.

Gerald Friedman is assistant professor at the University of Massachusetts at Amherst.

David W. Galenson is professor of economics at the University of Chicago and a research associate of the National Bureau of Economic Research.

Claudia Goldin is professor of economics at Harvard University where she moved recently from the University of Pennsylvania. She is program director and research associate of the National Bureau of Economic Research and was the editor of the *Journal of Economic History* from 1984 to 1988.

Alice Hanson Jones was, until her death in 1985, professor emeritus of economics at Washington University in St. Louis. She served as president of the Economic History Association from 1982 to 1983.

John Komlos is associate professor of history and economics at the University of Pittsburgh.

Michael Kurth is associate professor of economics at McNeese State University in Louisiana.

Frank Lewis is professor of economics at Queen's University in Ontario.

Robert A. Margo is professor of economics at Vanderbilt University and was previously at Colgate University and the University of Pennsylvania. He is also a research associate of the National Bureau of Economic Research.

Donald N. McCloskey is the John F. Murray Professor of Economics and professor of history at the University of Iowa and is the director of the Project on the Rhetoric of Inquiry.

Clayne L. Pope is professor of economics at Brigham Young University and a research associate of the National Bureau of Economic Research.

Peter Rappoport is assistant professor of economics at Rutgers University.

Joseph D. Reid, Jr., is associate professor of economics at George Mason University.

Hugh Rockoff is professor of economics at Rutgers University and a research associate of the National Bureau of Economic Research.

Winifred B. Rothenberg is assistant professor of economics at Tufts University.

Anna J. Schwartz is research associate emerita of the National Bureau of Economic Research.

Boris Simkovich is a graduate student in economics at Harvard University.

Kenneth L. Sokoloff is associate professor of economics at the University of California at Los Angeles and a research associate of the National Bureau of Economic Research.

Richard H. Steckel is professor of economics at the Ohio State University and a research associate of the National Bureau of Economic Research.

Georgia C. Villaflor teaches economics at San Diego State University.

Jenny Bourne Wahl is assistant professor of economics at St. Olaf College in Minnesota.

Donghyu Yang is associate professor of economics at Seoul National University, Korea.

