Subject Index

Abigail (ship): crew lists (Whalemen's Shipping List), 111-13; entries in Ship Registers for, 120-22; registration and voyage dates, 101, 105; voyages of (Wood MS), 109-11

Advances on lay, 15, 173-75

Agent firms: longevity of and turnover within, 384-85; productivity of specialist and nonspecialist, 404-10

Agents: business activities of, 401-3; choices and decisions about a voyage, 187, 214-16, 394, 396; connections in resupply ports, 295; decisions influencing productivity, 303-7; fortunes of, 403; gain from agencies, 401; interdependence with captains in whaling ventures, 15-16, 385-88; methods of American and British, 463; as organizers and managers of whaling ventures, 384, 394-401; output-maximization role, 452-54; as owners of whaling vessels, 394, 401; profits of voyages with experienced, 447-52; relation of experience to productivity and profitability, 407-10; role with improved transportation and communication, 45; shares in voyage, 414; sources of income, 411; wage payments to crewmen, 157; wealth of New Bedford, 412-14

Agents' Occupations Data Set, 106-7, 122-26

Allen gun. See Brand gun

Ambergins, 29-30

Antarctic hunting grounds, 50-51, 502; factory ships in, 507; map, 505; whaling stations, 504

Arctic hunting grounds: Eastern Arctic, 39; opening of Western Arctic, 295, 297; use of barks in, 270

Atlantic hunting grounds: American and British productivity and profits (1817-42), 470-92; British and Americans in (1817-42), 461-66; crewmen (1817-42), 466, 492-97

Attack: boats used for, 283-84; methods of and devices for, 284. See also Whaleboats; Whalecraft; Whale guns and lances

Baleen. See Whalebone, or baleen

Barks: design and rigging innovation, 270; introduction of, 38-39; manning requirements for, 257; as modified clippers, 258; size compared to ships, 258; size increase, 258; steam-powered, 45; tonnage of, 38-39

Basques, 31

Blubber: extraction of oil from, 29, 36, 274, 343; techniques for removing and processing, 273-76

