PRODUCTION OF INDUSTRIAL MATERIALS in World Wars I and II

GEOFFREY H. MOORE

OUR ECONOMY IN WAR

Occasional Paper 18: March 1944

NATIONAL BUREAU OF ECONOMIC RESEARCH, INC.

1819 Broadway, New York 23, N. Y.

ARCHIVAL COPY

This study was undertaken at the suggestion of the Planning Committee of the War Production Board. The conclusions, however, are those of the author, and naturally the War Production Board is not to be understood as approving or disapproving any statement made or view expressed.

The author is indebted to Isaiah Frank, who was in charge of the study for several months before joining the staff of the Office of Strategic Services, for several memoranda and a considerable collection of statistical material which he generously put at my disposal; to Frances Goldberg, Karl Laubenstein, and Johanna Stern, who collected data and made innumerable computations; to H. Irving Forman, who drew the charts; and to Harry Eisenpress, Sophie Sakowitz, and Denis Volkenau for computational assistance from time to time.

The author is grateful to Simon Kuznets for counsel on various aspects of the study. Arthur F. Burns gave invaluable assistance and counsel at every stage of the inquiry, and the author is especially grateful for his care in reading successive versions of the manuscript. Thanks are also due Martha Anderson, John Crawford, Solomon Fabricant, Herbert Feis, Frank Garfield, Thor Hultgren, Frederick C. Mills, Wesley C. Mitchell, George Stigler, Woodlief Thomas, Albert Wohlstetter, and Leo Wolman for their suggestions and criticism.

THIS PAMPHLET has been produced in full
compliance with all government regulations
for the conservation of paper, metal, and
other essential materials.
