# Subject Index

- Accident year, 36
- Accounting, accrual: post-TRA84, 43; pre-TRA84, 41–43
- Accounting, nominal economic income, 37–39; break-even spot prices under, 46, 49–51, 56–65, 67; income of insurance industry under, 37–38
- Accounting, statutory: break-even premiums or prices, 53–54, 56–65; break-even spot prices with, 46–51; pre-TRA86 break-even spot prices under, 37–39, 67–68
- Adverse selection, 83–84
- All-events test, 41–43
- Assigned risk pools: in auto insurance, 82, 86, 94–95; insurance premium effect on, 101–3; insured cars in California, 104
- Auto insurance: decision to purchase voluntary or assigned risk, 101–3; differences in state-level rate regulation of, 113; effect of premiums, 95–105; effect of rate regulation on premiums and costs, 95–105, 119–21; personal and commercial physical damage, 173–75, 179–80; rates under California's Proposition 103, 3, 81; risk tiering, 85–86; written by mutual companies, 173. *See also* Assigned risk pools; California, Proposition 103; Motorists; Rate regulation
- Auto insurance industry: exit with rate suppression, 95; industrial organization of, 115–19; special features of, 91–92; unregulated, 83
- Auto insurance market: effect of regulation on structure, 132–35; national, 116–18; private passenger (1989), 115–16; rate regulation effect on structure of, 121–25; regulation effect on entry and exit, 95, 119–21, 127, 129–31; state-level, 115t, 118–19; structure by state regulatory status, 121–25
- Best's stock index, 9
- California: Earthquake Authority, 108; pre-Proposition 103 auto insurance industry, 83
- California, Proposition 103: changes required by, 86–87; rate compression, 82; regulatory changes related to insurance rates, 81, 120, 122; risk rating under, 94; voting pattern on, 105–7
- Capacity: ratio of premium revenue to net worth, 19–20; relation of financing to, 19–20; stock insurance companies, 8–9
- Capital: internal financing as source of, 9–12; raising external, 13; of stock and mutual insurance companies, 2, 10–12, 167–69
- Capital shortages: conditions for property-casualty insurers', 24–25; effect on insurance industry, 5–6
- Commercial multiple peril insurance, 173–75, 178
- Contracts, auto insurance, 86
- Crescent Wharf & Warehouse Co. v. Commissioner* (1975), 42n10

- Data sources: analysis of firm financing behavior, 13; for comparison of stock and mutual insurance companies, 173; for costs of insolvencies for guarantee fund systems, 162; effect of regulation on auto industry market structure, 136–37; for estimate of insolvency costs to guarantee funds, 143–44; property-casualty stock returns, 9; rate regulation in auto insurance, 109–10
- Debt issues: announcement effect of, 24; as insurers' external financing, 15–17; stock price response to insurance company, 24
- Deductions: loss reserve, 46; using pre-TRA84 accrual accounting method, 41
- Demand: for insured and uninsured cars, 100–101; for registered cars, 99–100, 107–8
- Discounting: break-even spot prices with discounted loss reserves, 68–70; in determining spot price, 53, 55–56; loss reserve deductions, 39–40; loss reserve with taxes, 65–67; reserve discount factors, 56
- Dividends: payout ratio, 10–12; share repurchases as alternative to, 12
- Economic performance rule, TRA84, 43–44
- Equity: returns of stock insurance companies on, 9; share repurchase as alternative to dividends, 12
- Equity issues: announcement effect of, 19–24; as external financing for stock insurance companies, 6–7; as insurers' external financing, 13–15; market price reaction to insurer's, 22–23; stock price response to insurance company, 21–25; voluntary and involuntary, 22
- Fairness: across risk categories, 90; as factor in rate regulation, 3, 89–91; perceived, 89; premiums for insured motorists, 92–94; questions of perceived, 108–9; risk tiering, 86; in voting for California insurance regulation, 107–8
- Farmowners, 59, 61, 63
- Financing: costs of internal, 9–12; relation of industry capacity to, 19–20; sources of insurers' external, 13; U.S. corporation internal, 9–10
- Financing, property-casualty insurers: with capital shortages, 5–6; cost of external, 6–7; pattern of external, 13–19
- Guarantee Fund Management Services, 162
- Guarantee fund system: assessment of member firms, 142–43; costs in resolving insurer insolvencies, 162–64; organization and administration of, 141–43; payments to policyholders, 142–43; state protection of property-casualty policyholders, 139–41; time path for payments and costs, 144–55
- Homeowners multiple peril insurance, 173–75, 178
- Income: economic, 37; insurer's net investment, 39; investment income of insurance company, 35–36, 39; nominal economic, 37; underwriting, 35–36, 38–39, 46
- Income tax treatment: property-casualty insurers (1980s), 29; before TRA86, 38
- Insolvency, insurance firms: costs compared to bank insolvency costs, 163–64; determinants of costs, 157; guarantee fund system, 139–43; related to disaster, 160–61; time path of net costs to guarantee funds, 143–55; total costs to guarantee fund, 155–57
- Insurance: farmowners, 59, 61, 63; general liability, 57, 61–62, 173–75, 178; high-price, restricted supply phase of cycle, 5; homeowners multiple peril, 173–75, 178; hurricane and earthquake, 108; medical malpractice, 58, 61, 63, 150, 173–75, 179; personal auto liability, 57, 61–62, 173–75; workers' compensation, 58, 61–63, 150
- Insurance industry: income under statutory and nominal economic income accounting, 37–38; membership in guarantee fund associations, 142–43; risk classification by, 92; total annual income, 35–36; underwriting profitability, 181. *See also* Mutual insurance companies; Property-casualty insurers; Stock insurance companies
- Insurance policy: accounting for spot policy, 34–36; accounting for standard policy, 36; as contingent contract, 29; losses covered by spot or standard policy, 31–34; premium for standard policy, 31–32; price and quantity, 30; spot policy cumulative loss payments, 32; time structure of, 72–74; unit policy and unit single-

