

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Productivity in Higher Education

Volume Authors/Editors: Caroline M. Hoxby and Kevin Stange, editors

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-57458-5 (cloth); 978-0-226-57461-5 (electronic)

Volume URL:

<https://www.nber.org/books-and-chapters/productivity-higher-education>

Conference Date: May 31–June 1, 2016

Publication Date: November 2019

Chapter Title: List of contributors, indexes

Chapter Author(s):

Chapter URL:

<https://www.nber.org/books-and-chapters/productivity-higher-education/list-contributors-indexes>

Chapter pages in book: (p. 317 – 326)

Note: Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- accountability movement. *See* postsecondary accountability movement
- achievement. *See* student achievement
- acute myocardial infarction (AMI), 18–19
- attribution problem, 3, 25–26; for measuring productivity, 35–36
- average dollar, vs. marginal dollar, productivity of, 47–49
- baccalaureate institutions, 82–91
- benefits, of higher education, 3
- brick-and-mortar institutions, 11–12, 259–60
- California Community Colleges (CCC), 294–301
- California State University (CSU), 294–301
- college outputs, 105
- college productivity, measures of, 106–7. *See also* productivity
- college rankings under earnings and learning, majors and, 107
- Colombia, 106; access to college in, 108–10; college entrance exam in, 110–11; college exit exam in, 111–12; data sources and sample test for analysis of, 112–15; outcome variables used, 115–20; results of analysis of, 120–30
- common support, and solving selection problems, 39–41
- community colleges, 12–13, 291–92; data used for study of, 296–97; empirical methods employed for study of, 301–5; factors for success in transfer function among, 308–11; goals of, 292–93; measures used for study of, 297–300; productivity of, 12–13; reasons for success in transfer function of some, over others, 308–11; results of study, 305–8; setting for study of, 294–96; transfer function of, 293–94. *See also* higher education institutions
- “cream-skimming” problem, 72
- credits, college: major specific trends in spending and, 163–65; overall spending trends, 161–63, 162f; staff inputs and spending per, 165–68
- Distance Education Demonstration Program (DEDP), 264
- dropouts, student, 160–61
- earning measures, vs. learning measures, and productivity, 7
- earnings, of students, 5, 105–6; by major, 154t; measures of, and student SES, 106–7; measuring outcomes of, 75–76; vs. per-graduate net value by major, 157t
- education “markets,” defined, 261

- effectiveness. *See* instructor effectiveness
- enrollment, impact of online competition on, 274–76
- expenditures, instructional, impact of online competition, 280–82
- faculty: efficient deployment of, 177–80; empirical evidence for deployment of, 194–204; empirical strategy and data for, 192–93; labor markets, 180–88; market forces and salaries of, 184–88; salaries, 178–79, 180–84; theoretical framework for faculty deployment and salaries, 188–92
- faculty deployment: data used for model, 192–94; empirical evidence for, 194–204; empirical strategy for, 192–94; substitution and, 178; theoretical framework for, 188–92
- gender match between instructors and students, student achievement and, 213
- health care: lessons for measuring productivity in, 26–28; measuring productivity in, 17–19; shared challenges to measuring productivity in higher education and, 19–26
- heart attacks. *See* acute myocardial infarction (AMI)
- Herfindahl index, 261–62, 270
- higher education: lessons from measuring productivity in health care for, 26–28; shared challenges to measuring productivity in health care and, 19–26
- Higher Education Act (HEA), 264
- higher education institutions: market power of, and competition, 282–85; as multi-product organizations, 23–25. *See also* community colleges; faculty deployment; online education; postsecondary institutions, US; research universities; University of Phoenix (UPX)
- higher education markets, online degrees and, 265–67
- Higher Education Reconciliation Act (HERA), 264
- horizontal selection, 32, 38–39
- hospitals, as multiproduct organizations, 23–25
- Icfes (Colombian college entrance exam), 110–11
- incomes. *See* salaries, faculty
- innovation, productivity measures based on, 60–63
- innovation productivity, 32
- instructional dollars, returns per, 158–60
- instructor effectiveness, 10–11; challenges to measuring, 209–10; correlation with experience and pay, 243–49; gender match between instructors and students and, 213; introduction to, 209–12; racial match between instructors and students and, 213; results on, at University of Phoenix, 230–42; student achievement and, 212–13. *See also* University of Phoenix (UPX)
- Integrated Postsecondary Education Data System (IPEDS), 263, 267–68
- Internet penetration rates, measuring, 271–72, 272f
- interstate mobility, 73–75
- labor market data, conceptual/practical challenges to using, 71–76
- labor markets, faculty, 180–88
- learning, 105–6; measures of, vs. earning measures, and productivity, 7; standardized tests for, 107
- lifetime earnings, 51f; productivity measures based on, 51–58
- lifetime measures, 46–47
- majors, college: analysis of cost differences between, 8; cost data for study, 140–43; cost heterogeneity of, 148–52, 149–50f; costs of, 145–47; cost trends for, 161–68; distribution of credits and graduates over, 147–48; earnings by, 154t; earnings heterogeneity of, 152–55; earnings vs. per-graduate net value by, 157t; externalities and choice of, 137–40; factors for choice of, 137–40; instructor data for study, 143; introduction to, 133–36; literature related to, 136–37; log earnings heterogeneity of, 153f; microdata extracts for study, 143–45; net returns of, 155–60; present discount values by major, 156t; private incentives and choice of, 137–40; productivity variations among, 8; spending per credit per graduate by, 151t; spending variation by, 151t
- marginal dollar, vs. average dollar, productivity of, 47–49

