

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: U.S. Engineering in a Global Economy

Volume Author/Editor: Richard B. Freeman and Hal Salzman, editors

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-46833-4 (cloth); 978-0-226-46847-1 (e-ISBN)

Volume URL: <http://www.nber.org/books/free12-1>

Conference Date: September 26–27, 2011

Publication Date: April 2018

Chapter Title: List of contributors, Indexes

Chapter Author(s):

Chapter URL: <http://www.nber.org/chapters/c14371>

Chapter pages in book: (p. 285 – 297)

Contributors

anthony lising antonio
School of Education
Stanford University
Stanford, CA 94305

Stephen R. Barley
Technology Management Program
College of Engineering
University of California, Santa
Barbara
1320 Phelps Hall
Santa Barbara, CA 93106-5129

Erling Barth
Institute for Social Research
PO Box 3233 Elisenberg
N-0208 Oslo, Norway

Samantha R. Brunhaver
The Polytechnic School
Ira A. Fulton Schools of Engineering
Arizona State University
7171 E. Sonoran Arroyo Mall
Mesa, AZ 85212

Helen L. Chen
Designing Education Lab
Office of the Registrar, Wallenberg Hall
Stanford University
450 Serra Mall, Building 160
Stanford, CA 94305-2055

James C. Davis
Boston Federal Statistical Research
Data Center
National Bureau of Economic
Research
1050 Massachusetts Avenue
Cambridge, MA 02138

Richard B. Freeman
National Bureau of Economic
Research
1050 Massachusetts Avenue
Cambridge, MA 02138

Shannon K. Gilmartin
The Michelle R. Clayman Institute for
Gender Research
Stanford University
589 Capistrano Way
Stanford, CA 94305-8640

Susan Helper
Weatherhead School of Management
Case Western Reserve University
11119 Bellflower Road
Cleveland, OH 44106-7235

Ron Hira
Department of Political Science
Howard University
Washington, DC 20059

Yoon Sun Hur
Korea Institute for International
Economic Policy (KIEP)
[30147] Building C, Sejong National
Research Complex, 370
Sicheong-Daero, Sejong-si, Korea

Morris M. Kleiner
University of Minnesota
Humphrey School of Public Affairs
260 Humphrey Center
301 19th Street South
Minneapolis, MN 55455

Russell F. Korte
Department of Human Organizational
Learning
Graduate School of Education and
Human Development
The George Washington University
2134 G St NW
Washington, DC 20037

Jennifer Kuan
A. B. Freeman School of Business
Goldring/Woldenberg Hall
Tulane University
7 McAlister Drive
New Orleans, LA 70118-5698

Daniel Kuehn
The Urban Institute
2100 M Street, NW
Washington, DC 20037

Leonard Lynn
Weatherhead School of Management
Case Western Reserve University
10900 Euclid Avenue
Cleveland, OH 44106-7235

Hal Salzman
E. J. Bloustein School of Planning &
Public Policy
J. J. Heldrich Center for Workforce
Development
Rutgers University
New Brunswick, NJ 08901

Sheri D. Sheppard
Department of Mechanical
Engineering
Peterson Building (550)
Stanford University
Stanford, CA 94305-4021

Subject Index

Page numbers followed by “f” or “t” refer to figures or tables respectively.

- Academic Pathways of People Learning Engineering Survey (APPLES), 49–52, 57, 71–72, 132
- Academic Pathways Study (APS), 132, 133
- aerospace engineers, 13–14; as component of technology innovation, 14
- African American engineers, 92–94; access to education for, 94–105
- African American women, access to engineering and computer science for, 109–12
- Aligning Educational Experiences with Ways of Knowing Engineering (AWAKEN), 131–32
- American Society of Civil Engineers (ASCE), licensing and, 220
- APPLES (Academic Pathways of People Learning Engineering Survey), 49–52, 57, 71–72, 132
- automotive supply chains, 193–95; description of, 196–200; engineering interactivity in, 206–13; identifying firms in, 195–96; interactivity of engineers in, 206–10; types of engineering activity in, 200–205
- bachelor’s degrees, engineering: female share of, 41t; race and ethnicity composition of, 40t; trends in, 28–38
- bioengineering, 68–70
- Bush, Vannevar, 11, 21
- Carnegie Classification, 78–79
- Center for the Advancement of Engineering Education (CAEE), 50n2, 51
- certification, as form of regulation, 218
- civil engineering majors, 68
- civil engineers, 13, 14
- computer science education: analysis of access to, 105–9; entry of African American women to, 109–12
- Crotonville speech, 91–92
- data sources, for demand for engineers, 12–13
- Demand and Supply of Scientific Personnel, The* (Blank and Stigler), 1
- demographics, engineering education, 39–41
- engineering education: analysis of access to, 94–105; bachelor’s degree trends, 28–38; demographics, 39–41; entry of African American women to, 109–12; graduate degree trends, 38–39; graduates, 1966–2013, 29f; minorities and, 94–105; 1970s intervention for black students, 91–94; supply of new engineers and, 27–28. *See also* engineering students, undergraduate; HBCUs (historically black colleges and universities)
- engineering interactivity, in automotive supply chains, 206–13

