

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Measuring the Subjective Well-Being of Nations: National Accounts of Time Use and Well-Being

Volume Author/Editor: Alan B. Krueger, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-45456-8

Volume URL: <http://www.nber.org/books/khue08-1>

Conference Date: December 7-8, 2007

Publication Date: October 2009

Chapter Title: List of Contributors, Indexes

Chapter Author: Alan B. Krueger

Chapter URL: <http://www.nber.org/chapters/c11974>

Chapter pages in book: (p. 253 - 262)

Contributors

David G. Blanchflower
Department of Economics
Dartmouth College
6106 Rockefeller Hall
Hanover, NH 03755

David M. Cutler
Department of Economics
Harvard University
1875 Cambridge Street
Cambridge, MA 02138

Erik Hurst
Graduate School of Business
University of Chicago
Hyde Park Center
Chicago, IL 60637

Daniel Kahneman
Woodrow Wilson School
Princeton University
322 Wallace Hall
Princeton, NJ 08544

Alan B. Krueger
Industrial Relations Section
Princeton University
Firestone Library
Princeton, NJ 08544

J. Steven Landefeld
Bureau of Economic Analysis
1441 L Street NW
Washington, D.C. 20230

Richard Layard
Centre for Economic Performance
London School of Economics
Houghton Street
London, WC2A 2AE, England

George Loewenstein
Department of Social and Decision
Sciences
Carnegie Mellon University
208 Porter Hall
Pittsburgh, PA 15213

William Nordhaus
Department of Economics
Yale University
28 Hillhouse Avenue
Box 208264
New Haven, CT 06520

David Schkade
Rady School of Management
University of California, San Diego
Otterson Hall, Room 4S144
9500 Gilman Drive #0553
La Jolla, CA 92093

Norbert Schwarz
Institute for Social Research
University of Michigan
426 Thompson Street
Ann Arbor, MI 48106

Arthur A. Stone
Department of Psychiatry and
Behavioral Sciences
Stony Brook University
Putnam Hall
Stony Brook, NY 11794

Subject Index

Page numbers followed by t or f refer to tables and figures, respectively.

- activities: identifying affectively similar, 54–59; tracking groups of, 60–64; well-being by, 44–48, 46t, 47t
- activity-based U-index, 64–68
- adaptation, 17–18
- affective experiences, determinants of, 17–18
- age, subjective well-being and, 51–53
- aggregation, National Time Accounts and, 119–20
- AHTUS. *See* American Heritage Time Use Studies (AHTUS)
- American Heritage Time Use Studies (AHTUS), 59–64, 126
- American Time Use Survey (ATUS), 13, 54, 121, 126
- Asia: happiness equations for, 191t; life satisfaction in, 192t
- attention, withdrawal of, 18
- ATUS. *See* American Time Use Survey (ATUS)
- augmented accounting, role of time in, 125–26
- Bentham, Jeremy, 107–8
- Berlin Aging Study, 24
- Bhutan, 1
- blood pressure. *See* hypertension
- brain activity, happiness and, 27
- Britain. *See* United Kingdom
- capabilities, National Time Accounts and, 98–100
- cognitive tasks, happiness and, 27
- Consumer Expenditure Survey (CES), 121
- consumer preferences, 127–30
- consumption, subjective well-being and, 49–51
- consumption statistics, 4
- core effect, theory of, 17
- day of week, effect of, on U-index, 49, 50t
- Day Reconstruction Method (DRM), 30–34, 93, 153. *See also* Princeton Affect and Time Survey (PATS); Texas DRM
- demographic groups, well-being between, 44, 44t
- double-entry accounting: National Income and Product Accounts and, 115–16; National Time Accounts and, 120–21
- DRM. *See* Day Reconstruction Method (DRM)
- Duchenne smile, 23
- Ecological Momentary Assessment (EMA), 30
- EMA, 30
- episode-level U-index, 68–69
- ESM. *See* Experience Sampling Method (ESM)