- market forces, 5–6; faculty salaries and, 184–88
- market power, of higher education institutions, and competition, 282–85
- massive open online courses (MOOCs), 259–60. *See also* online education
- minimum efficient scale, 11
- mobility, interstate, 73–75
- multiple outcome issues, 2, 6; productivity and, 37–38
- multiproduct organizations, 2, 23–25
- normalization, 45–46
- online degrees, higher education markets and, 265–67
- online education, 11; brief history of, in US, 263–65; data for, 267–72; empirical strategy for examining, 272–74; enrollment results, 274–76; heterogeneity in market power across sectors and county size, 282–85; introduction to, 259–63; measuring enrollment in, 264–65; robustness checks, 285–28; spending results, 280–82; tuition results, 276–80. *See also* University of Phoenix (UPX)
- outcomes: for graduates vs. entrants, 76; measuring, beyond earnings, 75–76; timing of measuring, 75
- output-based accountability, 69–70
- outputs, college, 105
- paired comparison methods (PCMs), 40–41
- PDVs. *See* present discount values (PDVs)
- performance funding (PF) policies, 70–71
- postgraduation outcomes, 70–71
- postsecondary accountability movement: conceptual/practical challenges to using labor market data for, 71–76; empirical methodology used for, 77–82; introduction to, 67–69; labor market outcome (LM) metrics used in study, 100–101; policy background to, 69–71; results of study, 82–97
- postsecondary institutions, US: “bin” results for productivity findings, 49; data for, 44–45; grouping, by selectivity, 50; lifetime measures and issues resulting from, 46–47; measuring productivity of, 31–33; normalization issues for measuring, 45–46; productivity of average dollar vs. marginal dollar issues, 47–49; results for productivity measures, 51–63. *See also* higher education institutions; productivity
- postsecondary markets, defined, 268–71
- present discount values (PDVs), 134, 155–61; by major, 1556t
- productivity: assessing, 3; attribution problem for measuring, 35–36; of average dollar vs. marginal dollar, 47–49; challenges to measuring, in health care and higher education, 19–26; defining, 33; in health care, measuring, 17–19; innovation, 32; learning measures vs. earning measures for, 7; lessons from measuring, in health care, for higher education, 26–28; measures of, and correlation of earnings and learning, 106; measures of, based on innovation, 60–63; measures of, based on public service, 58–60; measures of college, 106–7; measuring, of US postsecondary institutions, 31–33; multiple outcome issues and, 37–38; public service, 32; reasons for usefulness of, 34–35; selection issue for measuring, 35, 38–44; student composition vs., 72–73; unadjusted measures, 6; variations of, among college majors, 8. *See also* postsecondary accountability movement
- public service, productivity measures based on, 58–60
- public service productivity, 32
- racial match between instructors and students, student achievement and, 213
- randomization, and solving selection problems, 39, 41–44
- research universities, 179; faculty salaries at, 182–83. *See also* higher education institutions
- salaries, faculty, 180–84; aligning, with faculty productivity, 9; disciplines and, 183–84, 184t, 187f; heterogeneity in, 179; market forces and, 184–88; overall trends in, 181f; reasons for differences in, 9; by types of institutions, 182t, 183
- selection issues, 3, 5, 38–44; horizontal, 32, 38–39; for measuring productivity, 35; vertical, 32
- selective admissions, 268, 268n6
- state labor market data, conceptual and practical challenges to, 71–76

- student achievement: gender match between instructors and students and, 213; instructor effectiveness and, 212–13; racial match between instructors and students and, 213; teacher quality and, 212–14
- student composition, productivity vs., 72–73
- subbaccalaureate institutions, 91–93
- teacher quality, 209; student achievement and, 212–14. *See also* instructor effectiveness
- transfer function, of community colleges, 293–94, 305–8; reasons for success of some colleges over others, 308–11
- tuition, impact of online competition on, 276–80
- unadjusted measures, productivity, 6
- University of California (UC), 294
- University of Phoenix (UPX), 10–11, 210–11, 264; college algebra and, 214–f217; data for study of instructor ineffectiveness, 217–23; empirical approach for study of algebra courses at, 223–30; results on instructor effectiveness at, 230–43; study of college algebra at, 214–17. *See also* instructor effectiveness; online education
- vertical selection, 32, 38
