Note: Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- Belgium: common scenario cases for retirement incentives in, 60–72; conventional early retirement (CER) in, 52–53; disability insurance (DI) in, 53; early eligibility age (EEA) in, 48–49; income taxes in, 53–54; introduction to retirement patterns in, 43–46; measuring retirement incentives in, 56–60; old-age pension (OAP) system in, 48–51; old-age unemployed (OAU) in, 51–52; older worker employment rates of, 4f; pathways to retirement in, 46–48, 55–56f; personal income tax (PIT) in, 54; social security contributions in, 53–54; specific profile for retirement incentives for, 72–76; timeline of reforms implemented in, 46, 47f; unemployment insurance (UI) system in, 51–52
- benefits, social security: early claiming of, 13; early claiming of, by sex, 1980–2016, 4f; replacement rate, 13; replacement rate, by sex, 1980–2016, 15f
- Canada: eligibility ages for retirement programs, 84f; introduction to employment rate trends for older workers in, 79–80; ITAX in, 102–4, 104f; labor force participation rates by age and gender, 80, 81f; labor force participation rates by education and gender (ages 60–64), 82f; measuring incentives, 88–91; measuring social security wealth (SSW), 88–89; results of simulations used to describe incentives to continue working in, 91–102; social security system, 80–88; timeline of reforms to public pensions, 1980–2016, 83f
- Canada Pension Plan (CPP), 83–88
- claiming age, defined, 40t
- common earnings histories, construction of, 36–38
- common survival probabilities, 38
- common taxation, 38
- conventional early retirement (CER), in Belgium, 52–53
- Denmark: calculating pension benefits in, 118; implicit tax rates (ITAX), 121–27, 125–26f; institutional changes in, 1980–2016, 113–18; introduction to labor force participation for men and women aged 60–64, 109–13; median earnings, 124–26, 124f, 125f, 126f; regression analyses of effects of ITAX on employment rates, 128–29, 129t; relationships between employment rates and implicit tax rates, 127–28, 127f; social security wealth (SSW) accrual in, 118–21; summary of reforms and policy changes around retirement, 1980–2015, 116f

- disability insurance (DI), 13; in Belgium, 53; reforms of, in Spain, 328–31, 330t; in Sweden, 381–82
- earliest eligibility age, defined, 40t
- early eligibility ages (EEA): in Belgium, 48–49; by sex, 1980–2016, 11f; for social security, 8–11
- early retirement, defined, 40t
- earnings histories, construction of common, 36–38
- earnings tests, 13; defined, 40t
- eligibility ages, statutory (SEA), 11–13; defined, 40t; by sex, 1980–2016, 12f
- employment, old-age, 3–6; for men ages 60–64, 3, 4f; for women ages 60–64, 3, 4f
- flexible (partial) retirement, 40t
- France: components of benefit calculator, 145–49; early retirement schemes and unemployment insurance in, 141–45; introduction to labor force participation and employment rates in, 133–35; main characteristics of preretirement schemes since 1972, 142t; main characteristics of unemployment insurance since 1972, 142t; main rules for general regime and public-sector employees, before and after reforms, 137t; pension reforms in, 135–41; private sector wage earners, 150–62; public sector wage earners, 162–65
- full-rate age, defined, 41t
- Germany: employment rate, 178–79; introduction to retirement behavior in, 175–77; methodology for implicit tax on working longer, 197–202; pathways to retirement, 184t; pension system until 1980, 183–85; person-claiming behavior, 179–82; reform process since 1980, 186–97; results of implicit tax on working longer, 202–24; timeline of reforms to social security system, 187f
- implicit tax (ITAX), on working longer, 17–23; at age 62, men, 1980–2016, 18–19, 18f; at age 62, women, 1980–2016, 19, 19f; by age for individual countries, 19–23, 20–22f; computation of, 32–34; country average, vs. country average employment rate, for men ages 60–64, 1980–2015, 29–30, 29f; country average employment and, over time, for men ages 60–64, 1980–2015, 28, 28f; employment rates and, by individual countries, 23–31, 24–26f; overall regress of employment rates on, by country, 29–30, 30t; pension benefits and, 16–23; regressions on employment rates and, by individual countries, 27–28, 27t; taxation and, 38. *See also specific countries*
- implicit tax (ITAX) rate, on working longer, 40t
- International Social Security (ISS) project, 1–2; goal of, 34; research participating in, 2; selection of countries for, 2–3
- Italy: age-earnings profiles, 235, 236f; earnings age profiles of middle-income men, 237–47; earnings age profiles of middle-income women, 247–56; employment rates, 228–30; financial incentive indicators for middle-income men, 237, 238–39f, 242–45f; financial incentives for middle-income women, 250–51f, 253–54f; implicit tax (ITAX) comparisons, 256–61; introduction to labor force participation, 227–28; pension system and reforms, 230–34; retirement pathways, 230; social security wealth (SSW), 240–41; timeline of pension system reforms, 231t
- ITAX. *See* implicit tax (ITAX), on working longer
- Japan: benefits calculator, 279–80; employment policies, 278; introduction to employment rates in, 271–72; quantitative indicators of institutional changes, 278–79; results of relationship of implicit tax (ITAX) with elderly employment, 292–95; results of relationship of tax force measures with elderly employment, 287–92; results of tax force to retire early, 282–87; social security reforms in, 272–78; social security wealth, its accrual and implicit tax rate, 280–82; timeline of social security reforms and employment programs, 276f
- labor force exit age, 40t
- labor force participation: in Canada, 80, 81f, 82f; in Denmark, 60–64, 109–13; in

