

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Discoveries in the Economics of Aging

Volume Author/Editor: David A. Wise, editor

Volume Publisher: University of Chicago Press

Volume ISBN: 0-226-14609-X (cloth); 978-0-226-14609-6 (cloth);  
978-0-226-14612-6 (EISBN)

Volume URL: <http://www.nber.org/books/wise13-1>

Conference Date: May 9-11, 2013

Publication Date: June 2014

Chapter Title: Indexes

Chapter Author(s): David A. Wise

Chapter URL: <http://www.nber.org/chapters/c13755>

Chapter pages in book: (p. 449 - 456)

Page numbers followed by the letter *f* or *t* refer to figures or tables, respectively.

- Activities of daily living (ADL), 28
- Aging: cognitive decline and, 14–15, 316–20, 326–32; effects of optimism, uncertainty, and potential cognitive decline on, 3; expectations and, 305–7, 311–16; life expectancy and, 4
- Anemia. *See* Iron deficiency anemia (IDA)
- Asset and Health Dynamics Among the Oldest Old (AHEAD), 8, 160, 161–62
- Asset evolution, regression models for, 173–79
- Baby boomers, aging, societal impact of, 1
- Children and grandchildren, elderly living with: findings about well-being worldwide for, 293–99; health of elderly and, 3, 12–14; introduction, 283–84; well-being and, 284–93. *See also* Elderly who live with children, well-being of
- Cognitive decline, expectations, aging and: aging and, 316–32; effect of, on aging, 3, 14–15; expectations and, 326–32; introduction, 305–7; measurement issues, 320–26
- Compression of morbidity. *See* Morbidity, compression of
- Computer-assisted computer interviewing (CAPI), 229
- DFS. *See* Double-fortified salt (DFS)
- Disability: defined, 30; factors influencing changes in, 35–40; health and, 4–8; measures of, 30–32; structural framework for studying, 3, 3f
- Disability-adjusted life expectancy, 44–49
- Disease prevalence, as measure of health, 32–34
- Double-fortified salt (DFS), 15–16, 345; design of pricing experiment, 371–73; results of information campaign experiment, 376; results of pricing experiment, 373–76; setting and background, 346–47. *See also* Iron deficiency anemia (IDA)
- Drug-eluting stents. *See* Stents, drug-eluting
- Early retirement, mental health and: account for reverse causality and common unobservable factors, 237–44; conclusions of study, 244–49; controlling for background variables, 233–37; introduction, 225–28; SHARE data for study of, 228–30; social networks and, 230–33. *See also* Retirement
- Economic Growth and Tax Relief Reconciliation Act (2001), 411
- Elderly who live with children, well-being of: health of, 3, 12–14; introduction, 283–84; in United States, 284–93; worldwide findings, 293–99

