Subject Index

Age, retirement rates and, 13. *See also* Eligibility ages; Retirement ages

Belgium: earnings histories and projections for, 52–53; effect of labor mobility on social security systems, 41–42; guaranteed-minimum-income pensions in, 49; labor force participation rates in, 5; labor market participation rates and retirement in, 49; option value incentive measures and, 58–60; overview of data used in study of, 51–52; pathways to retirement in, 49–51; peak value incentive measures and, 58–60; pillars of social security schemes in, 43–44; regression results for, 60–69; retirement scheme for public-sector employees in, 47–48; retirement scheme for self-employed in, 48–49; retirement scheme for wage earners in, 44–47; simulations results, 69–96; social security wealth concept and, 53–58; uncertain future of social security systems in, 41

Benefit eligibility ages, 8

Britain. *See* United Kingdom

Canada: calculation of benefit entitlements in, 114–15; Canada Pension Plan in, 103–6; data sets for, 109–12; earnings and nonlabor income projections for study of, 112–14; empirical framework for study of ISW for, 122–26; Guaranteed Income Supplement in, 106–7; labor force participation rates in, 100, 101; Old Age Security (OAS) system in, 103; one-year accrual calculation of ISW in, 115–16; option value calculation of ISW in, 117–18; overview of data for study of, 102–3; overview of transfer programs to older Canadians and, 99–103; paths to retirement in, 107–9; peak value calculation of ISW in, 117; policy simulations for, 133–46; private pension coverage in, 107; Quebec Pension Plan in, 100, 103–6; recent studies of Income Security programs, 100–102; retirement regression results for, 128–33; sample characteristics of study of, 126–28; sample estimates of difference incentive measures for, 118–22; spousal behavior for collecting entitlements in, 115; Spouse Allowance benefit, 106–7; study findings for, 146–49

Canada Pension Plan (CPP), 100, 103–6

Common reform: comparing three-year eligibility delay and, 34–35; effect of, by country, 23–25; the Netherlands simulation of, 483–94; simulation for France, 266, 272–79; simulation methodology for, 23–25; simulation results for, 30–34. *See also* Simulations; *specific country*

Denmark: constructing measures of social security wealth for, 169–75; defined benefits in, 155; estimating option-value model of retirement for, 175–77; exit routes from labor force in, 160–64; labor market pensions in, 155–56; labor participation rates in, 156–59; overview of data for study of, 167–68; overview of retirement in, 153–54; paths to early retirement in, 156; pension system in, 154; policy simulations for, 177–81; pressure for policy reforms in, 164–67; sample descriptives and earnings projections for, 168–69; social disability pensions in, 154–55; structure of working and nonworking populations in, 159–60; study conclusions for, 181–82; transitional benefits program in, 156
Disability insurance, in Sweden, 588

Earnings histories: for Belgium, 52–53; for Canada, 112–14; for Germany, 300–303; for Japan, 415–18; for the Netherlands, 471–72; for Spain, 526–31; for United Kingdom, 654–56
Eligibility ages, effect of, on retirement, 17–23. *See also* Retirement ages

France: analysis of incentives for retirement for civil servants in, 258–60; analysis of incentives for retirement in private sector in, 255–58; common reform simulation for, 266, 272–79; complementary schemes for wage earners in private sector, 241–42; computation of pensions for civil servants in, 242–43; computation of pensions for wage earners in private sector in, 238–41; data set for study of, 246–48; demographic data for studying pension benefits for, 249–51; early retirement in, 243–44; econometric analysis of retirement in, 260–65; general structure of pension system in, 237–38; incentives linked to unemployment benefits and early retirement in, 254–55; labor force participation rates in, 5, 244–45; mandatory retirement in, 243; option value incentive measures for, 253–54; overview of retirement in, 235–37; pathways to retirement in, 251–52; peak value incentive measures for, 253; reconstructing wages and pension levels for, 248–49; social security wealth for, 252–54; study's conclusions for, 279–81; three-year delay simulation for, 265–72

