TECHNICAL PAPER 9
STUDIES IN CAPITAL FORMATION AND FINANCING
NATIONAL BUREAU OF ECONOMIC RESEARCH, INC. 1954
This paper is derived from a joint study of capital formation and financing in residential real estate by the Institute for Urban Land Use and Housing Studies, Columbia University and the National Bureau of Economic Research, Inc. The study is part of a large investigation of trends and prospects in capital formation and financing made possible by a grant from the Life Insurance Association of America.
NATIONAL BUREAU OF ECONOMIC RESEARCH

OFFICERS, 1953
Harry Scherman, Chairman
C. C. Balderston, President
Percival F. Brundage, Vice President
George B. Roberts, Treasurer
W. J. Carson, Executive Director

DIRECTORS AT LARGE
Donald R. Belcher, Assistant Director, Bureau of the Budget
Wallace J. Campbell, Director, Cooperative League of the USA
Albert J. Hettinger, Jr., Lazard Frères and Company
Oswald W. Knauth, Beaufort, South Carolina
H. W. Laidler, Executive Director, League for Industrial Democracy
Shepard Morgan, New York City
C. Reinold Noyes, Princeton, New Jersey
George B. Roberts, Vice President, The National City Bank of New York
Beardsley Ruml, New York City
Harry Scherman, Chairman, Book-of-the-Month Club
George Soule, Bennington College
N. I. Stone, Consulting Economist
J. Raymond Walsh, New York City
Leo Wolman, Columbia University
Theodore O. Yntema, Vice President-Finance, Ford Motor Company

DIRECTORS BY UNIVERSITY APPOINTMENT
E. Wight Bakke, Yale Gottfried Haberler, Harvard
C. C. Balderston, Pennsylvania Clarence Heer, North Carolina
Arthur F. Burns, Columbia R. L. Kozelka, Minnesota
G. A. Elliott, Toronto Paul M. O'Leary, Cornell
Frank W. Fetter, Northwestern T. W. Schultz, Chicago
H. M. Groves, Wisconsin Jacob Viner, Princeton

DIRECTORS APPOINTED BY OTHER ORGANIZATIONS
Percival F. Brundage, American Institute of Accountants
S. H. Ruttenberg, Congress of Industrial Organizations
Murray Shields, American Management Association
Boris Shishkin, American Federation of Labor
W. Allen Wallis, American Statistical Association
Frederick V. Waugh, American Farm Economic Association
Harold F. Williamson, Economic History Association

RESEARCH STAFF
Solomon Fabricant, Acting Director of Research
Geoffrey H. Moore, Associate Director of Research
Moses Abramovitz Daniel M. Holland
Harold Barger Thor Hultgren
Morris A. Copeland Simon Kuznets
Daniel Creamer Clarence D. Long
David Durand Ruth P. Mack
Milton Friedman Raymond J. Saulnier
Raymond W. Goldsmith Lawrence H. Seltzer
Millard Hastay George J. Stigler
W. Braddock Hickman Leo Wolman
F. F. Hill Herbert B. Woolley
1. The object of the National Bureau of Economic Research is to ascertain and to present to the public important economic facts and their interpretation in a scientific and impartial manner. The Board of Directors is charged with the responsibility of ensuring that the work of the National Bureau is carried on in strict conformity with this object.

2. To this end the Board of Directors shall appoint one or more Directors of Research.

3. The Director or Directors of Research shall submit to the members of the Board, or to its Executive Committee, for their formal adoption, all specific proposals concerning researches to be instituted.

4. No report shall be published until the Director or Directors of Research shall have submitted to the Board a summary drawing attention to the character of the data and their utilization in the report, the nature and treatment of the problems involved, the main conclusions and such other information as in their opinion would serve to determine the suitability of the report for publication in accordance with the principles of the National Bureau.

5. A copy of any manuscript proposed for publication shall also be submitted to each member of the Board. For each manuscript to be so submitted a special committee shall be appointed by the President, or at his designation by the Executive Director, consisting of three Directors selected as nearly as may be one from each general division of the Board. The names of the special manuscript committee shall be stated to each Director when the summary and report described in paragraph (4) are sent to him. It shall be the duty of each member of the committee to read the manuscript. If each member of the special committee signifies his approval within thirty days, the manuscript may be published. If each member of the special committee has not signified his approval within thirty days of the transmittal of the report and manuscript, the Director of Research shall then notify each member of the Board, requesting approval or disapproval of publication, and thirty additional days shall be granted for this purpose. The manuscript shall then not be published unless at least a majority of the entire Board and a two-thirds majority of those members of the Board who shall have voted on the proposal within the time fixed for the receipt of votes on the publication proposed shall have approved.

