## Prefatory Note

This volume contains the papers and discussion presented at the Conference on the Measurement of Saving, Investment, and Wealth held in Baltimore, Maryland, 27–28 March 1987. Funds for the Conference on Research in Income and Wealth are provided to the National Bureau of Economic Research by the Bureau of the Census, the Bureau of Economic Analysis, the Bureau of Labor Statistics, and the Statistics Division of the Internal Revenue Service. In addition, the National Science Foundation Program on Measurement Methods and Data Resources provided financing for this conference. We are indebted to all of them for their support. We also thank Robert E. Lipsey and Helen Stone Tice, who served as cochairs of the conference and editors of this volume, and the other members of the initial planning committee, Angus Deaton, John Shoven, and James D. Smith.

### Volume Editors' Acknowledgments

Kirsten Foss Davis handled, with her usual skill, the logistics of the conference on which this volume is based. Jane Konkel prepared the papers for the press, and she and Annie Spillane efficiently guided the

conference editors through the many stages of the publication process. Henry Peskin and an anonymous referee offered exceptionally insightful comments and suggestions. The editors give their thanks to all of these and to the principal contributors, the authors of the papers and their discussants, all of whom were unusually responsible and helpful.