Bonuses: for captains, 389; for seamen, 172

Brand gun, 292

Britain: dominance in world whaling (eighteenth century), 31-34

Brutality, 196-97

Candles: from spermaceti, 29; substitution of tallow for sperm, 37

Cannons, 500
Captains: causes of death, 416-18; as entrepreneurs, 172; expenditures made by, 157; experience and length of service, 178-79, 386-89; incomes and income sources from a voyage, 177-90, 389-90; interdependence with agents in whaling ventures, 15-16, 385-88, 397-98, 400, 424; as investors, 390; lay earnings of, 14, 390-92; mortality rates, 387n8, 415; planning of voyage, 396; required skills and responsibilities of, 16; shares in voyage, 414; supplement to earnings, 172
Captains and Agents Data Set, 75-79. See also Agents' Occupations Data Set
Cargo capacity standard, 263-64
Cartography improvements, 279-83
Catcher boats: attached to modem factory ships, 51
Channel buoys, 282
Civil War, American: expansion of telegraph system, 282-83; freight charges during, 170-71; impact on sperm-whale fishery, 345n6; impact on whaling industry, 41, 442; Stone Fleet, 97-98; threat to whalers of Confederate raiders, 170
Clipper ships: bark-rigged whalers, 269; costs to build, 243; design of, 266-67; innovative sail design, 271-72; medium clipper design, 267-69; in whaling fleet, 243, 258
Coal oil, or kerosene: derivatives in lubricant market, 360, 362; as lubricant and illuminant, 358, 360
Competition: among whaling vessels, 300-302; British and American whaling industries (1817-42), 461; for captains, 391, 393n; in lubricant and illumination markets, 351-68; from onshore wage rates, 190-200, 302-3; shipbuilding, 267; in whaling industry, 5
Competition Data Set, 107, 323-41
Competition indexes, 323-41
Condemnations: legal proceeding to determine, 99; vessel losses through, 236-43
Convention for the Regulation of Whaling (1931), 52
Costs: influencing crewman's wage bargain, 168-75; of outfitting, 247-58; related to desertions, 193-94; of sails for whaling vessel, 247; of subsistence aboard ship, 211-13; trends in vessel cost, 243-46
Crew Contracts Data Set, 159
Crew Counts Data Set, 79-81, 90; departing crews in Whalemen's Shipping List, 87, 89; National Archives data, 80-86; whalmen's shipping papers data, 87-89
Crewmen: average monthly earnings by occupation at all hunting grounds, 175-77; occupations, 10-11, 154-56, 205-11; supplements to lay system wages, 172; wage payments, 157; wages relative to other occupations, 175, 177-90
Crewmen, skilled: on Atlantic whaling vessels (1817-42), 466; boatholders or steermen, 284-85; Gay Head Indians as boatheaders, 396; lay earnings of boatsteerers, 14; lays of, 167; mate who dismembers whale, 273-74; specksioneer, 466; tasks of boatsteerers, 277; wages of, 180-87
Crewmen aboard ship: cooperation among, 15; countries of origin, 179-80; decline in quality of (1840-58), 190, 302-3, 318, 320; desertions, 50, 173-74, 194; division of labor in dismembering whales, 273-76, 466-67; division of labor in whaleboat attacks, 283-94; factors reducing number of, 263, 273; factory ship tasks, 502; maintenance of whaling vessels (1800s), 264-65; mutiny, 174; number in barks, 270; numbers and skills of, 10-11; obstreperous men marooned, 174; occupations of, 154; training of greenhands, 396
Cumberland Inlet discovery (1840), 39
Data sources: for computing productivity of British and American Atlantic fleets (1817-42), 482-86; on sperm-whale stocks, 133-38. See also Agents' Occupations Data Set; Captains and Agents Data Set; Competition Data Set; Crew Contracts Data Set; Crew Counts Data Set; Entrainces Data Set; Exits Data Set; Hunting Pressure Data Set; Owners Data Set; Sailors' Ages Data Set; Stations and Lays Data Set; Tax List Data Set; Voyages Data Set
Desertion: crewmen's incentives for, 173-74; effect on profits, 194; factors influencing, 193-94; from nineteenth-century whaling ships, 50
Design: change in sail, 263, 270-72; changes in nineteenth-century vessel, 262-78; of clipper ships, 266-69; four- and five-masted sailing ships, 261-62; harpoon in-
innovations, 50, 143, 284, 286, 289–91; innovation in bark, 270; of whaleboats, 283–86
Dolphins, 20–21

Earnings. See Wages
Embargo Act (1807), 37

Entrees Data Set, 90, 95, 97

Entrepreneurs: agents as, 15–16; Americans as British whaling entrepreneurs, 460; captains as, 16, 172. See also Agents; Captains

Exits Data Set, 90, 97

Explosives: explosive and bomb lances, 292–94; in heads of harpoons, 50, 500; in rocket harpoons, 290–91

Factory ships: in Antarctic waters, 51; country registrations (1928–40), 509; reintroduction, 51, 507; tasks of crew aboard, 502

Firm: as set of owners, 381–82; voyage as, 381–83. See also Agent firms; Whaling firms

Flanders’ Patent Suction and Forcing Pump, 273

Galatea: capture by Portuguese, 119–20

Gas industry: development of, 352, 354; extraction of gas from various products, 352, 354–55

Gas Light Company of Baltimore, 352

Greener swivel harpoon gun, 143, 284, 289, 500

Harpoons: in attack on whale, 285–86; cannon throwing, 500; in early ocean whaling, 36–37; with explosive heads, 50, 500; fastened to whaleboat, 37; Greener swivel harpoon gun, 143, 284, 289, 500; harpoon cable, 501; innovation in design, 286; rocket launcher, 290–91

Holland: dominance in world whaling (seventeenth century), 31–33

Hunting grounds: Antarctica as, 50–51, 502; average lay by occupation and specific, 160–67; decisions related to New Bedford fleet, 107–8, 303–4; early American, 34–37; Eastern and Western Arctic, 39; identified in Voyages Data Set, 69–72; knowledge of in wage bargain, 187; lack of evidence of depletion, 136–38; map showing nineteenth-century, 26–27; offshore, 35–36; relative average monthly wages of whalemens by occupation and, 186–87; relative lays by occupation and specific, 167, 171; shift to Western Arctic, 258; for sperm whales, 39

Hunting Pressure Data Set, 107, 321–23

Hunting-pressure indexes, 300, 321–30

Hydrogenation process, 503, 508

Incentives: of crew to remain with voyage, 157; to desert, 173–74; in lay system, 186, 202

Income. See Profits; Wages

Information: agents’ handling and use of, 16, 396–97, 424–25; in agents’ organization of voyages, 394, 396–97; on condemnations and losses at sea, 239; innovations augmenting, 282–83

