

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Social Security Policy in a Changing Environment

Volume Author/Editor: Jeffrey Brown, Jeffrey Liebman and David A. Wise, editors

Volume Publisher: University of Chicago Press

Volume ISBN: 978-0-226-07648-5

Volume URL: <http://www.nber.org/books/brow08-1>

Conference Date: October 19-22, 2006

Publication Date: June 2009

Chapter Title: List of Contributors, Indexes

Chapter Author: Jeffrey R. Brown, Jeffrey Liebman, David A. Wise

Chapter URL: <http://www.nber.org/chapters/c12466>

Chapter pages in book: (447 - 459)

Contributors

Alan J. Auerbach
Department of Economics
508-1 Evans Hall, #3880
University of California, Berkeley
Berkeley, CA 94720-3880

- Mexico, social security system in, 190, 201, 204
- Mongolia, 4, 44
- Mortality rates, 16–17
- Mortality risks, 16–17; cholesterol and, 437–38; hypertension and, 437–38; obesity and, 438. *See also* Health behaviors
- NDC. *See* Notional defined contribution (NDC) plans
- “No Lose” PRA plans, 10–11, 205–6; simulation of investment outcome distributions, 207. *See also* Personal retirement accounts (PRAs)
- Notional defined contribution (NDC) plans, 3–5; adapting, to U.S. system, 52–55; benefits and taxes under simple, 65–67; brake mechanism of, 49–52; designing, 48–52; overview of, 44–56; personal annuitized average wage (PAAW) plans vs., 96–97; simulation results for U.S. adaptation, 55–64; stochastic forecasting model for, 45–48; in Sweden, 44, 49–52; system design, 48–55
- Notional pension wealth (NPW), 48–49
- NPW. *See* Notional pension wealth (NPW)
- OASI. *See* Old-Age and Survivors Insurance (OASI) payroll tax
- Obesity, 16–17, 424; forecasting, 435–36; mortality risk and, 438
- Old-Age and Survivors Insurance (OASI) payroll tax, 6; evaluation of suggested reforms for, 26–29; impact of, 23–24; results using real data for impact of, 29–37; results using stylized workers for impact of, 24–26
- Overlapping generations (OLG) models, 389–90
- Overlapping generations (OLG) model(s): large-scale quantitative, 395–99; results for, 399–411; simple-two period, 390–94
- PAAW balances (PBALs), 85, 90–91, 91f
- PAAWs. *See* Personal annuitized average wages (PAAWs)
- PANTS (personal annuity units), 83–84
- Participation rates: Quick Enrollment plan and, 181; savings plans and, 170–73
- PAYGO (pay-as-you-go) systems, 4, 43–44, 75, 113; approaches to reducing, 304–5; comparison of PRAs to, 207–11; shifts away from, 75, 201; substituting investment-based PRA for, 9–10
- PBALs (PAAW balances), 85, 90–91, 91f
- Personal account benefit guarantees: expected costs of, 230, 232–34; pricing, 229–48; results of simulations of, 273–89; risk-neutral valuation of, 234–38; simple risk-neutral valuation model for, 238–47; types of, 231–32
- Personal account systems, 230; advocates of, 74; opposition to, 74–75. *See also* Progressive personal accounts
- Personal annuitized average wages (PAAWs), 74, 75–79; benefits of market for, 97–98; defined, 83–84; government match rate and, 105–13; implementing trading of, 98–99; notional accounts vs., 96–97; pools for, 98–99; pricing, allowing for risk aversion, 102–5; pricing, assuming risk neutrality, 100–102; private sector and, 99–100; risk and return of, 104–5; trading, 97–100. *See also* Progressive personal accounts
- Personal annuity units (PANTS), 83–84
- Personal retirement accounts (PRAs), 6, 256, 321–22; annual contract “No Lose,” 10–11, 205–6, 207; calibrating wealth simulations of, 264–73; collars for, 204–5; comparison of, relative to PAYGO benchmark, 207–11; incorporating, into Social Security, 230; limiting tax increases for, 212–17; “No Lose,” 205–6; participation in, 131–35; Social Security and, 9; substituting, for PAYGO plans, 202
- PIA (primary insurance amount), 24, 27, 28, 81–82
- Poland, 4, 44
- Policies public, for designing defaults, 187–92
- Population aging, 13–14, 385–86; returns in financial markets and, 334–35; welfare consequences of, 389. *See also* Demographic changes
- Population growth: effect of, on Social Security reform, 388; evolution of, 386–87, 386f
- PRAs. *See* Personal retirement accounts (PRAs)
- Prefunding, 299–300