Subject Index

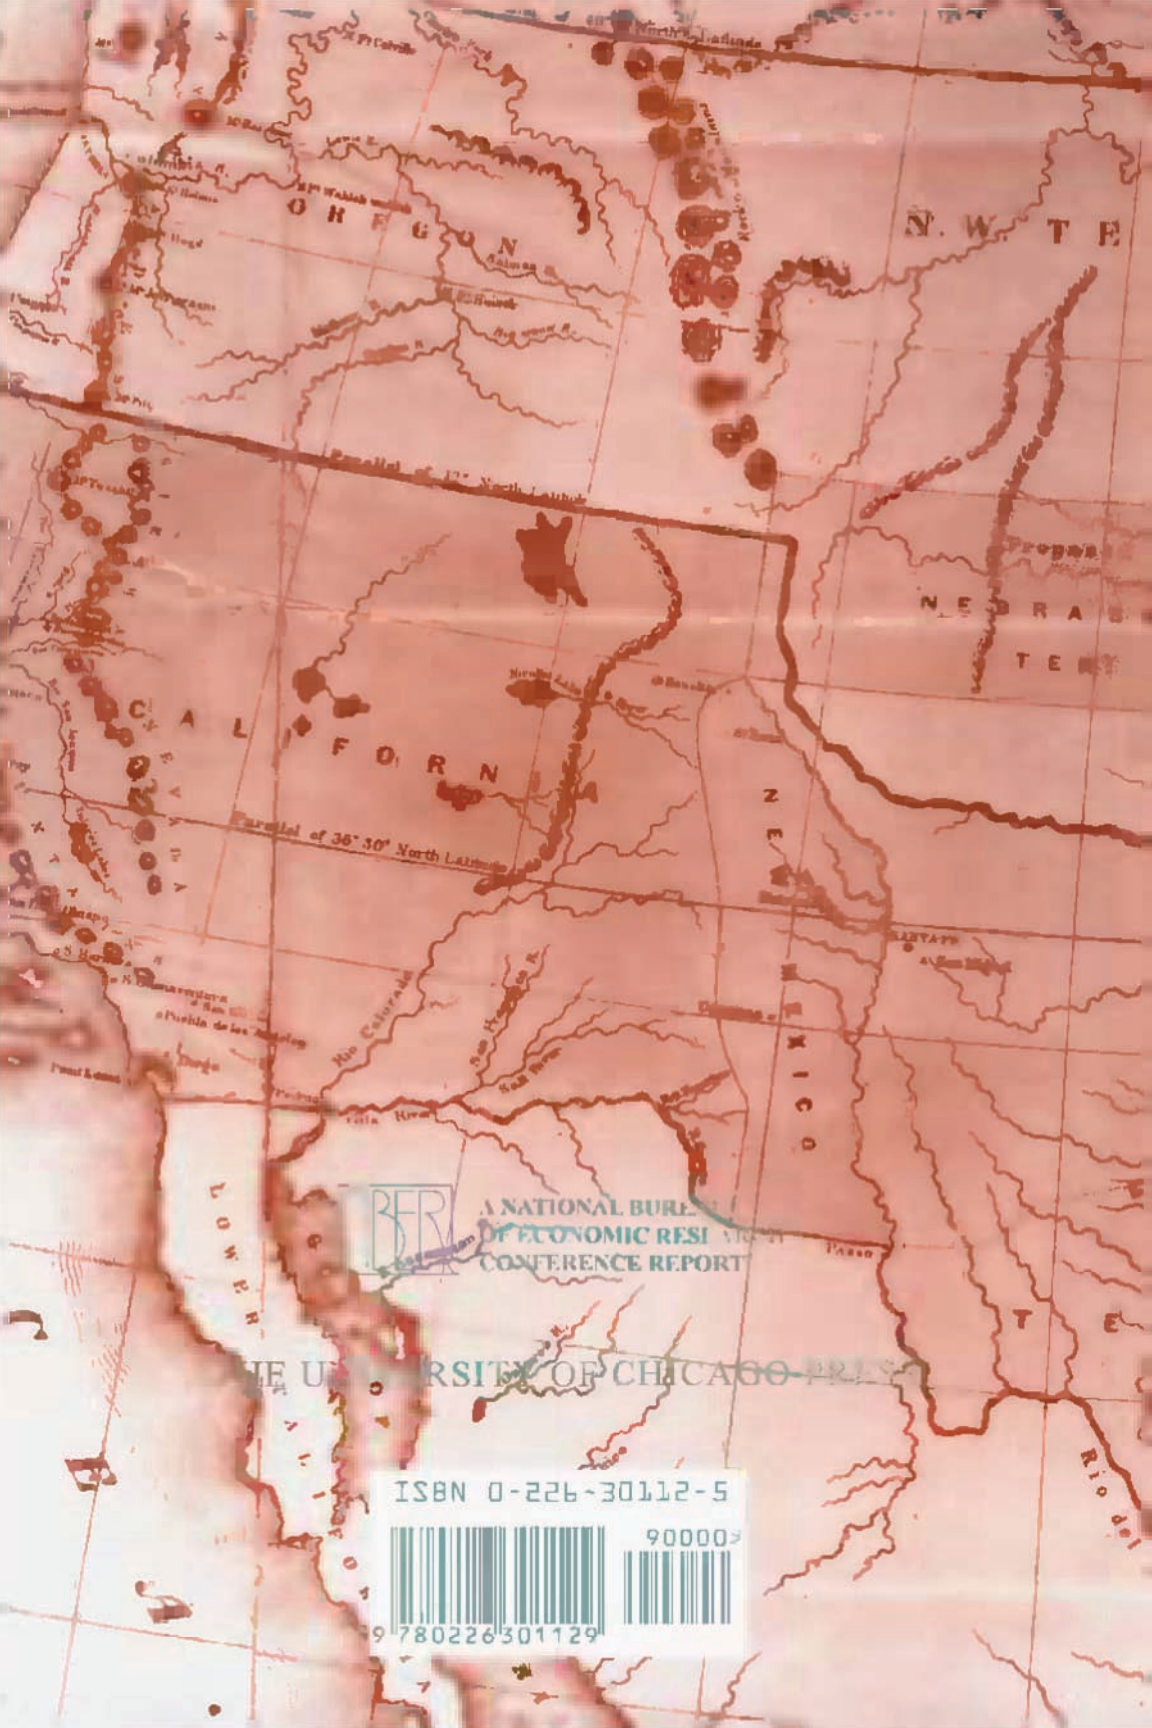

- Agricultural sector: effect on labor markets, 90; exogenous shocks (1830s–1850s), 47–53, 62; growth in 1839–60 period, 294, 326; labor shift out of (1810–60), 59, 370; price impact on wages (1820–60), 47–53; seasonality of employment in, 112–21
- Artisans: wages (1820s–1850s), 76–77, 80
- Availability doctrine, 192
- Bank Act (1874) regulations, 211–12
- Banking system: antebellum rates of return to equity, 180–82; antebellum structure of, 189; effect of Civil War on, 182–84, 1987; role in decline of antebellum fertility, 367–68, 370–72
- Bank panics, 44, 52, 67–68, 173, 212–13
- Banks, national: credit policy of, 191–93; investment of reserves of, 190–91, 211–20; loans during period of, 213; postbellum problems of national, 189; state bank notes of, 189. *See also* Availability doctrine; Credit rationing; Real bills doctrine
- Bargaining model, parent-child: to explain fertility decline, 356–57; proxies of conceptual variables for, 360
- Bills of exchange, 179–80
- Business cycles. *See* Cyclical fluctuations
- Call loan market: effect on stock market of, 211–13; investment of national banks in, 190–91, 211–13
- Canal construction, Canada, 404
- Capital markets. *See* Financial markets
- Central bank: role according to credit and money views, 194; when absent, 89–90, 194–96
- Children: price of quality and quantity of, 377–82, 393. *See also* Free black children; Slave children
- Civil War: effect on financial markets of, 182–84, 187; life expectation during and after, 281–82, 284, 293
- Clerks: wages (1820s–1850s), 73, 76–77, 80
- Cointegration analysis, 86–87
- Communications technology, 436–37
- Comptroller of the Currency, 189
- Consumption levels, Northeast (1820–60), 33
- Contract labor: in England, 106–7; factors contributing to rise of, 3; increase in New England of, 107; seasonal wage differentials for, 120–21; wage comparison with day labor, 122–23; wages and other remuneration of, 122–23. *See also* Day labor
- Credit rationing, 191–92; equilibrium theory of, 192; in national banking era, 213–14; when used by banks, 190
- Crisis of 1825, 67
- Cyclical fluctuations: advancement of wages during (1830s–1850s), 47–53; effect on employment and economic activity, 67–69; monetarist and credit-rationing views of, 194
- Data sources: for estimates of nominal wages, 35; family histories as, 271–76; for farm labor analysis, 110–12; for farm tenancy analysis, 137–43; for fertility decline

- Data sources: (*continued*)
 analysis, 384–85, 394–95; for interest rate analysis, 161–64, 174; for instrumental wealth variables, 396–97; for manufacturing worker market, 31; for marital fertility analysis, 352; for nutrition of slave children, 299–301; for price indexes (1820–60), 40–41, 62–65; for slave family analysis, 331–32; for study of nutritional adequacy for slaves, 298; for Utah precedence and wealth analysis, 227–31; for wages, prices, and labor market analysis, 70, 73, 75–76
- David-Solar index, 41, 62
- Day labor: decline in America, 107; distinction from contract labor, 106; wage comparison with contract labor, 121–23
