The Structure and Evolution of Recent U.S. Trade Policy

Edited by Robert E. Baldwin and Anne O. Krueger

This volume represents the first systematic effort to analyze specific U.S. trade policies, particularly nontariff measures. It provides a better understanding of how trade policies operate, of how effective they are, and of their costs and benefits to trading nations.

Population and Economic Change in Developing Countries

Edited by Richard A. Easterlin

“This is an extremely important book which contains a number of uniformly excellent papers on a variety of topics relating, to various degrees, to the nexus of demographic-economic interrelationships for presently developing countries” —William J. Serow, *Southern Economic Journal*

“An outstanding work of its kind, with unusually good, well-edited papers and . . . a high regard for facts. It is an important landmark in the growing field of economic demography.” —Dudley Kirk, *Journal of Developing Areas*