Ingenuity: of crewmen, 264–65; of repairs at sea, 250–51; required of captains, 16

Innovations: of American shipbuilders, 267; cutting stage, 273–74, 467; design of medium clipper, 267–69; in early American whaling, 36–37; extension of hunting area with, 36–37; harpoon cable, 501; harpoons, or irons, 50, 286–89; increased productivity with, 41, 44; influence on skill levels of crew, 195–200; institutional, 294–95; in lances and whale guns, 291–93; machinery and equipment, 272–73; of modern whale hunting, 508; in oceanography and cartography, 279–83; in products competing with whale products, 358, 360, 362–64; sails and rigging, 263, 270–72; steam schooners, 500–501; steering mechanism, 263; in techniques of whale hunting, 283–94; use of steam engine in vessels, 273; whaling guns, 292–94; winches and donkey engine, 263, 277, 501; wintering, 39, 46

Inshore whaling, 34–35

Insurance: rates in Civil War period, 170–71; for whaling voyage, 397

International Whaling Commission, 52

Inuit people, 39, 52

Inventions: cannons, 500; Greener gun, 143; harpoon with explosive head, 50; patents
Inventions (continued)

for new designs, 272–73; Pierce, or darting, gun, 294; in products competing with whale products, 358, 499; stern slipway, 51, 508

Investment: capital invested in typical voyage, 259, 384; rates of return to whaling compared to other businesses, 455; size of whaling venture investment, 384, 412; in vessels and outfits, 214, 252. See also Productivity; Profit rates; Profits

Investors: agents as, 401–2; captains as, 390; ownership groups, 381–83, 403, 414–15; in a voyage, 414–15. See also Whaling ventures

Iron dollar, 49

Johnson v. Standard Oil Co. of New Jersey (1940), 201–2n48

Labor contracts: components of whaling voyage, 14–15; each crewman negotiated the lay, 158–59; example of whalemen's shipping paper, 88, 127–30; lay guarantee written into, 154–56; methods to break, 193–96; voyages with and without data on (1840–58, 1866), 202–5. See also Lay system

Labor force: quality of, 190–200; structural changes (1840–66), 302; substitution of unskilled for skilled crewmen, 195; turnover, 158, 192–95; on typical whaling vessel, 154; vessel-related decisions, 228–31

Labor market: agent and potential crewman in, 187; agents' access to international, 460; agents' recruitment of crew from, 394, 396; competition in, 302–3; efficiency, 188–90; opportunities other than whaling, 302–3; wage bargain model, 187–89. See also Occupations

Lard oil: as illuminant, 351, 356; production, 351; stearic or adamantine candles from, 356

Lay system: advances to crewmen, 15, 173–75; attributes, 202; averages by occupation and specific hunting ground, 160–67; calculation of lay, 154–56; crewman's negotiation of his own, 158–59; for crewmen with two occupations, 205–6, 209–11; criticism of, 200–201; defined, 14–15; earned supplements to, 172; earnings of captain, 390–91; judicial interpretation of contract, 201; lays of crew and captain, 150, 158–60, 186–87, 391, 393; risks in, 15, 150, 186–90, 202

Lighthouses: lard oil replaces sperm oil (1862), 356; use of sperm oil, 29, 344; worldwide expansion of (mid-1900s), 282

Lubricants market: factors in expansion of, 367; with introduction of petroleum, 363–64; oil products sold in, 358–60; uses of whale and sperm oil, 16–17, 29–30, 343–49, 351–52

Maintenance: with design and material changes, 271; of whaling vessels (1800s), 264–65

Management decisions. See Agents

Merchant service: comparison of wages of whaling and merchant officers, 177–79; wages compared to whalemen, 177–80

Models, shipbuilding, 266

Moral hazard: of uninsurable risks, 424

Mutiny, 174, 196

Nantucket, Mass., 19, 34, 35, 37, 38, 39, 41

Nantucket sleigh, 178

Negotiations: renegotiations of lay, 172; of whaleman's lay, 158–59

New Bedford, Mass.: decline as whaling port, 46; as leading whaling port (1900s), 19; location, 18–19

New Bedford fleet: destinations of (1816–1905), 39, 42t, 107–8, 303–4; index of total factor productivity (1851–83), Western Arctic, 144–45; size and ubiquity of, 19; steam-driven ships of, 46; transfers of new and rerigged vessels into, 258; voyages of (1816–1906), 8n12

