Prefatory Note

This volume contains the papers and discussion presented at the conference on Long-Term Factors in American Economic Growth held in Williamsburg, Virginia, on March 22–24, 1984. Funds for the Conference on Research in Income and Wealth are provided to the National Bureau of Economic Research by the National Science Foundation; we are indebted for its support. We also thank Stanley L. Engerman and Robert E. Gallman, who served as co-chairmen of the conference and editors of this volume.

Executive Committee, March 1984

representative
Zvi Griliches, NBER
representative

Volume Editors' Acknowledgments

Kathi Smith handled local arrangements for the meetings on which this volume is based, Mark Fitz-Patrick prepared the papers for the press, and Annie Spillane skillfully advised the editors. Lance E. Davis, Peter H. Lindert, and Gavin Wright served as referees and offered exceptionally insightful comments and suggestions, while the discussants were unusually responsible and helpful. The editors give their thanks to these contributors to the volume and to the principal contributors, the authors of the papers.