- Economic growth: in Northeast (1820–60), 32; in 1839–60 period, 294, 296. *See also* Agricultural sector; Manufacturing sector
- Economic shocks: action of central bank for, 194; analysis of transmission mechanism for, 196–211; factors influencing transmission of, 193–96; persistent effects on real wages of, 80–89, 92–93; transmission with gold standard, 183, 194–95
- Education: availability of public, 381; effect on family size, 357–58
- Embargo of 1807, 67, 69
- Factors of production (1820–60), 33
- Farm labor. *See* Agricultural sector; Contract labor; Day labor; Free labor; Labor market
- Farm tenancy: characteristics of, 138–43, 147–50, 155; doctrine of inefficiency of, 136; economic rationale for, 135–37; efficiency of production under, 136–37; estimates of productivity under, 150–56; market-equilibrium model for, 143–47; speculator and agricultural ladder theses of, 136, 144, 146–47, 149–50, 155; valuation of output, input, and productivity, 141–42
- Federal Reserve Act (1913), 222
- Federal Reserve Bank, 192–94
- Fertility: child-woman ratio as indirect measure of, 353–55; controls for, 357–58, 377; decline in America of, 351, 375–77; financial-institutions hypothesis of, 361; hypotheses of long-term decline in, 355–59, 362–67, 372; occupational patterns of, 359, 370–71; possible influences on, 355–62; quantity-quality model, 380; relationship to wealth of, 389, 391–94; suggested research in, 373–74; target-bequest model, 382–84
- Financial-institutions hypothesis, 361, 372, 374
- Financial markets: antebellum and postbellum integration of, 186–87; crises during national banking era, 212–13; integration in U.S. of, 187. *See also* Bank panics
- Free black children: height compared with slave children, 304, 321–33, 324; height differentials between boys and girls, 326
- Free labor, 105–6, 110
- Gallman-Berry index, 87
- Gold dollar, 183
- Gold standard, 183, 194–95
- Gold Standard Act (1900), 159
- Government, a model of, 430–34
- Greenback dollar, 183–84
- Height: causes of decline in, 31, 326; decline for free black males and whites, 326; differences in rural and urban, 328; regional pattern of slave (Maryland sample), 316–21; of slave children, 299, 321–22; of slaves, 304–16, 327. *See also* Nutritional status
- Immigration: effect on real wages, 44, 60, 62; in 1839–60 period, 294; possible effect on mortality rates, 295; probable effect on fertility rate, 371
- Income distribution, colonial and early national periods, 30
- Information: adjustment with imperfect, 90–92; effect of asymmetric, 192
- Infrastructure development (1820–60), 34
- Interest groups, transregional, 435–37
- Interest rates: antebellum integration of short-term, 166–78; calculation of proxy, 165–66; cross-sectional analysis (1850–54), 175–78; differences in regional (1814–1914), 184; expected antebellum, 160; measuring differentials in, 163–64, 184–86; postbellum regional differences in, 183–84; postbellum variation of short-term, 159–60, 172. *See also* Banking system; Bills of exchange; Usury laws
- Interstate Commerce Commission (1887), 436