German Socio-Economic Panel (GSOEP), 298–300
Germany: constructing earning histories for, 300–303; constructing social security wealth for, 303–7; data sources for study of, 298–300; defining retirement status in, 301; effect of eligibility ages on retirement in, 19–22; labor force participation rates in, 5; option value incentive measures in, 309–10; overview of retirement in, 285–87; peak value incentive measures in, 307–9; public retirement insurance (GRV) system in, 287–95; public sector pensions, 295–98; regression results for, 310–17; retirement options in, 14–15; selecting retirement programs in, 301–3; self-employed workers in, 288; simulation results for, 317–23
Great Britain. *See* United Kingdom
Guaranteed Annual Income Supplement for the Aged (GAINS-A), 107
Guaranteed Income Supplement (GIS), 106–7

Hazard rates: for men in Germany, 19–22; for men in United states, 17–18

Identification issue, 12–13
Incentive measures. *See* Option value incentive measures; Peak value incentive measures; Social security wealth (SSW)
Incentives. *See* Social security incentives
Income security wealth (ISW), in Canada, 102–3; one-year accrual calculation for, 115–16; present discounted value of, 115. *See also* Social security wealth (SSW)
Italy: data set for study of, 358–62; earnings projections for, 362–63; labor force participation rates in, 5; literature review of retirement decisions in, 357–58; modeling retirement choices in, 372–85; overview of retirement in, 345–46; pre-1993 social security system rules

in, 348–51; recent expenditure trends for social security system, 347–48; reforms of 1990s in, 351–54; simulating retirement choices in, 385–90; social security wealth in, 367–72; study's conclusions for, 390–93; types of transitions into retirement in, 363–67

Japan: calculations of incentive measures for, 418–23; disability pension in, 404; earning histories and projections for, 415–18; empirical framework for regression analysis for retirement in, 423–25; employer-provided pension in, 404–5; estimation results for, 425–31; Kosei Nenkin Hoken in, 401–3, 404–5; labor force participation rates in, 5; labor market participation of elderly in, 405–10; 1999 Pension Reform Act of, 405; option value incentive measures for, 419–23; overview of data for study of, 414–15; overview of retirement in, 399–401; pathways to retirement in, 410–12; peak value incentive measures for, 419–23; research on retirement incentives for, 412–14; simulations results for, 431–59; social security wealth for, 418–19; types of pensions in, 401–5; unemployment insurance in, 403; wage subsidy for elderly workers in, 403–4; wage subsidy in, 407–8; Zaishoku Pension in, 402, 403

Kosei Nenkin Hoken (KNH, Japan), 401–3, 404
Kyosai Kumiai (Japan), 402

Labor force participation rates: in Canada, 100, 101*table;* decline in, 4–5; in Denmark, 156–57; disability insurance in, 588; in France, 244–45; in the Netherlands, 465–66; occupational pensions in, 554–88; sickness insurance in, 588–89; social security system in, 581–84; in Spain, 502, 504; in Sweden, 579; in United States, 5, 691–93, 695–97
Labor mobility. *See* Mobility, labor

Micro-estimation approach, advantages of, 2
Mobility, labor, in Belgium, and social security systems, 41–42

Netherlands, the: common reform simulation for, 483–94; data overview for, 469–71; early retirement schemes in, 464; earnings histories and projections for, 471–72; estimation results for, 475–82; labor force participation rates in, 5, 465–66; literature on retirement effects of social security in, 466–69; option value incentive measures for, 473–75; overview of retirement in, 461–62; simulations for, 482–94; social security system in, 462–66; social security wealth in, 472–73; three-year delay in eligibility simulation for, 482–94

Option value incentive measures, 606; for Belgium, 58–60; calculating, in Canada, 117–18; for France, 253–54; for Italy, 367–68; for Japan, 419–23; for the Netherlands, 473–75, 577; for United Kingdom, 15n4, 662–67; for United States, 706–7. *See also* Peak value incentive measures
Option value model, 11–12, 13–14

Pathways to retirement: in Belgium, 49–51; in France, 251–52; in Japan, 410–12; in Spain, 514
Peak value incentive measures, 12–13, 605; for Belgium, 58–60; calculating, in Canada, 117; for France, 253; for Germany, 307–9; for Italy, 367–68; for Japan, 419–23; for the Netherlands, 474–75, 477; for United Kingdom, 15n4, 662–66; for United States, 706–9. *See also* Option value incentive measures
Pension Reform Act of 1999 (Japan), 405
Personal pensions. *See* Private pensions
Private pensions: in Canada, 107; in United Kingdom, 651–53