- France, 133–35; in Italy, 227–28; in the Netherlands, 305–12; in Spain, 317–20, 318f, 319f; in Sweden, 373–74, 375–76, 376f
- means test, 40t
- the Netherlands: implicit tax rates (ITAX), 302–5; institutional changes, 298–302; introduction, 297–98; labor force participation, 305–12; timeline of reforms, 299–300t
- occupation pensions, 39
- old-age pension, 40t
- old-age unemployed (OAU), in Belgium, 51–52
- old-age unemployment, 3–6; for men ages 60–64, 3, 4f; for women ages 60–64, 3, 4f
- partial (“flexible”) retirement, defined, 40t
- pathways, defined, 34–35
- pension benefits, and ITAX on working longer, 16–23’
- pension reforms, 8; implementation of, by type and country, 9–10t
- pensions: occupation, 39; private, 39
- policy changes, overview of, 6–16. *See also* timelines, of reforms; *specific countries*
- private pensions, 39
- Quebec Pension Plan (QPP), 83–88
- reforms. *See* timelines, of reforms; *specific country*
- retirement: defined, 34–35; partial (“flexible”), 40t; pathways to, 34–35. *See also specific countries*
- retirement age, defined, 40t
- social security, defined, 41t
- social security program, defined, 40t
- social security wealth (SSW), 17; in Canadian system, 103f; defined, 40t; in Denmark, 118–21; in Italy, 240–41; in Japan, 280–82; measuring, for Canadian system, 88–89; in United Kingdom, 411–14; in United States, 444
- Spain: changes in old-age pension system of, 320–28; employment and social security incentives, 358–63; incentives of workers to retire, 320; key parameters of old-age pensions from 1980 onward, 367–68t; key parameters of social security system from 1980 onward, 365–66t; key parameters summary, 369t; labor force participation in men and women, 317–20, 318f, 319f; main reforms of old-age pension system since 1980 in, 322t; measurement of social security system incentives, 331–36; other pathways to retirement, 355, 356–57f; reforms of disability insurance system in, 328–31, 330t; reforms of unemployment system in, 330t, 331; research on financial incentives on retirement probabilities, 320; research on responses of employed workers to Social Security incentives, 320; social security incentives over time, 336–355; timeline of reforms of old-age pension system since 1980 in, 323f
- SSW. *See* social security wealth (SSW)
- state pension age, defined, 41t
- statutory eligibility ages (SEA), 11–13; defined, 40t; by sex, 1980–2016, 12f
- survival probabilities, common, 38
- survival rates, 39
- Sweden: disability insurance program, 381–82; early eligibility rules, 381; implicit tax on working longer, empirical implementation, 385–86; implicit tax on working longer, methodology, 384–85; implicit tax on working longer, results, 89, 386–91, 387f, 388f, 390f, 391f, 392f; income taxes, 382–84; institutional changes for old-age pensions, 376–81; institutional changes timeline, 377f; labor force participation of men age 60 to 64, introduction, 373–74; labor force participation of older workers, 375–76, 376f; mandatory retirement rules, 381; relation between implicit tax rates and employment rates, 392–93, 392f, 393f
- taxation, common, 38
- timelines, of reforms: in Belgium, 46, 47f; in Canada, 83f; in Germany, 187f; in Italy, 231t; in Japan, 276f; in the Netherlands, 299–300t; in Spain, 323f; in Sweden, 377f; in United Kingdom, 406f
- unemployment insurance (UI), 13; in Belgium, 51–52; in France, 141–45, 142t

United Kingdom: conclusions from results of simulations, 425–27; institutional changes and pension reforms, 401–9; labor market trends in, for men and women, 399–401, 400f, 401f; lifetime earnings profiles simulation, 409–11; pension reforms in, introduction, 397–99; pension wealth and work incentives simulation, 414–18; results of simulations, 418–52; Social Security Act of 1975, 402; social security wealth simulation, 411–14; State Earnings-Related Pension Scheme (SERPS), 398, 402–3, 408; timeline of state pension reforms: Beveridge to 2017, 406f

United States: employment rates for men and women in, 435–37, 436f; employment trends, 442–554; implicit tax rate (ITAX), 444–45; methodology for exploring connection between trends, 443–46; results, discussion of, 456–57; results of study for changes in retirement incentives over time, 451–54; results of study for incentives vs. employment, 454–56; results of study for retirement incentives, 446–51; social security and private pension provisions, 437–42; social security wealth (SSW), 444
