# Subject Index

- Accelerator effects, 70
- Arbitrage: capital mobility and, 365;  
parity levels and, 202, 321, 378–79
- Asset(s): defined, 54; financial  
institutions and, 365; futures, 197;  
real foreign position, 55;  
substitutability of, 12, 114, 124, 234,  
243–45, 249, 374n.3. *See also*  
Capital stocks; Foreign assets;  
Wealth
- Asset markets: capital mobility and, 259;  
equilibrium in, 203, 233, 237; fiscal  
expansion and, 230; intertemporal  
trade in, 198; shocks and, 157. *See also*  
Capital markets; Prices; *and*  
*specific assets*
- Balance of payments: central banks and,  
315; consumption tax and, 324, 329;  
depreciation and, 239; exchange rate  
and, 53, 320; fiscal expansion and,  
11; general equilibrium model, 15,  
309–48; inflation and, 347; interest  
rates and, 168; international reserves  
and, 321, 324, 326–32; monetary  
policy and, 340; money-in-utility  
function, 347; optimal tax policy for,  
14, 309–48; prices and, 165; targets  
for, 17, 326–31; tax policy and, 15,  
326, 332, 345; welfare costs and,  
330. *See also* Exchange rates;  
Exports; Imports; Trade balance
- Banking. *See* Central banks
- Bankruptcies, 143
- Barter economy, 334n.2, 335n.5
- Beggar-thy-neighbor policies, 91, 106,  
158, 184
- Bequests, 176, 193–94
- Blanchard's model, 26, 210
- Bonds: balanced budget expansion and,  
242; deficits and, 12, 25, 248;  
equilibrium condition, 233; fiscal  
expansion and, 247–59, 270; foreign  
taxes and, 234; future taxes and, 25–  
26; market transactions, 312;  
measurable return of, 379; wealth  
and, 25, 35–36, 233. *See also*  
Capital markets
- Borrowing: consumption and, 205, 331;  
governmental, 211; inflation and,  
333; international, 318, 320, 324,  
330; subsidies and, 329–30, 335n.9;  
taxes on, 15, 318, 320, 331, 333,  
335n.6, 336n.14, 341–42; temporary  
negative shocks and, 164. *See also*  
Government debt
- Bretton Woods system, 73, 75
- Bruno method, 356
- Bubble paths, 142–44, 167
- Budget(s): balanced expansion of, 236,  
239–47, 260, 268; and balanced  
multiplier theorem, 149; constraints  
on, 58n.7; demand implications of,  
68; macroeconomic bliss and, 90;  
structural balances of, 256; surplus,  
192; utility maximization and, 313

- Budget deficits: asset stocks and, 285; bequests and, 193–94; bond-financed, 12, 248; buffer shocks and, 119; capital flows and, 58n.10, 372; causes of, 289; countercyclical, 174–75, 192; current account and, 24, 209; cyclical adjustments in, 288–89, 304–5; debt neutrality and, 209–13; exchange rates and, 66; exports and, 176, 384; of Federal Republic of Germany, 21, 39–52, 178; fiscal expansion and, 138, 192; foreign aid and, 309; interest rates and, 24, 28, 64, 289; international transmission of, 209; investment levels and, 361; lump-sum taxes and, 11; monetary expansion and, 192; private consumption and, 281; private saving and, 32–33, 43–44, 368–69; reduction model for, 39–52; sharp rise in, 1; simulations for, 2; spillovers of, 68; targets for, 92; trade balance and, 174–75, 186; trade interventions and, 293–95, 304; underestimated, 3; U.S., 1–2, 21, 229; welfare and, 86, 274; zero, 87. *See also* Balance of payments; Government debt; Government spending
- Business cycle, 13, 174
- Canada, 175–76, 372
- Capacity output. *See* Output
- Capital: asset pricing model and, 262n.6; exports of, 371–72; and expropriation fears, 366; fiscal policy and, 186–89; immobility of, 351, 361, 364–66; intensity of, 355, 357, 359; interest elasticity of, 64–65; international reserve targets and, 334; labor ratio, 357; measurable return of, 379; output ratio, 357; trade interaction and, 188; user cost of, 69. *See also* Capital flows; Capital markets; Money supply