- Labor contracts: in England and America, 106–7; motivation for, 107–9, 112; possible effect on agricultural labor force, 114
- Labor market: demand in Midwest land boom, 91; demands of (1820–60), 32–34; effect of immigration on supply, 44; factors influencing flexibility in, 90; measuring competition in, 58–60; mobility in (1820–60), 58–60; mobility to capture high wages, 30, 449; segmentation in farm, 123–30; skilled and unskilled in, 33–34, 56, 58, 61–62. *See also* Agricultural sector; Contract labor; Day labor; Free labor
- Labor unions: activity in large cities of, 458–59; effect on urban wage differentials of, 452–55
- Laborers: wages (1820s–1850s), 76, 80
- Land-availability model: number of births controlled by, 355–56; proxies of conceptual variables for, 360; test against alternative hypotheses, 363. *See also* Target-bequest model
- Lender of last resort: absence in antebellum period, 90; Federal Reserve Bank as, 194; in national bank era, 195
- Life-cycle transition model: to explain fertility decline, 357–58; proxies of conceptual variables for, 360–61
- Life expectation: during and after Civil War, 281–82, 284, 293; antebellum, 268–70, 281, 284, 293; colonial period, 269; estimates of cohort, 277–79; factors in antebellum reduction in, 294–96; of migrants and non-migrants, 287–94; regional comparisons (before 1900), 284–90, 293. *See also* Mortality rates
- Life tables, 270–71, 275–76, 282–84
- Louisiana Certificates of Good Character, 325
- Manufacturing sector: growth and changes in Northeast (1820–60), 32–34; increased division of labor in, 33, 46–47; productivity of (1820–60), 33
- Maryland Certificates of Freedom, 302–3
- Migrants: to cities (1820–60), 59–60; life expectations (before 1900), 288–90, 293; separation in analysis from non-migrants, 285–87; to and within Utah (1860–70), 231–32, 239–40. *See also* Life expectation
- Migration: effect on federal patronage of, 434–35; effect on fertility of westward, 357; effect on mortality of westward, 268, 285–87, 294
- Monetary forces, antebellum, 89–90. *See also* Signal processing theory
- Money and credit: credit model, 201–5; empirical evidence for actions of, 196–99, 221–22; hybrid credit model, 208–11; hybrid monetarist model, 205–8; monetarist model, 199–201
- Mortality rates: analysis of trends (1760–1880), 276–284; of children in antebellum period, 371–72; comparison of male and female, 268, 290–94; differences in rural and urban areas, 294–95; effect of nutrition on, 294–95; family histories as data source for, 274–75; in 1840–60 period, 296; regional differences in, 268, 284–90
- Napoleonic Wars, 67
- National Banking Act (1863, 1865): effect of, 186–87, 189; rationale for, 189
- National banking era: factors influencing shock transmission during, 194–96; monetarist and credit-rationing views of, 189–90, 195–96, 221–22; relation of reserves to bank loans during, 211–20. *See also* Banks, national; Banking system; Credit rationing; Economic shocks; Money and credit
- Nutritional status: in antebellum period, 307, 326; decline for females (1820–60), 329; effect of, 297; limits to information about slave, 298–300
- Open market operations, 192–94
- Panic of: 1819, 67, 173; 1837, 44, 52, 67–68; 1857, 67
- Patronage: explanations for decline of, 7, 441–45; as form of political transaction, 445; pattern of urban, 438–41, 445; rise and decline of federal, 434–38
- Patronage machines: common explanation for existence of, 427–29; Progressive explanation of, 429–30
- Persistence rates: link to precedence rate of, 226; measurement of, 225; in Utah counties (1860–70), 232–37
- Political activity, of construction workers, 463–64. *See also* Labor unions
- Political machines: role in large cities of, 7, 455–60; union alliances of, 460–63