- European Quality of Life Survey (2003), 180–81t
- Experience Sampling Method (ESM), 12, 30, 31, 32
- facial action coding system, 23
- family, happiness and, 176–77, 178t
- flow utilities, 14–15
- general activity judgment measures, 15–16
- Genuine Progress Indicator, 119
- Great Britain. *See* United Kingdom
- Gross Domestic Product (GDP) per capita, life satisfaction on, 203f
- Gross National Happiness, 1
- Gross National Product (GNP), as measure of welfare, 88–89
- habituation, 17–18
- happiness, 17; age and, 51–53; cognitive tasks and, 27; econometric evidence on, 170–74; econometric evidence on microdeterminants of, 174–90, 175t; equations for Asia, 2003–4, 191t; equations for Europe, 199–201t; European Quality of Life Survey (2003), 180–81t; European rankings for, 202t; European Social Survey (2002), 183–84, 183t; findings from research on, 160–61; finding spouses and, 22–23; health status and, 181t, 182; helping others and, 23; hormones and, 26; immune responses and, 25–26; income and, 23, 53–54, 181t, 182; life satisfaction and, 158–65, 179t; mortality and, 24; neurological activity and, 26–27; predictive power of data on, 212–18, 214–16t; as purely ordinal, 148–51; role of family and, 176–77t; social welfare as additive aggregate of, 145–46; traditional measures of, vs. U-index, 230–31; U-index and, 166–70, 167t; in United States, 184–88, 189t; views on macroeconomy and, 209–12, 210–11t. *See also* Life satisfaction; unhappiness
- health status, happiness and, 181t, 182
- hedonic measurements, difficulties with, 136–41
- hedonic psychology, for valuing time, 134–36
- hedonic values, difficulties from nonseparability of, 140–41
- helping others, well-being and, 23
- hormones, affect changes and, 26
- households, economic activities of, 13–14
- housing consumption, subjective well-being and, 50–51
- hypertension: econometric evidence on, 190–93, 196t; happiness and, 27
- immune responses, happiness and, 25–26
- income, well-being and, 23, 53–54
- income growth: graphic approach to, 133–34; simplified measure of, 131–33
- individual ordinality, 134
- inflation, life satisfaction and, 203t
- interpersonal cardinality, 135; lack of, 141–43
- Kennedy, Robert, 10–11, 11n4, 87–88, 88n1, 117; vs. National Income Accounts, 88, 89t; on what makes life worthwhile, 90, 92t
- K-means cluster analysis, 54
- life satisfaction: in Asia, 192t; econometric evidence on, 170–90; for Europe, 169t, 171–74, 171n6, 199–201t; in Europe, 192t; in Europe, 1975–2006 Eurobarometers, 186–87t; in Europe, 2002 Eurobarometer, 185t; European Quality of Life Survey (2003), 180–81t; European Social Survey (2002), 183–84, 183t; findings from research on, 161–65, 163f, 164–65t; GDP per capita and, 203f; happiness and, 158–65, 179t; health status and, 181t, 182; inflation and, 203t; international comparison of, 71, 72t; predictive power of data on, 212–18, 214–16t; U-index and, 166–70, 167t; unemployment rate and, 202f; for United States, 169t, 171–74; views on macroeconomy and, 209–12, 210–11t. *See also* happiness
- longevity, happiness and, 23–24
- marginal values, difficulties in measuring, 137
- market valuation, National Income and Product Accounts and, 115
- meaning, National Time Accounts and, 94–96
- microlife satisfaction, 206–9, 207–8t
- mood states. *See* happiness