- Capital demand, 315, 328–29; consumption taxes and, 324, 333; function of, 153n.1; future effects of, 99; shadow value of, 328–30; stimulation of, 334; trade balance targets and, 345; utility and, 328; velocity shocks and, 105
- Capital flows: apparent mobility, 364–67; current account and, 24, 28; external balance hypothesis and, 370; fiscal contraction and, 132; fiscal deficit and, 58n.10; fiscal expansion and, 230; institutional factors and, 364; investment incentives and, 359–61; major disturbances to, 1; perfect mobility effects and, 82–83, 122–24, 352–61; restriction of, 351; savings and, 53, 350, 364, 376; in steady state, 263n.17; subjective uncertainties and, 366; tax reforms and, 17–18, 349; tradable-goods sector and, 376. *See also* Capital demand; Capital markets
- Capital gains, 239
- Capital markets, 2; access to, 341–42; completeness of, 10, 225–26; consumption and, 220; development of, 197; economic policies and, 214; fiscal policies and, 197–227; government intervention in, 8, 173–74; government spending and, 201–5; imperfect, 9, 193–94; income effects of, 10, 209; international integration of, 259; investment relationships, 57n.5; in less-developed countries, 376; risk and, 219, 378; savings relationship, 57n.5; segmented, 343–44; speculative bubbles and, 143; taxes and, 205–9, 211; transaction costs, 201. *See also* Asset markets; Capital flows; Exchange rates
- Capital mobility. *See* Capital flows
- Capital stock: calculation of, 56, 59n.12, 187–88; capacity output relationship to, 40; defined, 34; interest rates and, 33; prices and, 187; public spending and, 153n.3; savings and, 361–62; valuation of, 69; war and, 367–68; wealth effects of, 69. *See also* Asset(s); Investments
- Cash-in-advance modeling, 310, 313–16, 333, 339, 344–45, 347
- Central banks, 315; arbitrage and, 365; budget constraints in, 335n.8; capital mobility and, 365; interest-bearing reserves of, 334n.4; international reserves and, 322, 330; money-jumps and, 140; reserve targets, 320–26;

- speculative attacks, 320. *See also* Capital markets; Exchange rates; International reserves
- Chicken model, 226
- Closed economies: competitive equilibrium in, 179, 187; IS-LM model, 160; savings vs. investment taxes, 352; self-contained model of, 128; theory of, 184
- Clower model, 338–39
- Cobb-Douglas production function, 41, 65
- Cobb-Douglas utility function, 355–57, 385
- Commodity markets: clearing equation, 281, 287; intervention in, 13, 273–99; utility maximization and, 178
- Common cause fallacy, 367
- Comparative advantage, exploitation of, 39
- Comparative statics analysis, 11, 221–26
- Competitiveness: capital inflows and, 350; consumption and, 357; current account balance and, 53; demand contraction and, 137–41; equilibrium, 180; exchange rate and, 136, 350; fiscal contraction and, 130, 167; fiscal expansion and, 125, 230; fiscal-monetary policy mix and, 149–50; foreign investment and, 17; improvement of, 137; investment incentives and, 359–60, 373, 386; liquidity preferences and, 144; monetary policy and, 141; money demand and, 105; output demand and, 128–29; President's Commission on, 349; production slowdowns and, 148; tariff setting and, 74; tax policies and, 17, 349–86; trade balance and, 375; of U.S., 380–81
- Confidence effects, 152
- Consumers: after-tax incomes vs. expenditures, 181; income redistribution and, 8; opportunity sets, 174; utility maximization, 178, 217, 338, 380; welfare optimization and, 177–84