- English Longitudinal Study of Ageing (ELSA), 228, 256–58
- Expectations: aging and, 311–16; cognitive decline and, 326–32; data, 307–11; introduction, 305–7; measurement issues, 320–26
- Expectations, aging, cognitive decline and: aging and, 311–16; introduction, 305–7
- Financial well-being, retirement: conclusions of study of health and, 179–81; data for analyzing, 161–62; distribution of change in nonannuity wealth between 1995 and last year observed, 166–68; distribution of percent change in nonannuity wealth between 1995 and last year observed, 168–71; future directions for study of, 181; health and, 2, 3, 8–10; health and change in nonannuity assets between 1995 and last year observed, 171–73; health events and, 159–60; health index for study, 162; nonannuity assets and last year observed, 164–66; potential pathways between poor health and, 162–64; regression models for asset evolution, 173–79; trends in, from 1993 to last year observed, 164–66. *See also* Roth 401(k)s
- Functional limitations, as measure of health, 34–35
- Gallup-Healthways Well-Being Index, 284
- Grandchildren. *See* Children and grandchildren, elderly living with
- Health: determinants of, 10–15; disability and, 4–8; disease prevalence as measure of, 32–34; elderly living with grandchildren and, 3, 12–14; financial well-being and, 2, 3, 8–10; functional limitations as measure of, 34–35; interventions to improve, 3, 15–18; pathways between SES and, 203–6; potential for innovations on, 3; retirement and, 3; spousal effects on, 3, 12; structural framework for studying, 2–3, 3f; summary measures of, 40–42; trends in, 32–44. *See also* Financial well-being; Mental health, early retirement and; Spousal health effects
- Health and Retirement Study (HRS), 6, 14, 116, 160, 191–94, 193t, 228; cohorts included in, 83, 84t; exit interviews for assessing lifetime nursing home exposure, 87–88; population representativeness of, 86–87; for studying expectations, aging, and cognitive decline, 307–11; for studying spousal health effects, 256–58; use of, for lifetime risk of nursing home use, 82–86
- Health dynamics, 196–201
- Health indexes, 7–8; approaches to, 115–16; comparison of variants of, 141–43; country-specific reporting behavior and, 142–43; data for, 116–17; discussion of findings, 143–44; effects of model structure and, 142; introduction, 115–16; methodology used by Jürges for constructing, 119–20; methodology used by Meijer, Kapteyn, and Andreyeva for constructing, 117–18; methodology used by Poterba, Venti, and Wise for constructing, 118–19; variables used in constructing, 120–24, 122–23t
- Health measures: empirical properties of, 124–32; labor force transitions and, 132–41; self-reported general health (SRH), 116
- HRS. *See* Health and Retirement Study (HRS)
- IADL (Instrumental activities of daily living), 28
- IDA. *See* Iron deficiency anemia (IDA)
- Indexes. *See* Health indexes
- Innovations, potential for, on health, 3
- Instrumental activities of daily living (IADL), 28
- Iron deficiency anemia (IDA), 15–16; associations between health characteristics and, 364–80; baseline survey for study of, 347; cognitive health of participants in baseline survey, 359–64; demographics of baseline survey, 347–50, 348t, 349t; health of adults in baseline survey, 353–58, 354–55t; health of children in baseline survey, 350–53, 351t; introduction, 343–46. *See also* Double-fortified salt (DFS)
- Jürges model of health, 119–20
- Labor force transitions, health measures and, 132–41

- Last year observed (LYO): distribution of change in nonannuity wealth between 1995 and, 166–68; distribution of nonannuity assets in, 170–71; distribution of percent change in nonannuity wealth between 1995 and, 168–70; health and change in nonannuity assets between 1995 and, 171–73; nonannuity assets and, 166; trends in wealth from 1993 to, 164–66
- Life expectancy, 21; aging and, 4; disability-adjusted, 44–49
- Lifetime risk, 82; of nursing home stay, 90–94. *See also* Nursing home use
- Long-term care, risk of, 5–6, 81–82. *See also* Nursing home use
- LYO. *See* Last year observed (LYO)
- Marriage models, 262–77
- Medicare Current Beneficiary Survey (MCBS), 4–5, 22; about, 25–29; summary of health status measures, 30–32
- Meijer, Kapteyn, and Andreyeva (MKA) estimate models of health, methodology used for, 117–18
- Mental health, early retirement and: introduction, 225–28; SHARE data for study of, 228–30; social networks and, 230–33
- MKA (Meijer, Kapteyn, and Andreyeva) estimate models of health, methodology used for, 117–18
- Morbidity, compression of, 21–25; comments about study of, 51–79; data sources for study of, 25–32; defined, 23–25; disabled and disability-free life expectancy for studying, 44–49; disagreement on, 22; evidence on trends in, 4, 21–22; issue of, 4–5; trends in health status by time until death, 32–44
- Nonannuity wealth, 166–73
- Nursing home populations, population representativeness of, 86–87
- Nursing home use: age prevalence of, 88–90; comments about study of, 110–12; data sources for study of, 82–88; discussion of results of models, 106–8; estimation results of models, 96–106; importance of exit interviews for assessing lifetime, 87–88; introduction, 81–82; lifetime risk of, 90–94; results of simulation model, 96–106; simulation model for lifetime distribution and length of, 95–96. *See also* Long-term care, risk of
- Optimism: affect of, on aging, 3, 14–15; age profiles of, 313–15
- Panel Survey of Income Dynamics (PSID), 272–77
- Partner selection, 255–56; effects of, 258–62. *See also* Spousal health effects
- Personal retirement accounts (PRAs), 160. *See also* Roth 401(k)s
- Poterba, Venti, and Wise (PVW) model of health, 118–19
- Principal component analysis, 118–19
- Retirement: early, effects of, 10–11; health and, 3; three-legged stool for, 159–60. *See also* Early retirement, mental health and; Financial well-being, retirement
- Roth 401(k)s, 17–18; contribution limits, 416; data description, 416–19; introduction, 411–13; regression analysis of usage correlates, 428–38; rules and economics of, 413–15; summary statistics on usage and users of, 419–28. *See also* Financial well-being, retirement