- Political transactions, 431–32, 441, 455–57.
See also Public works
- Population: colonial, 247; growth in Utah (1860–70), 231. *See also* Fertility; Life expectancy; Migration; Mortality; Persistence rates; Precedence rates
- Precedence rates: measurement of, 225–26; in Utah counties (1860–70), 232–37
- Price fluctuations, antebellum period, 89–90
- Price indexes: construction for manufacturing workers market, 62–65; construction for wage-price analysis, 101–4; construction for antebellum, 101–4; for real wage estimates (1820–60), 39–44
- Property, personal, 252, 260–62
- Public works, 460
- Quantity-quality model: comparison with target-bequest model, 383; creating data sample for, 394–97; description of, 377–80; estimating fertility equation, 386, 388–91, 393; estimating wealth equation, 391–94; to understand declining fertility, 375–82
- Railroads, Canada: discounted bonds as financing for, 417–21; legislation related to, 404–5; loan guarantees as financing for, 7, 402–5, 408–9, 413–15, 417–22; private profitability of, 7, 401–2, 407–15, 417, 422; role of government in financing, 7, 402–5, 407–8, 417–22; social profitability of, 7, 415–17, 422; subsidies as financing for, 7, 403, 407, 412–15, 419, 422
- Real bills doctrine, 191
- Servants, indentured, 252
- Servants-in-husbandry. *See* Contract labor
- Sharecropping. *See* Farm tenancy
- Shocks. *See* Economic shocks
- Signal processing theory (Lucas), 90–92
- Slave children: effect of different family types on, 349–50; growth patterns and heights of, 299–300; height compared to free black children, 324; height differences among, 323; height of, 299, 304, 321–22, 325; nutritional differences of rural and urban, 323; separated from parents, 339–44, 349–50. *See also* Height; Nutritional status; Slave family
- Slave family: permanence of, 345, 349–50; single-parent, 334–38, 346–49; two-parent consolidated, 332–33, 338–39, 343, 346–47, 349–50; two-parent divided, 333–34, 343, 346–47, 349–50
- Slave household distribution, 346–47
- Slavery: effect on free labor markets of, 90; profitability of, 160–61, 180–82
- Slaves: age of marriage of, 344; heights of all, 327; personal property of, 252
- Standard of living: measurement of, 267; of slaves, 297–98
- Stock market: crashes during national banking era, 213; effect on call loan market of, 191, 211. *See also* Banks, national; Call loan market
- Strikes, labor, 92
- Target-bequest model: effect on size of family, 356; as explanation of fertility decline, 382–84, 393
- Technology advancement in manufacturing, 33–34
- Urban areas: labor unions in, 458–59; migration to, 59–60; mortality rates in, 294–95; politics in, 7, 438–41, 445, 455–60; nutrition of slave children in, 323; wages in, 35–47, 53–58, 452–55. *See also* Labor market
- Usury laws, 178–80. *See also* Bills of exchange
- Wage differentials: in construction crafts, 447–50, 452–55; contract and day labor, 121–23, 126–27; regional, 448–49; for seasonality, 120–21
- Wage indexes, 101
- Wages, nominal: convergence of, 35, 37; differentials and levels of antebellum, 76–80; estimates for differentials (1820–60), 35–39, 41
- Wages, real: advances with cyclical changes for, 47–53, 62; in agricultural sector (1820–60), 52; analysis of variation in, 53–58; convergence of, 54–56, 60; differentials in manufacturing, 31–32; estimates for (1820–60), 39–47, 61–62; impact of Midwest land boom on, 91; lag of, 92–93; multivariate analysis of, 53–58; persistent effects of economic shocks on, 80–89; rise in levels of antebellum, 30; rise in periods of unemployment, 91
- War of 1812, 67

- Wealth: effect on family size of, 358–59; fertility relationship to parental, 389, 391–92; increase in 1860–70 period, 393;
- Wealth, colonial: of men and women, 254–63; ratio of female to male, 248; valuation of, 251–52
- Wealth, household: correlation between duration and, 237–41; distribution in (1860 and 1870), 239; duration of residence as determinant of, 226, 232–37
- Williamson index, 41, 62
- Women, colonial American: activities, 245–48; property rights, 248–51, 254; wealth, 255–63
