The Great Inflation
A National Bureau of Economic Research Conference Report
MICHAEL D. BORDO is professor of economics at Rutgers University and a research associate of the National Bureau of Economic Research. ATHANASIOS ORPHANIDES is former governor of the Central Bank of Cyprus.
National Bureau of Economic Research

Officers

Kathleen B. Cooper, chairman
Martin B. Zimmerman, vice chairman and chief executive officer
James M. Poterba, president and chief executive officer
Robert Mednick, treasurer
Kelly Horak, controller and assistant corporate secretary
Alterra Milone, corporate secretary
Gerardine Johnson, assistant corporate secretary

Directors at Large

Peter C. Aldrich
Elizabeth E. Bailey
John H. Biggs
John S. Clarkeson
Don R. Conlan
Kathleen B. Cooper
Charles H. Dallara
George C. Eads
Jessica P. Einhorn
Mohamed El-Erian
Linda Ewing
Jacob A. Frenkel
Judith M. Gueron
Robert S. Hamada
Peter Blair Henry
Karen N. Horn
John Lipsky
Laurence H. Meyer

Directors by University Appointment

George Akerlof, California, Berkeley
Jagdish Bhagwati, Columbia
Timothy Bresnahan, Stanford
Alan V. Deardorff, Michigan
Ray C. Fair, Yale
Franklin Fisher, Massachusetts Institute of Technology
Edward Foster, Minnesota
John P. Gould, Chicago
Mark Grinblatt, California, Los Angeles
Bruce Hansen, Wisconsin–Madison
Marjorie B. McElroy, Duke
Joel Mokyr, Northwestern
Andrew Postlewaite, Pennsylvania
Uwe E. Reinhardt, Princeton
David B. Yoffie, Harvard

Directors by Appointment of Other Organizations

Bart van Ark, The Conference Board
Christopher Carroll, American Statistical Association
Jean-Paul Chavas, Agricultural and Applied Economics Association
Martin Gruber, American Finance Association
Ellen L. Hughes-Cromwick, National Association for Business Economics
Thea Lee, American Federation of Labor and Congress of Industrial Organizations
William W. Lewis, Committee for Economic Development
Robert Mednick, American Institute of Certified Public Accountants
Alan L. Olmstead, Economic History Association
Peter L. Rousseau, American Economic Association
Gregor W. Smith, Canadian Economics Association

Directors Emeriti

Glen G. Cain
Carl F. Christ
George Hatsopoulos
Saul H. Hymans
Lawrence R. Klein
Rudolph A. Oswald
Peter G. Peterson
Nathan Rosenberg
John J. Siegfried
Craig Swan

Relation of the Directors to the
Work and Publications of the
National Bureau of Economic Research

1. The object of the NBER is to ascertain and present to the economics profession, and to the public more generally, important economic facts and their interpretation in a scientific manner without policy recommendations. The Board of Directors is charged with the responsibility of ensuring that the work of the NBER is carried on in strict conformity with this object.

2. The President shall establish an internal review process to ensure that book manuscripts proposed for publication DO NOT contain policy recommendations. This shall apply both to the proceedings of conferences and to manuscripts by a single author or by one or more co-authors but shall not apply to authors of comments at NBER conferences who are not NBER affiliates.

3. No book manuscript reporting research shall be published by the NBER until the President has sent to each member of the Board a notice that a manuscript is recommended for publication and that in the President’s opinion it is suitable for publication in accordance with the above principles of the NBER. Such notification will include a table of contents and an abstract or summary of the manuscript’s content, a list of contributors if applicable, and a response form for use by Directors who desire a copy of the manuscript for review. Each manuscript shall contain a summary drawing attention to the nature and treatment of the problem studied and the main conclusions reached.

4. No volume shall be published until forty-five days have elapsed from the above notification of intention to publish it. During this period a copy shall be sent to any Director requesting it, and if any Director objects to publication on the grounds that the manuscript contains policy recommendations, the objection will be presented to the author(s) or editor(s). In case of dispute, all members of the Board shall be notified, and the President shall appoint an ad hoc committee of the Board to decide the matter; thirty days additional shall be granted for this purpose.

5. The President shall present annually to the Board a report describing the internal manuscript review process, any objections made by Directors before publication or by anyone after publication, any disputes about such matters, and how they were handled.

6. Publications of the NBER issued for informational purposes concerning the work of the Bureau, or issued to inform the public of the activities at the Bureau, including but not limited to the NBER Digest and Reporter, shall be consistent with the object stated in paragraph 1. They shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The Executive Committee of the Board is charged with the review of all such publications from time to time.

