

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Insights in the Economics of Aging

Volume Author/Editor: David A. Wise, editor

Volume Publisher: University of Chicago Press

Volume ISBNs: 0-226-42667-X; 978-0-226-42667-9 (cloth);
978-0-226-42670-9 (e-ISBN)

Volume URL: <http://www.nber.org/books/wise-21>

Conference Date: April 30-May 2, 2015

Publication Date: March 2017

Chapter Title: Indexes

Chapter Author(s):

Chapter URL: <http://www.nber.org/chapters/c14189>

Chapter pages in book: (p. 377 – 388)

Contributors

Philip Armour

Subject Index

Note: Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- Activity of Daily Living (ADL), 161–62; trend in disability by time until death, 170–71, 171f; trends in, 167–70, 169f
- Acute myocardial infarction (AMI) patients: average mortality between black and white, 209; black vs. white, 206; data and methodology for study of, 209–11; results of study of, 212–20. *See also* Racial disparities, in US health care
- Ages, for retirement, 346–48, 347t
- Aging, literature on subjective well-being and, 340
- American Community Surveys (ACS), 312–13
- Anemia, 11–12, 285–86; baseline descriptive statistics for study of, 289, 290t, 291t, 292t; in Bihar, 288–89; description of experiments used to study, 289–95; results of experiments for study of, 295–303; use of edutainment movies and, 294; use of soap operas and, 294–95. *See also* Double-fortified salt (DFS); Salt
- Asset and Health Dynamics among the Oldest Old (AHEAD), 129–31
- Assets. *See* End-of-life assets
- Australia, 4–5; liquidity of DC plans in, 49–50; methodology for study of liquidity of DC plans in, 62–65
- Bihar, anemia in, 288–89. *See also* Anemia
- Biomarker-based measures, of disease prevalence, 228
- British Household Panel Study (BHPS), 90, 113
- Canada, 4–5; liquidity of DC plans in, 49; methodology for study of liquidity of DC plans in, 58–62
- Cardiovascular incidence, effects of pharmaceutical and surgical interventions on, 180–90
- Cash-outs. *See* Pension cash-outs
- Death: causes of, 164–66, 165f; classifications, 164; trends in distribution of time until, 167, 168f
- Defined-benefit (DB) plans, 16; job separations and cash-outs from, 28–30
- Defined-contribution (DC) liquidity: in Australia, 49–50; in Canada, 49; in Germany, 48–49; in Singapore, 48–49; in United Kingdom, 48–49; in United States, 50–52
- Defined-contribution (DC) plans, 16; countries included in study of liquidity of, 46–47; job separations and cash-outs from, 28–30
- Depression, by country, 344t
- DFS (doubled-fortified salt), 286–88

- Diabetes: biomarker-based measures of prevalence, 228; data for study of prevalence of, 230–32; literature on survey self-reports and biomarker-based measures of, 228; measurement error of survey self-reports of, 229; predictors of, 228–29; predictors of, in multivariate regions, 243–46, 244–45t; probability of undiagnosed, 246, 247–49t; reliable measures of prevalence of, 227–29; results of study of prevalence of, 232–49; survey self-reports of, 228; undiagnosed, 229
- Diabetes prevalence: comparison of measures of, 233–35, 234t; data used for analysis of, 230–31; by gender and by educational levels, 232, 232t; how having undiagnosed diabetes varies by gender, 237–39, 238t; for individuals who do not self-report diabetes, 236t, 237; predictors of, 228–30; reconciliation of self-reports and biomarker data, 235, 235t; summary statistics, 239, 240–42t
- Disability: defined, 161–62; health and, 6–12; measuring, 171–72; medical conditions affecting, 173–78
- Disability-free life expectancy, 171–73; by disease, 178–80; increase in, at older ages in US, 162; trend in, 172, 173f. *See also* Elderly population of United States; Life expectancy
- Disabled life expectancy, 171–73; by disease, 178–80; trend in, 172, 173f. *See also* Elderly population of United States; Life expectancy
- Disease prevalence: literature on survey self-reports vs. biomarker-based measures of, 228; reliable measures of, 227–28
- Disparities: sources of health, 206; within-hospital, 206–7
- Double-fortified salt (DFS), 286–88. *See also* Anemia
- Economic theory of suicide, 308
- Edutainment movies, use of, for teaching about anemia, 294
- Elderly population of United States: disability and, 166–71; disability-free life expectancy of, 161–63; effect of pharmaceutical and surgical interventions in reducing cardiovascular incidence, mortality, and morbidity of, 180–90; health trends, 163–71; life expectancy at 65 of, 164f; life expectancy of, 163–66; vision impairment in, 190–96
- End-of-life assets, 6, 127; data description for, 129–31; defined, 130; pathways to low levels of, 127–28; regression estimates of, 145–54; summary tabulations of, 131–39; trajectories for, 139–43
- Endowment mortgages, in United States vs. United Kingdom, 110–11, 111t
- Financial well-being, 3–6
- Future house price risk, 88
- Gallup-Healthways Well-Being Index (GHWBI), 309
- Germany, 4; liquidity of DC plans in, 48–49; methodology for study of liquidity of DC plans in, 69–71
- Great Recession, 16, 19, 21–22
- Happiness, retirement and, 13–14
- Health, disability and, 6–12
- Health and Retirement Study (HRS) data, 16, 18–22, 340–47; data on subjective well-being in, 342t
- Healthy life expectancy, data on, 7. *See also* Life expectancy
- Home ownership: age of, in United States and United Kingdom, 100–104; as hedge against uncertainty, 88
- House price risk, 88; empirical relations between housing choices and, 100–111; housing choices in presence of, 96–100; numerical simulation of simple model of ownership and housing equity in presence of, 114–18
- House price volatility, in United States and United Kingdom, 93–96
- Housing choices: empirical relations between house price risk and, 100–111; in presence of house price risk and housing ladder, 96–100
- Housing consumption, in United States and United Kingdom, 104–6
- Housing ladder, 5, 87–93; housing choices in presence of, 96–100; numerical simulation of simple model of ownership and housing equity in presence of, 114–18
- HRS. *See* Health and Retirement Study (HRS) data
- Instrumental Activity of Daily Living (IADL), 161–62; trend in disability by

- time until death, 170–71, 171f; trends in, 167–70, 169f
- Iron deficiency, 285. *See also* Anemia
- Job separations, pension cash-outs and, 24–30
- Labor force participation, 20–22; men, 20f; subjective well-being and, 340; women, 21f
- Labor force status, 22–23
- Life expectancy, 163–66; as function of mortality rates, 163; healthy, data on, 7; at 65 in US, 164–65, 164f, 171; standard measure of, 171; trend in total, 172, 173f; trends, 172, 173f. *See also* Disability-free life expectancy; Disabled life expectancy; Elderly population of United States
