Acknowledgments

The papers and comments in this volume were presented at a joint National Bureau of Economic Research–World Bank conference held in Washington, D.C., 29 November through 1 December 1984. World Bank participation in the conference was organized by the Trade and Adjustment Division of its Country Policy Department. We would like to thank Armeane Choksi, the division’s chief, for his help and encouragement. We also thank William Branson, director of international studies at the National Bureau, for his help in organizing the conference. Finally, we are grateful to Kirsten Foss and Jennifer Lewis, who made every effort to make the conference a big success.

This volume is dedicated to the memory of Carlos Diaz-Alejandro, whose untimely death in 1985 has robbed the profession of one of its most brilliant and eloquent members. Carlos played an important role in this conference. He gave an excellent comment on Arnold Harberger’s paper. He also had a leading role in the roundtable discussion on “Exchange Rate Systems in Developing Countries” that took place during the conference. Carlos was a pioneer in the study of exchange rate problems in developing countries; his book *Exchange Rate Devaluation in a Semi-Industrialized Economy: The Experience of Argentina, 1955–1961* (MIT Press, 1966) has become a classic on the subject.

Any opinions expressed in this volume are those of the respective authors and do not necessarily reflect the views of the National Bureau of Economic Research, the World Bank, or any of the other sponsoring organizations.