7. NBER working papers and manuscripts distributed on the Bureau’s web site are not deemed to be publications for the purpose of this resolution, but they shall be consistent with the object stated in paragraph 1. Working papers shall contain a specific disclaimer noting that they have not passed through the review procedures required in this resolution. The NBER’s web site shall contain a similar disclaimer. The President shall establish an internal review process to ensure that the working papers and the web site do not contain policy recommendations, and shall report annually to the Board on this process and any concerns raised in connection with it.

8. Unless otherwise determined by the Board or exempted by the terms of paragraphs 6 and 7, a copy of this resolution shall be printed in each NBER publication as described in paragraph 2 above.
Contents

Preface xi

Introduction 1
Michael D. Bordo and Athanasios Orphanides

Panel Session I: Pioneering Central Bankers Remember

Practical Experiences in Reducing Inflation:
The Case of New Zealand 25
Don Brash

Practical Experiences in Reducing Inflation:
The Case of Canada 37
John Crow

Discussion

I. Early Explanations

1. The Great Inflation: Did the Shadow Know Better? 61
   William Poole, Robert H. Rasche,
   and David C. Wheelock
   Comment: Christina D. Romer
   Discussion

2. The Supply-Shock Explanation of the Great Stagflation Revisited 119
   Alan S. Blinder and Jeremy B. Rudd
   Discussion
II. New Monetary Policy Explanations

3. The Great Inflation Drift
   Marvin Goodfriend and Robert G. King
   Comment: Lars E. O. Svensson
   Discussion

4. Falling Behind the Curve: A Positive Analysis of Stop-Start Monetary Policies and the Great Inflation
   Andrew Levin and John B. Taylor
   Comment: Bennett T. McCallum
   Discussion

5. Monetary Policy Mistakes and the Evolution of Inflation Expectations
   Athanasios Orphanides and John C. Williams
   Comment: Seppo Honkapohja
   Discussion

III. Other Countries’ Perspectives

6. Opting Out of the Great Inflation: German Monetary Policy after the Breakdown of Bretton Woods
   Andreas Beyer, Vitor Gaspar, Christina Gerberding, and Otmar Issing
   Comment: Benjamin M. Friedman
   Discussion

7. Great Inflation and Central Bank Independence in Japan
   Takatoshi Ito
   Comment: Frederic S. Mishkin

8. The Great Inflation in the United States and the United Kingdom: Reconciling Policy Decisions and Data Outcomes
   Riccardo DiCecio and Edward Nelson
   Comment: Matthew D. Shapiro
   Discussion

IV. International Perspectives

9. Bretton Woods and the Great Inflation
   Michael D. Bordo and Barry Eichengreen
   Comment: Allan H. Meltzer
   Discussion
PANEL SESSION II: LESSONS FROM HISTORY

Lessons from History 499
Donald L. Kohn

The Great Inflation: Lessons for Central Banks 503
Lucas Papademos

Understanding Inflation: Lessons of the Past for the Future 513
Harold James

The idea for this conference came from several conversations Michael Bordo had with Athanasios Orphanides in the early 2000s at the Board of Governors of the Federal Reserve System. We were encouraged to go forward with the project by Ben Bernanke, who at that time was a governor of the Federal Reserve. Marty Feldstein, then president of the NBER, was most supportive of the project from the outset. We would like to thank Marty and the NBER Conference Department for all their efforts in creating a memorable conference. The conference was generously funded by the Smith Richardson Foundation, and we would like to thank Mark Steinmeyer for his guidance in preparing the grant proposal.

The conference was held on September 26–27, 2008, at the Woodstock Inn in Woodstock, Vermont, shortly after the collapse of Lehman Brothers and the bailout of AIG—the most critical episode of the subprime mortgage crisis. As a consequence of the fast-emerging global banking crisis that followed these events, some of the participants from central banks could not make the conference. Meryvn King, governor of the Bank of England notified us a few days before the conference that he would not be able to attend. Lucas Papademos, then vice president of the European Central Bank, canceled his flight from Frankfurt at the last moment but subsequently sent us the remarks that he had already prepared. Remarkably, Don Kohn, then vice chairman of the Federal Reserve, managed to arrive from Washington, DC, on time to participate in the closing panel on Saturday. The late Anna Jacobson Schwartz, despite declining health, also attended the conference, her last NBER event after close to seventy years of service.

The financial crisis, the Great Recession, and the European debt crisis delayed the publication of this conference volume. Despite the delay, we believe the subject of the Great Inflation will continue to be of great inter-
est to both scholars and policymakers. While inflation in most countries is at present subdued, the risk of a run-up of global inflation in the not too distant future is not negligible in the light of the extraordinary monetary accommodation that was engineered by central banks around the world to contain the crisis. And some of the challenges facing central banks today have parallels to those faced in the period leading to and during the Great Inflation. We hope that the lessons learned from the historical experience of the Great Inflation in this conference volume will be a reminder of the costs of allowing high and persistent inflation to reoccur.