- National Economic Accounts: incorporating time use into, 127–34; as measure of welfare, 116–17; National Time Accounts vs., 117–22; nonmarket production accounts and, 117. *See also* National Income and Product Accounts (NIPAs)
- National Happiness Index (NHI), 158
- National Income Accounts (NIAs), 2, 91f; Robert Kennedy vs., 88, 89t; meaning and, 94–96; NTA as complement to, 11–12; values and, 97–98; wisdom and, 96–97
- National Income and Product Accounts (NIPAs), 113; comprehensiveness of, 114–15; development of, 9–10; double-entry accounting and, 115–16; limitations of, 10–11; market valuation and, 115; relevance of, 116; sum of final sales and, 115; timeliness of, 116
- National Time Accounts/Accounting (NTAs), 1–2, 3f, 77–80, 113, 155; accounting of, 100–102; aggregation and, 119–20; capabilities and, 98–100; as complement to National Income Accounts, 11–12; comprehensiveness and, 118–19; double-entry accounting and, 120–21; items missing from, 92–100; limitations of, 90, 91f, 100–104; National Economic Accounts vs., 117–22; past efforts for, 12–13; proposed revision to, 104; rejoinder to criticisms of, 243–51; relevance and, 121–22; retrospection and, 102; timeliness of, 121–22; validity of, 89–92; valuation and, 119–20; values and, 97–98
- near-market activities, National Accounts and, 10
- neurological activity, happiness and, 26–27
- NHI. *See* National Happiness Index (NHI)
- NIA. *See* National Income Accounts (NIAs)
- NIPA. *See* National Income and Product Accounts (NIPAs)
- nonmarket economic activity, importance of time use for, 125; inputs for, 125
- nonmarket production accounts, 117
- NTA. *See* National Time Accounts/Accounting (NTAs)
- Obama, Barack, 11n4
- pain, econometric evidence on, 196–98, 197t
- partners, interaction of, and U-index, 48–49, 49t
- PATS. *See* Princeton Affect and Time Survey (PATS)
- preference theory, 134–36
- Princeton Affect and Time Survey (PATS), 13, 31, 77–78, 153; for comparing activities, 44–48, 46t; for comparing well-being between groups, 44, 45t; design of, 34–36; evaluating, 36–44. *See also* Day Reconstruction Method (DRM)
- process benefits, 14–15
- public policy, U-index and, 145–51
- quantitative social indicators, developing, 134–36
- real income, measuring, 130–31
- retrospection, National Time Accounts and, 102
- Rubin, Robert, 9–10
- self-reported data, 20–21; finding spouse and, 22–23; helping others and, 23; income and, 23; mortality and, 24; validity of, 21–22
- social indicators, quantitative, developing, 134–36
- spouses, finding, well-being and, 22–23
- subjective experiences, assessing, 27–29; consumption and, 49–51
- subjective well-being (SWB): defined, 1; international comparison of, 69–77; measures of, 16–18; U-index vs., 71–74. *See also* happiness; well-being
- suicide rates, 172, 172t
- survey techniques, 31. *See also* Day Reconstruction Method (DRM); Experience Sampling Method (ESM); Princeton Affect and Time Survey (PATS)
- SWB. *See* subjective well-being (SWB)
- television watching, importance of, 232–36
- Texas DRM, 31–33. *See also* Day Reconstruction Method (DRM)
- time: difficulties due to nonstorability of, 138–39; difficulties due to simultaneous use of, 139–40; difficulties of placing valuations on, 137; role of, in augmented accounting, 125–26

- time accounts, 107–9. *See also* National Time Accounts/Accounting (NTAs)
- time diary information, difficulty in collecting, 13
- time use: approaches to quantitative indicators on, 126–27; current tracking methods of, 11; role of, 151–52
- time-use data, methods for collecting, 30–44
- time-use surveys, 13; historical, 59
- total utility, zero problem for, 137–38
- U-index, 18–20, 88, 108, 155–58, 227–28; activity-based, 64–68; advantages of, 3; average of selected emotions by activity and, 44–48, 46t, 47t; computing, 19; consumption and, 49–51; criticisms of, 3–6; cross-country comparisons of activities and percent of time, 74–77, 75t; day of week and, 49, 50t; defined, 3; desirable attributes of, 20; episode-level, 68–69; formation of, 109–10; happiness and life satisfaction for various demographic groups, 166–70, 167t; interaction partners and, 48–49, 49t; limitations of, 90; loss of information with, 103–4; mathematically defining, 19–20; properties of, 147–48; public policy and, 145–51; reasons for necessity of, 229–30; relative preferences and, 231–32; removing individual fixed effects when computing, 240–41; revealed preference issues and, 237–40; subjective well-being vs., 71–74; time-of-day effects and, 241; traditional happiness measures vs., 230–31; validity of, 89–92; for various demographic groups, 44, 45t
- unemployment rates, life satisfaction and, 202t, 204
