COM. See Census of manufactures (COM)
Commodity production, 3, 496
Communication services: BLS productivity measures of, 81; productivity growth in, 91–92
Competition: among banks, 235–36, 284; effect on store size and market concentration, 175–80; full marginal cost in monopolistic, 173–74; in securities markets, 198–99
Computer investment: data for manufacturing sector, 442–45; effect on measurement of manufacturing input, 430–31, 459
Consumer: inventory model of demand, 170–73; may decide quality of service, 5–6; price of time expenditure by, 157, 317; role in distributive trade changes, 168–80, 185–88, 192. See also User cost
Consumer demand full-price model, 170–73
Consumer expenditure survey (CE), 113–16, 123, 140, 143, 145–46, 349
Consumer price index (CPI): home ownership measurement in, 121–22; improvements in measuring consumer services, 132–46; improvements in service sector items, 124–32; measures price changes, 111; quality in measures of, 111–13; quality of CPI series, 13; relation to cost-of-living index, 110–11; rental-equivalence technique in, 122–24, 139, 142–46; service items in, 116–21, 124–32; shift in services component of, 109; in United Nations International Comparison Project, 495; value of consumer service in, 142–46; weighting and item structure of, 113–15. See also Consumer expenditure survey (CE); Expenditure classes (ECs); Entry-level items (ELIs); Point-of-purchase survey (POPS)
Consumer services: developing hedonic models for, 134; future improvements in measurement of, 140–46; measuring user cost of, 142
Consumption, public, 519–21
Cost-function approach (MFP growth), 382–83
Cost function (bank), 257
Cost of living index (COL), 110–11
Country-product-dummy method (CPD), 495, 497
CPI. See Consumer price index (CPI)
Current point-of-purchase survey (CPOPS), 146

Data envelopment analysis (DEA), 257
Data sources: for analyzing real output of banks, 221; annual survey of manufactures (ASM), 432, 435, 449–50; for bank production model, 227, 231, 279; BLS examination for deficiencies, 76–78; for capital input in airline industry, 401; census of manufactures (COM), 432, 449–50, 456; for CPI health insurance pricing, 129–32; criticism of BLS collection for, 103; for day-care output analysis, 347–50, 363–66; FCA (functional cost analysis) program, Federal Reserve system, 250–51, 253–54; for foreign outsourcing, 445, 447; for industry output measurement, 75–76; longitudinal research data base (LRD), 431–32, 451; to measure lifetime labor income, 305; measurement errors in, 26, 69; need for expanded data collection by, 66–67; NIPA and BLS discrepancies, 374–81; for pricing of insurance, 137–38; problem of labor input, 77–78; for productivity in transportation sector, 374–81; quality of CPI series, 13; segments of service sector requiring improvement,
Subject Index

70; for services in ICP, 495–96; for transportation sector analysis, 374–82

Day-care industry: adjustment of output for quality, 358–60; output measurement for, 344–47; pricing of services in, 354; quality analysis of, 350–61, 366–67

DEA. See Data envelopment analysis (DEA)

Decontrol Act (1981), 284

Deregulation: of bank deposits, 252, 263; effect on airline industry, 408, 419; effect on banking, 235–36, 245–46, 271t, 273t, 275–77, 284; effect on stock exchanges, 198; effect on transportation industry, 380, 411–12, 416, 418

Diagnosis-related groups (DRGs), 140–41

Disaggregation method (in CPI construction), 118–21, 149–50

Dispersion: of cost in banking, 254–56, 275; of productivity and profitability in French firms, 474–83

Distance function: in bank output analysis, 227–29; estimating, 230–31; use for estimates of, 221–22, 242

Distributive trades: development of, 165, 168; differences in production function of, 188–89; growth of, 161–65; measuring services of, 193; productivity change in, 188–89; quality and composition of workforce in, 162–65. See also Grocery stores; Middlemen; Retail firms; Supermarkets

Double deflation procedure, 42–50, 62, 93, 95

DRGs. See diagnosis-related groups (DRGs)

Durable good theory: in automobile purchase, 142; for home ownership, 121–22. See also Flow-of services approach

Economic growth measurement, 314

Economic Statistics Initiative (1992), 67

Economies of massed reserves, 62; for retail firm production function, 169, 192–93

ECs. See Expenditure classes (ECs)

Education sector: differences in cost- and income-based estimates of, 315–16; estimates of investment in, 310–15; human capital as product of, 303; international comparisons of spending for, 499–501, 514–15; measuring output of, 317–20; productivity measurement for, 316; value in current and constant prices for, 328t, 329t. See also School enrollment

E-K-S method, 495, 497

Electric, gas, and sanitary services: BLS productivity measures for, 75, 81–83; productivity growth in, 91–93

ELIs. See Entry-level items (ELIs)

Employee hours index, 74–76

Employment data: of BLS and NIPA for transportation sector, 379–80; of Bureau of the Census, 76; requirement for improvement in, 71

Entry-level items (ELIs), 113–16, 118–20

Expenditure classes (ECs), 116–18

Externalities (banking), 245–46

FAA. See Functional cost analysis (FCA) program, Federal Reserve System

Fertility behavior, 316–17

Finance, insurance, and real estate service measure, 85, 87–89

Financial firm model, 223–26

Financial services, 220, 222–23; measurement and pricing of input and output of, 296–300. See also Banking

Financial services bundle, 220, 224–26

Flow-of-services approach, 122–24, 139, 142–46. See also User cost; Rental equivalence

Books of Related Interest

**International Economic Transactions**
Issues in Measurement and Empirical Research
*Edited by Peter Hooper and J. David Richardson*

This ambitious volume examines the quality of current data and analytical procedures and proposes innovative research designs and methods for data enhancement. Leading researchers discuss the measurement of international trade flows and prices, compare international levels of manufacturing output, and assess the extent to which the United States has fallen into debt to the rest of the world.

*NBER Studies in Income and Wealth. Volume 55*

**The Measurement of Durable Goods Prices**
Robert J. Gordon

Drawing data from *Consumer Reports*, the venerable Sears catalog, and industry sources, Gordon studies changes in the quality of durable goods—from autos and aircraft to televisions and tractors—and argues that the American economy is more sound than officially recognized. “An extremely impressive piece of work”—Timothy F. Bresnahan, *Business History Review*

*An NBER Monograph*

**Fifty Years of Economic Measurement**
The Jubilee of the Conference on Research in Income and Wealth
*Edited by Ernst R. Berndt and Jack E. Triplett*

Leading researchers address a broad range of theoretical and applied topics, review concepts and methods, and assess the adequacy of available data. Specific topics include productivity, prices and output, capital and labor, saving and taxation, as well as the use of economic data in policy analysis and environmental regulation.
