

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Macroeconomic Linkage: Savings, Exchange Rates, and Capital Flows, NBER-EASE Volume 3

Volume Author/Editor: Takatoshi Ito and Anne Krueger, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-38669-4

Volume URL: http://www.nber.org/books/ito_94-1

Conference Date: June 17-19, 1992

Publication Date: January 1994

Chapter Title: List of Contributors, Indexes

Chapter Author: Takatoshi Ito, Anne O. Krueger

Chapter URL: <http://www.nber.org/chapters/c8540>

Chapter pages in book: (p. 389 - 402)

Contributors

Kazumi Asako
Faculty of Economics
Yokohama National University

Bank for International Settlements (BIS), 170
Banking system: international credit standards, 170–71; Korea, 132, 136–38
Basel standard of capital adequacy, 170
Bollen index of democracy, 16, 17f, 21
Budget deficit: effect on national savings, 60; Korea, 68
Business sector, Korea, 138, 157
- Canada-U.S. Free Trade Agreement, 295, 316
Capital: conditions related to shortage, 167–68; implications of scarce, 180; possibility of shortage, 182
Capital account: development of Korea's, 124–26; intercountry comparison of openness, 140–54; interpretation of Japanese data for, 37–39; movements of Japanese, 32; openness of, 140; openness of Japan's, 142; openness of Korea's, 142, 157–58; prerequisites for liberalization, 157
Capital controls: with financial liberalization, 135–36; impediments in Korea to deregulation of, 136; influences in OECD countries on, 126; Japan, 133–34, 135; Korean liberalization of, 124; OECD countries' liberalization of, 135; patterns of Korean, 126–35
Capital flows: with black market exchange premium, 17–18, 19f; comparison of Asian developing country, 140–42; features of world and developing nation, 168–70; gross flow index concept, 154–56; inflow and outflow of Japan's, 48, 51–52; inflow and outflow of Korea's, 124, 126, 127, 135; nations with large inflows, 171–74; in open capital account, 140; openness of Korea's, 155
Capital intensity: industries in Taiwan with low and high, 241; products with high and low, 4, 232, 237, 239
Clark hypothesis, 231
Commodities classification: according to factor input intensity, 232–34; according to stages of fabrication or use, 234–36
Comparative advantage: for nations with human-capital-intensive products, 241; Taiwan, 4

- Comparative growth model: Asian and OECD nations, 11–16; with conditional convergence, 8–11
- Competitiveness: decline of Taiwan's international, 229; human capital as factor in Taiwan's, 241; Korean, 54, 70, 80; of Taiwan's external trade, 96–98, 107–14
- Conditional convergence: in Asian economies, 8–11, 28–29; in global economy, 10–11; in OECD country growth, 10; in steady-state growth paths, 8–9
- Consumer prices, EC and East Asian nations, 364–66
- Cost externality model: comments on, 266; definitions, 248–53; specifications, 253–56, 266
- Credit system: international, 170–71, 180–81, 182; Korea, 66–68
- Currencies: internationalization of a single currency, 355–56; as nominal anchor, 348; pegging of Asian, 297; value in relation to U.S. dollar, 89. *See also* Deutsche mark; Dollar (U.S.); Yen
- Currency appreciation: of East Asian, 111; of European, 89, 93, 99, 110, 113; of Japanese yen, 35, 53, 86, 245; of Korean won, 133, 139; of NT dollar, 89, 96, 98, 113, 228–31, 243, 245; as policy tool, 45–48
- Currency areas: conditions for Asian nation, 376–82; integration of, 295–96; optimum (Mundell), 357, 360, 376; probability of Asian, 296
- Currency baskets: Asian currency links to, 348; Korea's double-basket system, 139; pegging of Asian currencies to, 297; weights assigned to components of, 297–308, 321, 325, 329–30
- Current account: comparison of Korea with Japan and Taiwan, 54–64; composition of, 83–84; factors influencing Japan's, 39–45, 48; factors influencing Taiwan's, 58, 62f; fiscal policy impact on Japan's, 68; levels in Korea, 53–54, 65, 81; movements of Japanese, 31, 35–37; response in Korea to surplus, 64–67; savings and investment effect: Japan, Korea, Taiwan, 58–60, 61f, 62f, 63f
- CUSUM test/CUSUM square test, 85
- Data sources: for capital movements in Japan, 37–39; for exchange-rate pass-through analysis, 355–56; for inventory-adjustment model, 280; for relation of money, output, exchange rate, and price, 192
- Debt, external: effect of Korea's 127, 131t; Korean current account surplus to lower, 132; yen- and dollar-denominated, 338–39
- Deutsche mark: in European Monetary System, 348; as international currency, 355
- Dollar (U.S.): in East Asian currency baskets, 297–308, 321, 325, 329–30; external debt denominated in, 338–39; as international currency, 325–26, 355; post-Plaza Accord depreciation, 53; role in Asian economies, 345, 354; role in Asian exchange rate policy, 297; trade denominated in, 308–11; transactions on foreign exchange markets, 340–42
- EAEC. *See* East Asian Economic Caucus (EAEC)
- East Asian Economic Caucus (EAEC), proposed, 316, 317–18
- Economic growth: actual and predicted OECD and Asian nation, 11–16; differences in Asian economies, 16–22; in East Asian countries, 362–63; factors in rates of, 8; relation to openness, 16–22, 23, 29; relation to political democracy, 15–16, 17f, 21. *See also* Comparative growth model; Conditional convergence
- Economic performance, East Asian countries, 361–63
- Economic policy, Korea, 123–24
- Energy intensive products, 233–34, 237, 239
- European Community (EC): trading bloc likelihood, 295, 316, 318
- European Monetary System (EMS), 348, 353, 355
- Exchange rate markets: black market, 17–20; dynamic, 220–24; yen transactions on, 340–42
- Exchange rate pass-throughs: cost externality effect on, 248, 261–64, 268–69; incomplete (illustrated), 268, 269; in input and output prices, 336–37; occurrences of over, incomplete, and negative, 257, 259; ratios by product and country, 257–58; testing for elasticity of determinants, 266–67. *See also* Cost externality model
- Exchange rate regimes: cycles in flexible, 206–8; dynamic paths under flexible, 204, 206–7, 215; fixed in currency union,

