Prefatory Note

This volume of Studies in Income and Wealth contains the papers delivered at the June 1950 meeting of the Conference on Research in Income and Wealth at Allerton Park, Illinois. That meeting, devoted to income size distributions, was arranged in response to the widespread interest in the subject expressed at the April 1949 Annual Meeting.

To the University of Illinois we express our appreciation for the use of its facilities. Grateful acknowledgment is also made of the services of Everett E. Hagen, Chairman of the program committee, Dorothy Durand who edited the volume, and Martha Anderson and Lillian Epstein who saw it through the press.

Executive Committee, 1952-1953
Dorothy S. Brady, Chairman

Raymond W. Goldsmith    Franco Modigliani
Nathan M. Koffsky        Richard Ruggles
Simon Kuznets            Charles F. Schwartz
Donald MacGregor          Kenneth B. Williams

CONTENTS

Introduction, by Edward D. Hollander 1

PART I

A Method of Comparing Incomes of Families Differing in Composition, by Milton Friedman 9

A The Problem 11
B Possible Approaches 11
1 Segregation of Family Types 11
2 Quantification of Family Composition 11
C Existing Procedures for Derivation of Minimum Scales 13
1 For Items Consumed by the Individual 13
2 For Items Consumed by the Family 13
a Sydenstricker and King Solution 14
b Suggested Alternative Solution 14
D Alternative Procedure 14
1 Definitions 14
2 Symbolic Representation of Scales 15
3 Statistical Evaluation of Constants 17
4 Weakness in Suggested Procedure 18
E Other Applications of the Central Idea 19

Appendix, by Jean Mann Due 21

PART II

Inequality of Income: Causes and Measurement, by George Garvy 25

A Perfect Equality or Inequality as a Frame of Reference 27
B Natural and Normative Income Distributions 30
C Toward Analytical Income Distributions 36
CONTENTS

PART III

Some Effects of Region, Community Size, Color, and Occupation on Family and Individual Income, by D. Gale Johnson 49

A Regional Differences in Incomes of Farm Families and Workers 52

B Regional Differences in Incomes of Nonfarm Families 54

C Urban Salary and Wage Incomes of Individuals and Families 57

D The Puzzles 63

COMMENT

Janet Murray and Margaret Brew 67

Herman P. Miller and Edwin D. Goldfield 70

REPLY 73

PART IV

Income, Spending, and Saving Patterns of Consumer Units in Different Age Groups, by Janet A. Fisher 75

A Economic Characteristics of the Family Life Cycle 79

B Income 81

C Liquid Asset Holdings 84

D Expenditures 90

E Saving 91

1 Average Savings 92

2 Size Distributions of Dissavings 94

3 Size Distributions of Savings 95

4 Size Distributions of Amounts Saved and of Percentages of Income Saved at Different Income Levels 96

F Economic Life Cycle Patterns 101

PART V

Family Savings in Relation to Changes in the Level and Distribution of Income, by Dorothy S. Brady 103

A Certain Operating Propositions 106

B Statistical Procedures 108
CONTENTS

C Savings and Community Income, 1917-19 and 1934-36 109
D Savings and Community Income before 1917 and after 1936 115
E The Break-even Point and Community Income 118
F Interpretation of Deviations from the Normal Savings Pattern 119
G Farm Savings and Community Income Levels 121
H Expenditures and Community Income 122
I Implied Aggregate Relationships 128

PART VI
Effect of Income Concept upon Expenditure Curves of Farm Families, by Margaret G. Reid 131

A Income Concept and Problems of Measurement 141
1 Net Income Concept 141
2 Income in Kind 142
3 Current Expenses versus Capital Outlays 143
4 Change in Inventory 144
5 Joint Family and Farm Expenses 146
6 Dynamic Incomes 146

B Net Income Used in Various Investigations 148
1 Some Early Surveys 148
2 Consumer Purchases Study 152
3 Other National Surveys 153
4 An Analysis of Farm Family Accounts 153
5 Reasons for Modifying the Income Concept 154

C Farm Expenses by Net Cash Income Class and Family Expenditures 154
1 Outlays for Replacing Farm Machinery and Equipment 155
2 Total Farm Operating Expenses by Net Income Classes 156
3 Point Elasticity of Expenditures in Relation to Net Income and Rates of Change in Farm Expense 164
4 Groups with Low Farm Operating Expenses 168
5 Concluding Remarks 169

D Classifications Suggested for Groups with Highly Variable Incomes 169
1 Classification by Expenditures 170
2 Classification by Net Worth 171
PART VII

Equivalent Levels of Living: Farm and City, by Mollie Orshansky

A The Quantity-Income Elasticity Method
   1 Assumptions and General Implications
   2 Technical Problems

B Farm Family Clothing Budget
   1 Cases Selected for Study
   2 Income Used for Classification
   3 Regional Differences
   4 Price Weights
   5 Grouping Items
   6 Quantity Elasticity
   7 Price Elasticity
   8 Farm and City Clothing Budgets

C An Urban Food Budget
   1 The Data and Their Limitations
   2 Quantity Elasticity
   3 Price Elasticity
   4 Elasticity of Number of Food Items Used
   5 Further Steps

PART VIII

Directions of Further Inquiry, by Simon Kuznets

A Historical Changes and Area Differences

B Causal Factors

C Income Size and Use

D Normative Valuations