- Consumption: balance of payments targets and, 330; of capital, 187; competitiveness and, 357; domestic relative prices and, 324; elasticity of substitution, 65; fiscal deficit and, 301; function of, 302; government policies and, 198–99; government spending and, 203–4, 209; government vs. private, 209; income and, 80; inflation and, 333; international borrowing and, 331; international financial markets and, 220; international reserves and, 332, 334; investment decisions and, 8; life-cycle path of, 212; maximization of, 202; money demand and, 152n.1, 329; in open economy, 174; optimum taxes on, 323–24; policy targets of, 91; prices and, 80, 357; productive input and, 201; saving and, 25, 358; smoothing of, 195, 198, 205, 267, 318, 335n.10, 343; subsidies and, 312, 328, 330; substitution for, 314; tariffs and, 200; tax cuts and, 212–13; taxes on, 10, 206–9, 328–29, 339; trade balances and, 316, 318; welfare optimum and, 183. *See also* Government spending
- Cost inflexibility, 140
- Credit: consumption tax and, 324; domestic, 16, 133, 325–26; foreign asset composition and, 333; international reserves and, 321, 332; reserve losses and, 136; reserve targets and, 343. *See also* Borrowing, international; Domestic credit
- Cross-moments, computation of, 224
- Currency: appreciation of, 168, 353; balanced budget expansions and, 268; collapse of, 141–46, 168; depreciation of, 235–36, 321; economic bubble path and, 167–68; fiscal contraction and, 167, 169–70; fiscal expansion and, 28, 78, 125; foreign claims and, 59n.12; foreign exchange market and, 312; inflation and, 88, 94–95; monetary contraction and, 78; price shocks and, 104; reserve targets and, 321; speculation in, 141; swaps of, 197; wage shocks and, 104. *See also* Dollar; Exchange rates
- Current account balance: asset stocks and, 285; balanced budget expansion and, 240–41; bond-financed deficits and, 248, 253, 255–59; buffer shocks

- Current account balance (*continued*)  
 and, 119; calculation of, 32, 40, 231;  
 capital flows and, 28, 351;  
 competitiveness and, 53; disposable  
 income and, 282; economic shocks  
 and, 362; fiscal contractions and,  
 291–93; fiscal deficits and, 44, 289;  
 fiscal expansion and, 28–30, 229;  
 flexible exchange rate and, 235;  
 foreign asset holding and, 23,  
 263n.13; foreign claims and, 30;  
 interest rate and, 29; investment  
 incentives and, 359; less-developed  
 countries and, 14; macroeconomic  
 bliss and, 90; OECD, 14, 273–307;  
 oil price shocks and, 273; open  
 economies and, 270; output ratio,  
 43; private capital transfers and, 27;  
 productivity shocks and, 192;  
 savings and, 18–19, 22, 350, 358;  
 service account and, 239; targets for,  
 92; tax policies and, 267, 352; trade  
 balance and, 350; U.S. deficits, 1–2,  
 21, 229, 373. *See also* Balance of  
 payments; Budget deficits
- Debt. *See* Budget deficits; Government  
 debt
- Debt neutrality, 13, 31, 33, 35, 277, 305;  
 budget deficits and, 209–13;  
 exchange rate and, 321; fiscal  
 deficits and, 274; lump-sum taxes vs.  
 current borrowing, 151; tests for,  
 189, 281–82, 296
- Deflation, 140, 169–70
- Demand: balanced budget expansion  
 and, 240–47; bond-financed  
 expansion and, 247, 249, 253; budget  
 deficits and, 209; determination of,  
 355; fiscal contraction and, 137, 169–  
 70; fiscal expansion and, 62–63, 230,  
 236; fixed vs. floating exchange rates  
 and, 157; foreign asset holding and,  
 263n.13; interest rates and, 66–68;  
 for less-developed countries’  
 exports, 283; for oil, 285; production  
 reductions and, 147; tax cuts and,  
 212; tax increases and, 207, 209. *See  
 also* Output
- Demand shocks: exchange rates and,  
 104, 117; strategic responses to,  
 170–71; variance of targets under,  
 101; welfare costs of, 171
- Density function, 220
- Deterministic comparative statics, 222–  
 26
- Deutsche mark, dollar and, 31
- Developed countries. *See specific  
 models, nations*
- Developing countries: debt of, 274, 306;  
 U.S. fiscal policy and, 230
- Diamond model, 186, 248
- Discount factors, 317, 355
- Discount rate, endogenizing of, 172
- Disinflation, 93–94, 96
- Dissaving, government policies and, 198–  
 99
- Dollar: appreciation of, 48, 229, 265;  
 bond-financed deficits and, 255–59;  
 bubble path, 167–68, 256; capital  
