

This PDF is a selection from an out-of-print volume from the National Bureau of Economic Research

Volume Title: Capital Formation in Residential Real Estate: Trends and Prospects

Volume Author/Editor: Leo Grebler, David M. Blank, and Louis Winnick

Volume Publisher: Princeton University Press

Volume ISBN: 0-870-14099-X

Volume URL: <http://www.nber.org/books/greb56-1>

Publication Date: 1956

Chapter Title: Appendix N: Tables on the Distribution of the Residential Mortgage Debt by Type of Holder

Chapter Author: Leo Grebler, David M. Blank, Louis Winnick

Chapter URL: <http://www.nber.org/chapters/c1350>

Chapter pages in book: (p. 466 - 491)

APPENDIX N

TABLES ON THE DISTRIBUTION OF THE RESIDENTIAL MORTGAGE DEBT BY TYPE OF HOLDER

TABLE N-1
Nonfarm Residential Mortgage Debt, Including
Real Estate Mortgage Bonds, Held by Noninstitutional
and Institutional Mortgagees, 1896-1952
(dollars in millions)

Column

Source

- 1 Table L-3, column 2.
- 2 Although the data are extremely poor on this point, there was nothing to indicate that major financial institutions held more than small amounts of residential real estate mortgage bonds. It was therefore assumed that the estimated amounts of such bonds outstanding were entirely in non-institutional hands. Column 2, then, represents the sum of column 2, Table L-2, and column 2, Table N-2.
- 3 Table N-2, column 3.

Notes to Table N-2 (continued)

Column	Source
	entirely of loans on one- to four-family houses. Goldsmith adopted a similar assumption in his estimates for the 1896-1924 period. The results of the 1950 census, however, permitted the Home Loan Bank Board to adjust for overcoverage.
	1951-1952: From Table N-4, column 6.
7	1896-1924: Estimated at 51.4 per cent of total nonfarm mortgage holdings as given in Table N-9. As in the case of commercial and mutual savings banks, the ratio represents the 1925 proportion of residential to total nonfarm mortgages and its use may involve the error pointed out above.
	1925-1952: Sum of column 7, Table N-4, and column 6, Table N-6.
8	1896-1924: From Goldsmith, <i>loc. cit.</i> This column is the sum of the holdings of fraternal insurance companies and "other" insurance companies shown separately by Goldsmith.
	1925-1952: Sum of column 8, Table N-4, and column 7, Table N-6.
9	1896-1924: Goldsmith, <i>loc. cit.</i> Goldsmith's data occasionally differ because of last-minute changes.
	1925-1952: Sum of column 9, Table N-4, and column 8, Table N-6.
10	Table N-4, column 10.
11	Sum of column 11, Table N-4, and column 9, Table N-6.
12	Table N-4, column 12.

3 Sum of columns 4 through 9.

4 This series represents revised estimates by the Home Loan Bank Board for the period 1925-1934 and the Board of Governors of the Federal Reserve System for subsequent years. The revision was a result of the findings of the 1950 Federal Deposit Insurance Corporation call report, which indicated a larger amount of mortgages on one- to four-family houses and a smaller amount of mortgages on multi-family structures than theretofore estimated. To this revised series have been added the estimated holdings of mortgages on multi-family structures by closed commercial banks as shown in Table N-12, column 4.

5 1925-1938: Estimated variously between 60 and 65

per cent of total nonfarm mortgages of mutual savings banks (Table N-8, column 2), other than mortgages on one- to four-family houses (Table N-4). These percentages were suggested by recent data on multi-family mortgages of savings banks.

1939-1952: Column 5, Table N-2, less column 5, Table N-4.

1925-1937: Raymond W. Goldsmith, *A Study of Saving in the United States*, Princeton University Press, 1955, Vol. I, Table M-10.

1938-1951: *Mortgage Investments of Life Insurance Companies*, Home Loan Bank Board, 1951, p. 7.

1952: Supplied by the Institute of Life Insurance.

1925-1949: Goldsmith, *op. cit.*, Vol. I, Table M-10.

1950-1952: Estimated by applying the 1949 share of mortgages on multi-family structures to the aggregate mortgage debt on multi-family structures.

- 1 Table N-2, column 7.
- 2 1896-1938: Raymond W. Goldsmith, *A Study of Saving in the United States*, Princeton University Press, 1955, Vol. I, Tables M-3 and M-8. For several years during the overlapping period 1920-1938 there are small differences between Goldsmith's nonfarm mortgage series and the nonfarm mortgage series shown in the *Life Insurance Fact Book* (Institute of Life Insurance, 1953). The differences arise from the use of slightly different samples. Goldsmith's series was preferred because it is longer.
- 3 1939-1952: *Life Insurance Fact Book*, 1953, p. 70.