Norway: expansion of modern whaling, 502–4, 508–9; modern hunting, 52; reintroduction of factory ship, 51; replacement of American whaling, 459

Occupations: average lays by specific hunting ground and, 160–67; average lays for all hunting grounds by, 160, 168t, 169t; average monthly earnings at all hunting grounds by, 175–77; crewmen with two, 205–11; crew of whaling ships, 154–56; lays according to, 158–69; relative lays by specific hunting ground and, 167, 171; relative wage rates for whaling and onshore (1840–56), 180–84. See also

See also
Captains and Agents Data Set; Stations and Lays Data Set; Tax List Data Set

Oceanography improvements, 279–83

Oil. See Coal oil, or kerosene; Lard oil; Rosin oil; Sperm oil; Vegetable oils; Whale oil

Outfits: components and costs of whaling vessel, 246–58; of crewmen, 49–50. See also Sails

Output: post–War of 1812 whale products, 38; value of post–Civil War, 41; of whaling industry, 16

Owners Data Set: Abigail records in, 101–4; Abigail registration and voyage dates, 101, 105t; codes for variables, 122–26; Ship Registers data, 106

Ownership groups: agents linked to, 401–3; owners of a voyage, 414–15; turnover of members in, 381–83. See also Whaling ventures

Panama Canal, 261

Perth, Australia, 295

Petroleum: cracking process, 363; discovery of, 362–63; export of, 364; as illuminant and lubricant, 363–64

Pierce, or darting, gun, 294

Ports: alternative home, 295; development of resupply, 295; home ports of American whaling vessels, 113–18; transshipment, 295; whaling voyages from American (1800–1899), 39, 41, 43–44t

Prices: baleen, 17; in estimating wage payments, 157–58; lighting and lubricating products, 356–57; whale and sperm oil (1816–1900), 17, 366–67; whalebone and sperm and whale oil (1816–20 through 1896–1900), 366–78

Productivity: of agent firms, 404–10; captain's influence on, 391; comparison of British and American Atlantic fleets' (1817–42), 469–73; computing British and American Atlantic fleets' (1817–42), 481–86; effect of desertion on, 194; managerial decisions influencing, 10–12, 303–7; multilateral index used to measure, 12, 179; multivariate analysis of New Bedford whaling (1821–97), 316; problems of, 298–99; of total factor productivity, 12–14, 179, 300; total-factor-productivity indexes, 144–45. See also Competition indexes; Hunting-pressure indexes

Productivity measurements: inputs to and analysis of, 297–98

Profit rates: calculation for a voyage, 436, 441–42; computing for British and American Atlantic fleets (1817–42), 486–92; distributions for voyages managed by all agent firms, 450t; factors influencing varying, 457; by hunting ground (1817–92), 444–46; mean (1817–92), 437–42; from new hunting grounds, 443; of voyages organized by experienced agents, 447–52

Profits: calculation for a voyage, 429, 432–36; comparison of British and American Atlantic fleets' (1817–42), 473–78; in dynamic context, 425; relation of agent's experience to, 407–10; Schumpeterian, 425; from slop chest, 411; in static context, 423–25

Protection of whales, 52; right whales (1930s), 147

Provincetown, Mass., 19

Provisioning: business of, 401; for long-term whaling venture, 247, 394; provisioning during voyage, 251–52, 256, 295

Railroads: impact on whaling industry, 44–45

Reed's Ship Steerer, 272–73

Register ton, 263–65

Repairs at sea, 250–51

Revolutionary War, 37

Rigging: innovations in sails and equipment aloft, 263, 270–72; rerigging, 233; ships rerigged as barks, 258

Risks: to crewmen of whaling ships, 151–53; insurable and uninsurable, 424, 434; in lay system, 15, 150, 186–90, 202; related to voyage, 397; sharing of whaling venture, 401; tempering of lay system, 172–73; as uncertainty, 424

Roes Welcome Sound, 39

Rosin oil, 355

Sailing vessels: after advent of steam-driven vessels, 261; costs to build wooden (1814–87), 243–46; design changes in nineteenth century, 265–78; design of
Sailing vessels (continued)
down-easter, 268; development of design, 266–67; four- and five-masted (1890s–
1900s), 261–62; machinery and equipment innovations, 272–73; merchantmen redirected to whaling (1840s), 233; post-1812 design of whaling, 264; square riggers, 267; whaling fleet after advent of steam, 262. See also Whaling vessels

