ANNALS OF ECONOMIC AND SOCIAL MEASUREMENT

Published quarterly by the National Bureau of Economic Research, New York,
New York

MANAGING EDITOR

SANFORD V. BERG
University of Florida
Gainesville, Florida

ASSISTANT EDITOR

NEVILLE BEHARIE
National Bureau of Economic Research
New York, New York

EDITORIAL BOARD

PHILLIP CAGAN, Columbia University
SOLOMON FABRICANT, New York University
JOHN MEYER, Yale University
JACOB MINCER, Columbia University
MOHAMMED I. NADIRI, New York University
CHRISTOPHER SIMS, University of Minnesota

Communication on editorial matters should be addressed to the Managing Editor, Dr. Sanford V. Berg, Department of Economics, University of Florida, Gainesville, Florida 32601. Communications on subscriptions and other business matters should be addressed to Subscription Department, *Annals of Economic and Social Measurement*, National Bureau of Economic Research, 261 Madison Avenue, New York, New York 10016.

The *Annals of Economic and Social Measurement* has been exempted from the rules governing submission of manuscripts to, and critical review by the Directors of the National Bureau. Each issue, however, is reviewed and accepted for publication by the members of the Editorial Board, all of whom are affiliated with the NBER.

Institutional Subscription price: \$10.00 per year

Individual Subscription price: \$6.00 per year

Single copies: \$3.50

STATEMENT OF PURPOSE

The purpose of the *Annals of Economic and Social Measurement* is to promote the exchange of ideas in quantitative research. The journal will contain articles generated in the research program of the National Bureau of Economic Research or relevant to this program, mainly but not solely dealing with data generation, computer applications, and methodological problems. Participants in workshops held by the NBER's *Conference on the Computer in Economic and Social Research* and researchers affiliated with the NBER's *Computer Research Center for Economics and Management Science* will be encouraged to contribute papers.

We hope that the *Annals* will serve a catalytic role in improving techniques for economic and social measurement. Although research methodology will be stressed, descriptions of computer programs, information retrieval techniques, and data sets will also be published. Such an emphasis means that scientists can benefit from work in fields outside their immediate range of research. The objective is to provide rapid and wide dissemination of advances in the state of the art—resulting, it is hoped, in more effective use of the computer in quantitative analysis.
