

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: The Roles of Immigrants and Foreign Students in US Science, Innovation, and Entrepreneurship

Volume Authors/Editors: Ina Ganguli, Shulamit Kahn, Megan MacGarvie, editors

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-69562-4 (cloth); 978-0-226-69576-1 (electronic)

Volume URL:

<https://www.nber.org/books-and-chapters/roles-immigrants-and-foreign-students-us-science-innovation-and-entrepreneurship>

Conference Date: April 27, 2018

Publication Date: February 2020

Chapter Title: List of contributors, indexes

Chapter Author(s):

Chapter URL:

<https://www.nber.org/books-and-chapters/roles-immigrants-and-foreign-students-us-science-innovation-and-entrepreneurship/list-contributors-indexes>

Chapter pages in book: (p. 229 – 237)

Contributors

Stefano Breschi

- migration. *See* return migration
- native-owned firms, innovation performance of, 9
- networking, 10–11, 173–75; of immigrant vs. native entrepreneurs, 10; literature review, 176–77, 176n2, 176n3, 176n4, 176n5, 176nn1. *See also* CIC (Cambridge Innovation Center)
- owners of high-tech firms, 153–58; descriptive statistics for, 154t, 155t; methodology for study of, 158–60; results of study of, 160–67
- patenting activity, 150; as measure of innovation, 78, 151; relationship between immigration and, 4–5
- PhD students, international: entrepreneurial career preferences during graduate school, 215–19; entrepreneurial characteristics of, vs. native PhD students, 210–15; intentions to stay of, 219–21; postgraduation entrepreneurial outcomes of, 221–24; stay rates, 2–3. *See also* STEM (science, technology, engineering, and mathematics) PhD students
- product entry/exit, 90f; data on, 80–82; innovation and, 78–79
- product reallocation, 84–85, 85t, 89–90; association between immigration and, 90–95; business cycle effects and, 85–90, 86–87f; empirical analysis, 84–95; by H-1B dependence, 88–89, 89, 90f; R&D propensity and, 89f
- products, data on, 80–82
- quotas, US immigration, 124; empirical strategy for, 129–34; impacts of, 7–8; literature on, 125–28; results of analysis, 134–43
- R&D (research and development), as measure of innovation, 151
- return migration, 3n3; of chemistry doctoral students, 4; data for, 18–20; descriptive

- statistics by migration channels, 36–38, 37t; descriptive statistics for, 25–31; empirical studies of, 33–34; hazard ratios, 41–42, 42f, 43f; high-skilled, 18–19; Indian students vs. Chinese students and, 4; innovative workers and, 1–2; international students and, 3; literature on, 19; methodology with data set for, 20–24; model of, 34–35; previous research on, 3; rates of, 17–18; regression results, 38–43, 39t; results of model of, 36–43; sell-based self-selection in, 31–36; theories of, 32–33
- skill-based self-selection, in return migration, 31–36
- start-up capital, 155–56, 155t
- stay rates, of PhD students, 2–3
- STEM (science, technology, engineering, and mathematics) PhD students, 49–50; career preferences of, 51; data for, 53–56; likelihood of, to found firms, 11–12; location preferences of, 51–52; methodology of study of, 52–53; prior studies of, 50; results of study of, 56–61; summary statistics, 54–56, 55t, 56t
- STEM (science, technology, engineering, and mathematics) workers: foreign-born, 1; location choices of, 1–2; understanding labor markets for, 1
- visa lottery, 102–3
- visa policies, impacts of, 5. *See also* H-1B visa program
