Acknowledgments

This volume is the result of a National Bureau of Economic Research (NBER) Conference Project. The papers were presented at a preconference at the NBER in Cambridge, Massachusetts, on 16 November 2000, and at a final conference held at the Four Seasons Biltmore Hotel, Santa Barbara, California, on 3–6 May 2001.

The editors would like to thank Martin Feldstein for his encouragement and support of this project since its inception. Furthermore, the organizational efforts of Kirsten Foss Davis and Rob Shannon of the NBER conference department were essential in making the conferences so lively and productive. In addition, we thank Helena Fitz-Patrick of the NBER publications department for skillfully shepherding the papers through the various stages to publication.

Finally, we would like to state publicly what a joy it was to have a hand in bringing together a wonderful group of social scientists for this project. We hope the chapters in the volume give some sense of the excitement generated during the debates we had along the way. It certainly helped clarify our own understanding of globalization, and we hope the same will be true for readers.