- 378; floating with autonomy, 378; Korea, 139, 157; optimal choice of, 212–13, 214–15
- Exchange rates: effect on country's export or import value, 119–20; effect on Japan's current account, 42–45; fluctuations of Asian country in relation to dollar, 348–49; incomplete pass-through, 247–48; influence on capital flows, 133–34; inserting chaos in model of, 220–21; Korean export pass-through rate, 79–80; in relation to money supply and inflation, 187. *See also* Current account; Price-competition index (PCI); Yen/dollar exchange rate
- Export-drive hypothesis: defined, 4, 290, 291–92; for inventory adjustment, 278–79; inventory and factor adjustment costs with, 291–93
- Exports: with appreciation of NT dollar, 93–94; choice of currency for invoicing, 336–37; correlation with inventories, 275, 287, 290, 291–92; Japan, 41–45; Korea, 55–58, 77–81; restriction with tariffs and quotas, 281–85; with undervalued NT dollar, 93–94
- Export structure: Japan, 237–40, 244, 245; Taiwan, 94–96, 98, 231–36, 240–41, 243–45; United States, 237–40, 244, 245
- Factors of production, Taiwan, 231–34
- Financial sector: Japan: money markets, 345; Korea's liberalization of, 123–24, 132, 138; sequencing of liberalization in, 135–36
- Fiscal policy: effect of Korea's expansive, 68; effect on current account surpluses, 63; Japan, 59–60. *See also* Savings

Books of Related Interest

Trade and Protectionism

Edited by TAKATOSHI ITO *and* ANNE O. KRUEGER

American and East Asian scholars look at the current global trading system and at the potential threats to East Asian economies from possible regional arrangements, such as separate trading blocs in the Western Hemisphere.

NBER–East Asia Seminar on Economics, Volume 2

The Political Economy of Tax Reform

Edited by TAKATOSHI ITO *and* ANNE O. KRUEGER

Experts from Taiwan, Korea, the Philippines, Japan, and Thailand, as well as the United States, Canada, and Israel, address the importance of the East Asian region for the international economy. Focusing on the complexities of tax reform, the contributors examine the problems of interdependence in a global economy.

NBER–East Asia Seminar on Economics, Volume 1

Perspectives on Trade and Development

ANNE O. KRUEGER

These selected papers focus on the relationship between trade and exchange rate policies and overall economic development. “One of the leading American authorities on the relation between foreign trade and economic development draws together 16 papers, empirical and theoretical, that throw much light on her subject.”—*Foreign Affairs*