- payment policy, 32–34. *See also* Spot policy; Standard policy
- Internal Revenue Code (IRC): subchapter L for property-casualty insurers, 38–40
- Legislation: McCarran Ferguson Act, 113; proposed pricing of shoreline insurance, 108; Proposition 103, California, 81–83, 86–87, 94, 105–7, 120, 122; Tax Reform Acts (1984, 1986), 17, 30–31, 39–40, 43–44
- Liabilities: pre-TRA84 deferrals, 41–44; tax treatment under TRA84, 41–44
- Liability insurance, 57, 61–62, 173–75, 178
- Losses: loss payments, 32; loss profiles, 32–33, 51–53
- Loss ratios: defined, 177; as measure of firm's behavior, 182, 187–91; preregulation in auto insurance industry, 86; stock and mutual companies (1984–91), 175–77
- Loss reserves: deductions for, 39–40, 46; discounted and undiscounted, 35, 40; discounted break-even spot prices with, 68–70; discounting with taxes, 65–67; reserve discount factors, 56; of spot policy, 35
- McCarran Ferguson Act (1945), 113
- Market share: effect of regulation on, 120–21, 127, 129–31; national auto insurance market, 116–18; of national firms in regulated and unregulated states, 124–25; state-level auto insurance, 118–19
- Massachusetts: rate suppression by tempering, 82, 88, 94–95, 107–8
- Medical malpractice insurance, 58, 61, 63, 150, 173–75, 179
- Moral hazard: of guarantee fund system, 140, 158–61; mutual insurance companies, 172
- Motorists: effect of insurance premiums on uninsured, 97–99; uninsured motorists in Pareto-dominated regulated market, 92–94; welfare effects with uninsured, 95–97
- Mutual insurance companies: change in importance (1984–91), 175; differences from stock insurance companies, 170–73; forms of, 170; loss ratios (1984–91), 175–80; mid-nineteenth-century emergence and development, 172–73;
- property-casualty insurance industry, 167–68; size compared to stock companies, 173–74
- National Association of Insurance Commissioners (NAIC): data on property-casualty insurance companies, 173; guarantee fund proposal, 142
- National Conference of Insurance Guarantee Funds (NCIGF), 143–44
- Payments: loss payments and cumulative loss payments, 32; time path of guarantee fund, 144–54; unit single-payment policy, 33–34. *See also* Guarantee fund system
- Payouts: payout ratio of property-casualty insurers (1972–90), 10–12; relation to capital of property-casualty insurers, 12–13
- Policyholders: claims paid by guarantee funds, 139, 143; as owners of mutual insurance companies, 167–70, 177, 180–81; in stock insurance companies, 169
- Premiums: assessments levied by guarantee fund associations, 139–40, 142–43; charged for auto assigned risk pools, 82; earned during accident year, 36; earthquake insurance, 108; effect of auto insurance, 95–105; high- and low-risk drivers, 84; hurricane insurance, 108; mutual insurance companies, 167–70; pay-at-the-pump initiative in California, 108; with Proposition 103 regulation, 86–87; revenue of property-casualty insurers, 19; spot and standard insurance policies, 31–36; standard policy calculations, 72–77; suppression of assigned risk pool, 95; tax on, 2–3; unearned premium reserve, 36, 40, 76–77; uninsured motorist, 98–99; used by insurer, 29–30. *See also* Prices
- Premiums, break-even: calculated spot premiums (1976–93), 56–59; earned, 77–78; predicted versus actual earned (1977–93), 60–65; of spot policy, 35; for standard policies, 60; under statutory accounting, 53–54
- Prices: of insurance policy, 30; of insurers under rate regulation, 119–21; of spot and standard policies, 33–34
- Prices, break-even, 40, 44–45; calculating spot, 67–72; post-TRA86 spot, 70–72;