 exports and, 372; collapse of, 6–7,  
 141–46; deficits and, 68, 268, 385;  
 demand for, 24; depreciation of, 2,  
 168, 379; deutsche mark and, 31;  
 direct currency substitution shift, 7;  
 fiscal contraction and, 136, 149;  
 fiscal expansion and, 48, 51–52, 62–  
 63, 81, 229–30; flexible exchange  
 rate and, 82; floating exchange rate  
 and, 158; foreign interest rates and,  
 31; overvaluation, 229, 262n.1;  
 portfolio models and, 270–71;  
 production slowdowns and, 148;  
 speculations and, 141, 143; strength  
 of, 46–47, 80, 373; wealth transfers  
 and, 63. *See also* Currency;  
 Exchange rates
- Dollar standard, 75, 78; currency  
 stabilization and, 4; demand shocks  
 and, 117; fiscal expansion under, 82–  
 83; fiscal policy and, 106–7, 114;  
 fixed exchange rates and, 95;  
 inflation shocks and, 116; price  
 shocks and, 117; national budgets  
 and, 66–67. *See also* Exchange rates
- Domestic credit, 133, 325–26. *See also  
 Credit*
- Domestic wealth. *See* Wealth
- Dornbusch two-country model, 80, 122,  
 165–68, 171–72
- Dynamic game theory, 80, 91, 119
- Economic shocks, 9; exchange rates and,  
 157–58; policy responses to, 170–  
 71; short-run vs. long-run offsets,  
 156; steady-state equilibrium and,

- 81, 172; study of, 222; transmission of, 113. *See also specific sector*
- Economies:** anticipation effects and, 168–69; bubble path, 167; demand management in, 149; dynamic, 222; interdependent, 121–72; Keynesian slack, 139; Lucas-tree, 223; overlapping-generations, 189; pure exchange, 174, 223; slowdown in, 147, 149; stabilization policies, 151–52. *See also Economic shocks; specific models*
- Efficiency conditions,** 331
- Efficiency gains,** 216n.7
- Elasticity, of prices,** 384
- Employment:** consumption and, 357; fiscal policies and, 151, 167; full, 14, 87, 138; investment incentives and, 359; wage-price inflexibility and, 157. *See also Labor; Unemployment; Wages*
- Envelope theorem,** 313
- Environmental changes, models and,** 120
- Equilibrium.** *See Macroeconomic equilibrium*
- Equivalence.** *See Ricardian equivalence theorem*
- Exchange rates:** asset substitutability and, 243–44; balanced budget expansion and, 240–41, 268; balance of payments and, 53, 320; bond-financed expansion and, 248–49, 255; capital accumulation and, 63; capital flows and, 372; central bank and, 315; consumer prices and, 87; crawling peg, 320; currency collapse and, 141, 168; current account balance and, 24, 28, 33; debt neutrality and, 321; deficit reduction and, 2, 44; demand and, 102–3, 157; destabilizing effects, 104; determination of, 41; dollar standard and, 95; domestic competitiveness and, 350; equilibrium, 315; European monetary policy and, 114; export of instability of, 161; fiscal contraction and, 7, 83–85, 132, 166; fiscal expansion and, 11, 81–83, 229, 270–71; fiscal policy and, 39–54, 80; foreign asset composition and, 333; foreign claims and, 59n.12; free-floating, 122; global recession, 149; index for, 56, 81–83; inefficiencies of, 89; inflationary shocks and, 115–16; interest rates and, 29, 41, 132, 374n.1; international reserves and, 332; investment and, 350; macroeconomic adjustments, 91; monetary policy and, 256; monetary shocks and, 160–63; money market equilibrium and, 336n.14; money stocks and, 124; optimal policies in, 176–84, 309–48; output and, 136, 160–63; overvalued, 146; policy-induced collapses, 146; portfolio models and, 270–71; production slowdowns and, 148; risk and, 145, 158; saving-investment behavior and, 22, 53; sequencing of transactions, 312; stabilization of, 131–37; sticky prices and, 45; systems of, 73–120; tax-financed expansions and, 267; trade balance and, 39, 233, 239; wealth effects, 13. *See also Capital markets; Currency; Fixed exchange rates; Flexible exchange rates; Floating exchange rates; Real exchange rates*