- engineering labor markets: analysis of demand and supply sides of, 3; demand side of, 4; dynamics of, 243–44; institutional structures and, 7–8; operation of, 4; responsiveness of, to changes in demand, 246–47, 253–54; retirement and, 25–28; role of, and undergraduate engineering students, 67; shortage and mismatch claims and, 244–47; shortage fears and, 12; supply issues of, 3. *See also* engineering workforce; petroleum engineers/engineering
- engineering pathways, student-level factors in, 74–77
- Engineering Pathways Study (EPS), 133
- engineering practice, 129–30; background studies of, 131–36; changing expectations for, 147–49; findings of changing views of, 143–47; findings of knowledge and skills in, 138–43; methodology of interview analysis for, 136–37; summary and implications of findings for, 149–56
- engineering programs, 129–30; studies of, 131–36
- engineering students, undergraduate, 49–51; average median salaries of, by occupational categories, 64t; data for study of, 51–57; early career paths of, 70–72; findings on postgraduation plans of, 57–70, 58t, 59t, 73–74; labor market outcomes, 112–19; results of multinomial logit models of postgraduation plans of, 61–62t; role of labor market and, 67; role of major field of study and, 67–70, 73–74; role of SES and, 65–67, 66t. *See also* HBCUs (historically black colleges and universities)
- engineering workforce: data sources for demand for, 12–13; in federal government, 22–25, 23t; in state and local governments, 23t, 24. *See also* engineering labor markets; engineers
- engineers: bachelor's degree trends, 28–38, 30f; composition of, by federal government, 23t; composition of, by state and local governments, 23t; concentration in manufacturing sector of, 16; decline in unionization for, 218, 219f; defined, 13; demand for, 13–17; early career paths of, 70–72; earnings and, 181–85; effect of pass rates on hours worked by, 240t; employed in engineering, 18–19; employment of, by occupation, 20f; employment patterns of, 14–16, 15t; engineering education and supply of new, 27–28; in establishment production function, 175–80; fears of shortages of, 11–12; at goods- and services-producing establishments, 169–75; government demand for, 19–25; government regulation of, 220–22; graduate degree trends, 38–39; graduate trends by level of degree award, 28–29, 29f; industrial sectors employing, 17t; influence of professional exams and hours worked by, 239t; influence of professional exams and pass rates on wage determination of, 238t; influence of professional exams on wages and hours of, 233, 234t, 235t, 236t; licensing of (*see* licensing, occupational); in manufacturing sector, 16 (*see also* manufacturing establishments); minorities and, 92–94; non-R&D, 6–7; percentage licensed by specialty, 1995 and 2012, 221, 221t; in PSTS industry, 16–17; retirement and replacement demand for, 25–27; role of, 11–12; salaries of, 17–19, 18t; supply of, in U.S. labor market, and economic conditions, 5–6; unionization and, 218, 219f. *See also* petroleum engineers/engineering
- EPS (Engineering Pathways Study), 133
- exams, professional, influence of, on wages and hours of engineers, 233, 234t, 235t, 236t
- federal government engineering workforce, 22–24, 23t; data sources for, 24; future demand for, 24–25
- finite element analysis (FEA), 207–8
- Fiorina, Carly, 263
- foreign students, in engineering programs, 40–51
- foreign workers, dependency on, 254–56
- FTE (full-time equivalent) work, scientist and engineer, 171
- goods- and services-producing establishments, scientists and engineers at, 169–75
- government: demand for engineers by, 19–

- 25; percentage of engineering graduates working as engineers in, 25t
graduate degrees, engineering, trends in, 38–39, 39t
Graham, Daniel, 33
green cards. *See* permanent resident vs. guest worker status
guest workers, status, vs. permanent residents, 264–65
guest worker visas, 264
- HBCUs (historically black colleges and universities), 87–88; educational opportunities in engineering and, 89–90; graduates in STEM fields and, 3; graduation rates of, 90; historical context of, 88–90; STEM occupations and, 3; supportive environments of, 90–91. *See also* engineering education
hierarchical linear modeling (HLM) techniques, 52–53
higher education, U.S.: infrastructure of, 88–91; 1970s intervention for, 91–94