- Prices, break-even (*cont.*)  
spot with and without taxes, 45–51; of standard policy, 74–76; under statutory and nominal economic income accounting, 56–65
- Product liability, 150
- Profiles, loss: normalized, 32; promulgated by IRS, 52; spot policy unit, 52–53; unit, 32, 51–52
- Profitability: property-casualty insurance industry, 7–8, 12–13; of underwriting by stock and mutual companies, 175–77, 181
- Property-casualty insurers: failures of, 139; major lines, 173–75; shorelining premiums, 108; stock and mutual companies, 167–69; tax treatment before TRA86, 38–40; undiscounted loss reserve deductions, 36–37
- Rate compression: California, Proposition 103, 82; conditions for, 90; in regulation of auto insurance rates, 81–82
- Rate regulation: differences in state-level auto insurance, 113; effect on auto insurance market structure, 121–25; effect on insurer underwriting margins, 113–14; factors influencing consumer initiatives for, 87–91; insurer responses to auto, 119–21; prior approval system, 113; property-casualty insurance markets, 113–14; shorelining in property-casualty insurance, 108; with tempering, 94–95; welfare effects, 95–105. *See also* Rate compression; Rate suppression
- Rate suppression: ceilings on premiums, 94; as form of insurance rationing, 95; in regulation of auto insurance rates, 81–82, 88; by tempering in Massachusetts, 82, 88, 94–95, 107–8
- Rate tempering, 82, 88, 94–95, 107–8
- Rationing, insurance, 95
- Regulation: auto insurance before, 83–86; of auto insurance industry, 81–82; effect on insurance premiums and costs, 95–105; property-casualty insurance markets, 113–14. *See also* Rate regulation
- Regulation, state-level: differences by state in, 113; differences in stock and mutual companies under, 181; effect on auto insurance companies, 3–4; guarantee fund systems, 142; Proposition 103 in California, 105–7
- Repurchases: of shares by U.S. firms, 12
- Reserves: deduction of loss, 35; discounted and undiscounted loss, 35, 40, 56; unearned premium reserve of standard policy, 36, 40. *See also* Loss reserves
- Risk: assigned risk pools in auto insurance, 86, 95, 101–3; classification in auto insurance, 91; distribution by stock and mutual companies, 177; as factor in rate regulation, 87–88; fairness across risk categories, 89–90; low- and high-risk buyers before auto insurance regulation, 83–86; tiering, 85–86. *See also* Moral hazard
- Shareholders: in mutual insurance companies, 181; payouts to, 10–12; relation of dividends to payout policy (1967–92), 12; in stock insurance companies, 6, 167, 170, 177, 180–81. *See also* Payments; Payouts
- Spot policy: accounting for, 34–36; concept of, 31; premiums, 33–34; as quantity of unit policies, 33
- Standard policy: accounting for, 36; as package of spot policies, 31, 34; premiums, 34; unearned premium reserve, 36; unit standard policy, 34
- States: differences in regulatory status related to auto insurance, 121–25; guarantee funds for property-casualty policyholders, 139–42
- Stockholders. *See* Shareholders
- Stock index, property-casualty companies, 9
- Stock insurance companies: capital of, 2; changes in importance (1984–91), 175; differences from mutual insurance companies, 170–73; dividend levels in relation to capital, 10–12; early nineteenth century, 172; loss ratios (1984–91), 175–80; performance of property-casualty insurers (1967–90), 7–9; property-casualty insurance industry, 167–68; size compared to mutual companies, 173–74; using internal or external capital, 6–7
- Stock market: hot and cold market periods, 14–15; price reaction to equity issues, 22
- Taxation: effect on break-even prices, 44–51; of income from spot policy, 34–36; of income from standard policy, 36; of mutual insurance companies, 170; pre-TRA84 deferrals, 41–44; property-casualty insurance companies, 38–44

### **The Economics of New Goods**

*Edited by* TIMOTHY F. BRESNAHAN *and* ROBERT J. GORDON

New goods are at the heart of economic progress. But the value created by new goods must somehow be converted into an exact quantitative measurement if official data on inflation, such as the Consumer Price Index, are to represent accurately the theoretical concept of a true “cost-of-living” index. The eleven essays in this volume include historical treatments of new goods and their diffusion; practical exercises in measurement addressed to recent and ongoing innovations; and real-world methods of devising quantitative adjustments for quality change.

### **Output Measurement in the Service Sectors**

*Edited by* ZVI GRILICHES

In this volume, leading experts from government and academia suggest that current measurement methodology may be underestimating the contribution of services to productivity growth in the economy as a whole. The contributors look at consumer price index, labor productivity indexes, wholesale and retail trade, the stock market, banking, education, day care, and transportation.