- Primary insurance amount (PIA), 24, 27, 28, 81–82
- Progressive personal accounts, 5; components of, 74; converting current system to, 84–95; incorporating budget balance mechanisms into, 113–19; literature on, 79; mechanics of, 80–97. *See also* Personal annuitized average wages (PAAWs)
- Progressivity, 299–327; risk and, 301; simulation framework for, 302–4; Social Security and, 12–13; trading off risk and, 306–14
- Public policies: for designing defaults, 187–92
- Quick Enrollment plan, 180–82
- Relative earnings, defined, 81
- Retirement savings, 6
- Retirement savings plans: choosing, 6–9; impacts of default provisions of, 8–9
- Retirement wealth: distribution of, 275–79; expected utility of, 279–89; modeling accumulation of, 261–64
- Risk: approaches to reducing, 203–4; changing progressivity and, 299–327; evaluating, in retirement benefits, 305–6; idiosyncratic, 410–11; methods of limiting, 300; private market solution for reducing, 204–5; progressivity and, 301; reducing, 9; sensitivity tests for, 314–23; trading off progressivity and, 306–14. *See also* Health risks, forecasts of future
- Risk aversion, 314–23; constant relative, 305–6; declining relative, 316–19
- Risk-neutral valuation, 234–38; Black-Scholes option price formula *vs.*, 237–38; methods of, 236–37; simple model of, for benefit guarantees, 238–47
- Risk reduction, alternative approaches to, 203–4
- Ryan, Paul, 11, 230, 239
- Ryan-Sununu proposal, 239
- Save More Tomorrow (SMART) plan, 180
- Savings plans: automatic enrollment and, 170–73, 172f; changing jobs and, 177–78; contribution rates and, 173–75; participation rates and, 170–73; post-retirement cash distributions and, 178–79; preretirement cash distributions and, 177–78
- Self-directed retirement plans: modeling retirement wealth accumulation in, 261–64
- Smoking rates, 16–17, 424; forecasts for, 434–35
- Social Security: benefit formula of, 303; calculation of benefits, 3; debate on, 73–74; distortions in, 3, 25–26; effects of longevity on, 16–17; improvements in life expectancy and, 21–22; incentives toward increased retirement length of, 22–23; incorporating personal retirement accounts into, 230; investments as component of, 201; limiting tax increases of, with low cost mixed plans, 212–17; overview of current system, 80–83; personal retirement accounts and, 9; population aging and, 407–10; prefunding of, 299–300; progressivity and, 12–13; reducing risk of market-based, 9; simulation of traditional benefits of, 302–4; suggested reforms for, 3, 26–29; welfare implications from demographic change and, 410; work incentives in, 23–37
- Social Security reform: approaches to, 2–6; effect of population growth on, 388
- State Universities Retirement System (SURS) of Illinois, 6–8, 133–35; analyzing plan choices in, 149; annuity formulas, 138–40; background on, 135–37; data for, 144–47; plan choices by groups in, 148–49, 148t; portable benefit package of, 140–41; results on plan choices in, 149–60; self-managed plan (SMP) of, 141–44; traditional benefit package of, 137–38
- Sununu, John, 11, 230, 239
- SURS. *See* State Universities Retirement System (SURS) of Illinois
- Sweden, 44, 75; notional defined contribution in, 3–5; notional defined contribution (NDC) plan of, 49–52
- Treasury Inflation-Protected Securities (TIPS), 10, 102, 205–6
- United Kingdom, 201
- United States: adapting NDC system to, 52–55; longevity of, 16–17; retirement

- income institutions in, 168–70; retirement system of, overview, 73–79
- Wealth accumulation, retirement, modeling, 261–64
- Wealth simulations, calibrating PRA, 264–73
- Worker’s initial dollar benefits, 81–82
- Work incentives, 23–27
- Zero-cost “collars,” 204–5; tailoring guarantees to individual preferences with, 211–12