6. No manuscript may be published, though approved by each member of the special committee, until forty-five days have elapsed from the transmittal of the summary and report. The interval is allowed for the receipt of any memorandum of dissent or reservation, together with a brief statement of his reasons, that any member may wish to express; and such memorandum of dissent or reservation shall be published with the manuscript if he so desires. Publication does not, however, imply that each member of the Board has read the manuscript, or that either members of the Board in general, or of the special committee, have passed upon its validity in every detail.

7. A copy of this resolution shall, unless otherwise determined by the Board, be printed in each copy of every National Bureau book.

(Resolution adopted October 25, 1926 and revised February 6, 1933 and February 24, 1941)
ACKNOWLEDGMENT

The author is indebted to the many people who have been of assistance in the preparation of this paper. In particular, he wishes to express his appreciation to H. E. Riley, Chief of the Division of Construction Statistics, Bureau of Labor Statistics, for the opportunity to make use of the unpublished historical data on building permits, which are the basis for the new estimates of residential construction presented here, and to Henry F. Haase, of the Division of Construction Statistics, who supervised the transcription and summarization of the permit data for this project and whose knowledge and experience in the field of construction statistics aided immeasurably in the development of the new series. Marvin Wilkerson of the Division’s staff and Milton Lipton of the New York office of the Bureau of Labor Statistics also made many helpful suggestions.

The author is grateful to Allan F. Thornton, Director of the Division of Research and Statistics, Federal Housing Administration, for permission to use unpublished FHA data on deeds recorded in three California counties.

W. Braddock Hickman of the National Bureau of Economic Research gave generously of his time in supervising the IBM tabulation of the building permit and population data. Clarence D. Long, Jr., Millard Hastay, Raymond W. Goldsmith, Geoffrey H. Moore, and Solomon Fabricant of the National Bureau aided greatly in improving the manuscript. The charts were drawn by H. Irving Forman.

The author’s thanks are also due to the members of the Institute for Urban Land Use and Housing Studies: to Ernest M. Fisher, Director of the Institute, for encouragement in pursuing this project; to Leo Grebler, whose careful review of the estimating procedures and the final manuscript enabled the author to avoid many pitfalls; to Louis Winnick and Chester Rapkin for many valuable suggestions as to method and analysis; and to James B. Hendry of the Institute staff, who performed the bulk of the computations and whose unfailing energy and conscientiousness were of invaluable aid.

The author, of course, is solely responsible for any errors of technique or interpretation which may remain in the paper.

D. M. B.
## CONTENTS

**INTRODUCTION**

1. **PURPOSE AND SCOPE**

2. **THE BEHAVIOR OF RESIDENTIAL CONSTRUCTION, 1889-1950**
   - Number of New Housekeeping Dwelling Units Started
   - Changes in Type of Structure
   - Expenditures for New Housekeeping Dwelling Units
   - Average Expenditure per New Housekeeping Dwelling Unit
   - Expenditures for New Nonhousekeeping Residential Facilities

3. **SUMMARY OF ESTIMATING TECHNIQUES**

4. **COMPARISON OF NEW FINDINGS AND EARLIER ESTIMATES**
   - Dwelling Unit Estimates
   - Estimates of Expenditures for Housekeeping Dwelling Units

5. **DERIVATION OF THE NEW ESTIMATES**
   - Estimates of Urban Residential Construction Based on Population Relationships
   - Estimates of Urban Residential Construction Based on Change in Population Relationships
   - Comparison of Urban Estimates with Basic Sample Data
   - Estimates of Nonfarm Dwelling Units Started
   - Two Basic Assumptions in Expansion Procedure
   - Estimates of Permit Valuation of Nonfarm Dwelling Units Started
   - Adjustment for Undervaluation
   - Adjustment for Preliminary and Other Costs
   - Conversion to Work Put in Place
   - Lags, Lapses, and Under-reporting
   - Estimates of Nonhousekeeping Residential Construction Expenditures
     - The Problem of Linking the Series
     - Linking the Housekeeping Residential Construction Series
     - Linking the Nonhousekeeping Residential Construction Series
     - Extrapolation of Series
     - Type of Structure Estimates
APPENDIX

A Tables on Residential Construction, 1889-1950 67
B Description of Procedure for Obtaining Estimates of Urban Residential Construction Based on Population Relationships 79
C Derivation of Decade Population Change Estimates 80
D Derivation of the Annexation Adjustment 82
E Description of Procedure for Obtaining Estimates of Urban Residential Construction Based on Population-Change Relationships 86
F Description of Adjustment for Lapses in Permit Applications 89
G Analysis of Wickens' Estimating Technique 92
H Regional Estimates of Urban Residential Construction 93
