Full-time Research Position in Health Economics
Prof. Maya Rossin-Slater and Prof. Adrienne Sabety at Stanford's Department of Health Policy and Prof. David Rehkopf at Stanford Population Health Sciences (PHS) seek to hire a highly skilled individual to work as a full-time researcher. The position will start in June 2026, although the exact starting date is flexible and negotiable. The position is for a one-year term with the possibility of renewal for a second year.

The researcher will work on projects involving administrative Medicaid data, studying the impacts of policies and interventions affecting low-income children, women, and other individuals covered by Medicaid. The researcher will also work directly with the Center for Population Health Sciences (PHS) to curate and link the Medicaid data to electronic health record data from primary care, and to use those newly linked data for new research projects. The researcher will serve as an expert resource and potentially collaborator with Stanford students, faculty, and other researchers working with the Medicaid data.

This position is ideal for a candidate with claims data experience, who is also interested in economics or health policy. A successful candidate should exhibit strong attention to detail, time management skills, fluency in a relevant programming language (preferably Stata or R), experience in data management and curation, experience managing multiple projects at once, and a willingness to learn new technical skills and gain knowledge in US health policy.

The position is based at Stanford University. A PhD in economics, health policy, or a related field is preferred.

TO APPLY:
Please upload your application as **one** PDF file that includes a cover letter, CV, and a writing sample to the following link. Please include the names of at least two academic references on your CV or cover letter. The pdf name should be "[Lastname_Firstname]_2026." Applications not in this format will not be considered. Please see this link for the Stanford posting. Applicants must send materials through both the (1) Dropbox and (2) Stanford posting links.

Applications are considered on a rolling basis.