Sailors’ Ages Data Set, 90, 94–96t
Sails: change in material and design, 270–72; technical advances, 263; in whaling vessel outfit, 246–47

San Francisco: as alternative home port, 295; decline as whaling port, 46; as whaling port (1870–1905), 45
San Francisco fleet: destinations, 46; expansion of, 45

Scrimshaw, 48, 276
Seamen. See Crewmen
Seamen’s Act (1915), 201
Shipbuilding: American shipbuilders (1840s), 267, 278–79; design and technical change in nineteenth-century, 265–78; improved methods, 278–79; solid and lift models, 266; where whaling vessels were built, 113–18
Shipping Commissioners’ Act (1872), 201
Ship Registers, 73–75, 78
Ships. See Whaling vessels
Slop chest, captain’s: agent’s share of profits from, 411; captain’s share of profits from, 172; contents, 49–50; cost of items to fill, 250
Slush fund: defined, 389; entitlements to, 172; sharing of, 38
Solar lamp, 356
Southampton, Long Island, 34
Spermaceti: for candles, 29, 344, 352; from sperm whale, 343–44
Sperm oil: exports and imports, 358–59; 361–66; from head of sperm whale, 274, 343; as illuminant and lubricant, 16–17, 29, 343–49, 363; production, 17; refining process, 343–44; winter, spring, and taut pressed oil, 344–45. See also Whale oil
Sperm whales: hunting of, 23; nineteenth- and twentieth-century catches, 51
Station, 14
Stations and Lays Data Set, 89, 91–93t, 175; comparison with Voyages Data Set, 204
Steam vessels, advent of, 261
Steering mechanism, 263
Stern slipway, 51, 508
expected monthly wage and risk-adjusted expected wage, 188–89

Wage payments: in cash, bill of exchange, or shares in kind, 157–58; to crew for other than lays, 168–75; to seamen discharged during voyage, 157–58. See also Advances on lay; Lay system; Slush fund

Wages: of British crewmen in Atlantic fleet (1817–42), 492–97; comparison of whaling to onshore (1840–56), 180–84; competing onshore, 190–200, 302–3; relative wages of whalenmen, 175, 177–90; whalemen's average monthly (1840–58), 185–86; whalemen's relative average monthly by occupation and hunting ground (1840–58), 186–87

War of 1812, 37–38, 243

Whaleboats: for attack, 36–37; design requirements, 283–86; division and interchangeability of labor on, 283–94; risks to crew in, 151; sails, oars, paddles, and gear, 284–86; storage locations on vessels, 284

Whalebone, or baleen: exports of, 364, 352–57; major markets, 347–48; materials from sperm whale, 343; post–War of 1812 demand, 38; from sperm whale, 29, 343; techniques for removing and processing, 273–76; uses in nineteenth century, 28–30; uses in twentieth century, 28–31. See also Illuminant market; Lubricants market; Sperm oil; Whalebone, or baleen; Whale oil

Whalers. See Whaling vessels

Whales: beaked, 20; catches of baleens in nineteenth and twentieth centuries, 51; classification of currently known, 20–21, 52–56; dismembering process, 273–78; disputes over and laws to divide drift whales, 34; as endangered species, 132; hunting of bowheads, 28; literary references to, 1–3; swimming speeds of, 21, 25t, 37; taxonomy of, 52–56; weights and lengths of, 21–23, 24–25

Whale stocks: estimates of nineteenth-century, 133–48; harvest (1930–31), 508; indexes of hunting pressures on, 300; before intensive American hunting, 133–34; limits on hunting and killing, 51–52, 147, 508; ownership of, 5; question of nineteenth-century overhunting, 131–32

Whaling: in early America, 34–37; sail-powered, 31

Whaling families: Enderby family, 427, 462; Howland family, 398–400, 403, 419, 421–22; New Bedford, 403–4

Whaling firms: liquidation and reorganization, 381–84; as ownership groups, 381–82; profits of, 423–24; sizes, voyages, and number of members, 383–84. See also Agent firms; Ownership groups

Whaling fleet, American: differences from British, 462–64; impact of nineteenth-century design changes on, 268–70; modes of entrance and exit, 231–43, 268–70; post–Civil War tonnage, 41; potential for liquidation, 442; rigging class (1816–1905), 216–28; vessel size (1816–1905), 218