Quebec Pension Plan (QPP), 100, 103–6. *See also* Canada

Regímenes Especiales de la Seguridad Social (RESS, Spain), 506–7, 531–32
Regimén General de la Seguridad Social (RGSS, Spain), 499–500; benefit computation for, 507–9; early retirement and, 509–10; earning distributions, earnings histories, and projections for,

526–31; family considerations and, 510–11; financing and eligibility of, 507; maximum and minimum pensions for, 510
Retirement: definitions of, 408; effect of eligibility ages on, 17–23; effect of social security incentives on, 2
Retirement ages: retirement rates and, 13; and social security provisions, 8. *See also* Eligibility ages
Retirement incentives. *See* Social security incentives
Retirement rates, age and, 13

Self-employed workers: in Belgium, 48–49; in Germany, 288; in Spain, 511–12
Simulations, 2; for delaying eligibility ages by three years, 23–25; results for three-year delay, 25–30. *See also* Common reform; *specific country*
Social security implicit tax, on earnings, 6–7
Social security incentives: effect of, on retirement, 2; and withdrawal of workers at older ages, 7–8
Social security wealth (SSW), 6, 16; Belgium study and, 53–58; for France, 252–54; for Germany, 303–7; in Italy, 367–72; for Japan, 418–19; in the Netherlands, 472–73; in Sweden, 605. *See also* Income security wealth (ISW)
Spain: early retirement in, 502; labor force participation rates in, 5, 502, 504; life expectancy in, 503–4; overview of data set for, 514–26; overview of social security system in, 499–505; pathways to retirement in, 514; policy simulations for, 547–67; public programs for old-age workers in, 505–6; regression results for, 542–47; RESS in, 506–7; RGSS in, 499–500, 507–11; sample evidence for RGSS, 539–42; schemes for farmers in, 512; schemes for public servants in, 512–14; schemes for self-employed in, 511–12; social security incentives in, 532–39; social security regimes and rules in, 506–7; structure of population in, 503–4; summary of results for, 567–68
Spouse Allowance (SPA) benefit, 106–7; provincial programs in, 107
State Earnings Related Pension Scheme (SERPS), 645, 646, 650–51
Sweden: data set used for study of, 598–600; empirical model for retirement behavior in, 614–15; housing allowances in, 590–91; incentive measures used for study of, 604–14; income tax system in, 590; labor force participation rates in, 5, 579; mandatory retirement rules in, 591; overview of research on retirement behavior in, 597–98; results of study for, 615–20; review of methodology for study of, 600–604; simulations for, 620–40; social security wealth and, 605; sources of income after retirement in, 591–97; unemployment insurance in, 589–90

Tax force to retire, 6–7
Tax rates, 5–6

Unemployment insurance: in France, 254–55; in Japan, 403; in Sweden, 589–90
United Kingdom, 15n4; basic state pension in, 650, 656; construction of incentive measures for, 656–61; earnings histories and projections for, 654–56; effect of eligibility ages on retirement in, 22–23; impact of incentive and wealth variables on retirement decision in, 667–74; income support in, 651; invalidity benefit in, 651, 658–59; labor participation rates in, 643–45; occupational pensions in, 659–61; option value incentive measures for, 662–66; overview of data used for, 653–54; peak value and option value incentive measures in, 15n4; peak value incentive measures for, 662–66; pension system in, 649–53; private pensions in, 651–53; SERPS and, 645, 646, 650–51, 656–58; simulations for, 674–79; summary and conclusions of impact on incentives on retirement decisions in, 679–80; total pension wealth and accrual measures for, 661–68; trends in state pension provision in, 645–46
United States: conclusions of study of, 726–28; effect of eligibility ages on retirement in, 17–18; impact of Social Security on retirement decisions in, 693; labor force participation rates in, 5, 691–93; labor market participation rates in, 695–97; measuring retirement incentives inherent in Social Security sys-

tem, 701–5; overview of data for, 699–701; peak value incentive measures for, 706–9; regression model for, 709–11; regression results for, 711–17; retirement options in, 14; review of retirement-incentives literature for, 697–99; simulations for, 717–26; Social Security system in, 694–95

Zaishoku Pension (Japan), 402