- Exports:** current account balance and, 40; deficits and, 384; fiscal expansion and, 176, 192; government expenditures and, 204–5; home to foreign ratio, 58n.8; investment and, 352; monetary expansion and, 192; nontraded-goods and, 357; output and, 33, 39; private saving and, 30; procyclical, 192; subsidies for, 16, 318; target levels for, 15, 340. *See also Balance of payments; Trade balance*
- Expropriation,** 366, 371
- External balance hypothesis,** 369–73, 377, 379
- Factor prices, corporate tax changes and,** 354–55, 357
- Factor supply effects,** 334
- Farmers, investment incentives and,** 360
- Federal deficits.** *See Budget deficits*
- Federal Republic of Germany:** deficits of, 21, 39–52, 178; fiscal restraint in, 1, 54; GNP vs. tax revenue, 178; saving-investment model, 30–39; structural balance of, 256
- Feldstein doctrine,** 66
- Financial markets.** *See Capital markets*

- Finite lives, 193
- Fiscal contraction: anticipation of, 168–70; economic activity, 149; effects of, 130–41, 166–67; exchange rate and, 166; monetary expansion and, 171; real output and, 135–36; U.S. vs. rest of world, 137–39
- Fiscal deficits. *See* Budget deficits
- Fiscal expansion: balanced budget, 138, 236, 239–47, 260, 268; bond-financed, 12, 247–59; budget deficits and, 192; competitiveness and, 125; currency valuation and, 51–52, 67, 78; dollar appreciation and, 229–30; dollar standard and, 82–83; effects of, 62–63, 81–85, 138–39; financing of, 234–35; flexible exchange rate and, 79–85; inflation and, 95; interest rates and, 270, 307; international interdependence and, 87–88, 229–71; money supply and, 114; negative transmission of, 83–84; net exports and, 176, 192; in open economies, 231. *See also* Dollar
- Fiscal policies: clean float and, 114; current account balance and, 292, 377; cyclical factors and, 3, 288–89, 304–5; decentralized policymaking, 184–86; demand and, 65; distortionary, 200; dollar appreciation and, 265; dollar standard and, 114; domestically optimal, 221; economic shocks and, 115, 149; exchange rates and, 106, 146; global efficiency of, 91; government expenditures and, 201; income redistribution and, 173; in industrial economies, 73–120; interest rates and, 13, 53–54, 273–307; international financial markets and, 197–227; lag time of, 152; in large economy, 184; long-run effects of, 135; monetary policy interaction, 85–89; multipliers for, 77–85; noncooperative rules for, 91–92; in OECD, 4–5, 184, 288–93; in open economies, 8–9, 173–95, 269–70; prices and, 219; production slowdowns and, 148; in pure exchange economy, 176–84; risk diversification, 219; shifts in, 39–52; and stabilizing actions, 151–53; tightening of, 130–41; trade patterns and, 296; transmission of, 78–85, 230, 270; in uncertain environments, 156; U.S., 6–7; wealth and, 68; welfare and, 115, 218, 221. *See also specific policy model, type*
- Fixed exchange rates: monetary policy and, 115; random walks and, 268–69; tax reductions and, 360. *See also* Exchange rates
- Flexible exchange rates, 79–85, 102; current account balance and, 235; destabilizing effects, 104–5; dollar standard and, 95; fiscal policy transmission and, 4, 106–7; vs. floating, 157–64; noncooperative policies and, 5; system of, 74–75, 79. *See also* Exchange rates
- Floating exchange rates: equilibrium, 87; fiscal expansion and, 115; fiscal policy transmission and, 77–79, 106–7; vs. fixed, 157–64; inflation shocks and, 4–5, 94–95, 116; monetary shocks and, 105; price performance and, 89; system of, 74. *See also* Exchange rates
- Foreign aid: government spending and, 309; investments and, 367; OECD, 274; personal saving and, 198–99; tax rates and, 309
- Foreign assets: calculation of position, 55; trade balance and, 238; U.S. decumulation of, 230; wealth and, 318. *See also* Asset(s); Investments
