

Yale University

Tobin Center for Economic Policy

Full-Time Post-Doctoral Associate **New Haven, Connecticut**

Job Description: The Tobin Center for Economic Policy at Yale University is inviting applications for a postdoctoral associate position. The prospective postdoctoral associate will work with faculty, students, and staff conducting policy-relevant, health economics research. During the one or two-year fellowship, the successful candidate will develop their own research agenda and work with faculty on ongoing research focused on prescription drug pricing, provider pricing, and the drivers of health spending growth over time. Their work will be supervised by Professors Zack Cooper and Fiona Scott Morton. The postdoctoral associate will have access to our unique datasets and the support of research assistants at the Tobin Center. The postdoctoral associate will be an active member of the intellectual community at Yale.

Requirements: Successful candidates should have a well-demonstrated interest in applied microeconomic research, strong communication and management skills, and have completed their PhD in economics, health economics, public policy or related fields within the last two years. The program is for one or two years and the start date is negotiable. The salary is competitive and comes with a full benefits package.

Application: Interested candidates should submit a cover letter, CV, a writing sample, and at least three letters of reference to Zack Cooper (zack.cooper@yale.edu). References can be emailed to Zack Cooper directly. Please put Tobin Postdoctoral Application in the subject line. Skype and in-person interviews will be scheduled with candidates on an ongoing basis.

Yale is an Affirmative Action/Equal Opportunity Employer committed to providing employment opportunity without regard to an individual's age, color, disability, gender, gender expression, gender identity, genetic information, national origin, race, religion, sex, sexual orientation, or veteran status.
