Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- Académie des Sciences, 125–26  
applied research, 208–9  
average social returns: baseline, 17–23, 50–51; extending base for, 23–30; to innovation, 19–21; vs. marginal social, 36–42; “R&D only” baseline, 21–23. *See also* social returns  
  
base erosion and profit-shifting (BEPS) rules, 159  
baseline social returns: reasons, may be too high, 23–30; reasons, may be too low, 31–365  
basic research, 208–9  
Bayh-Dole Act of 1980, 71  
B-index, 176–77  
boom-and-bust cycles, 221–22  
Brin, Sergey, 125  
Bush, Vannevar, 3  
business dynamism, decline in, 8–9, 200–203  
business stealing, 45  
  
Canadian Pension Plan (CPP), 225–26  
capital. *See* human capital; venture capital (VC)  
careers, inventive, interventions for, 5  
chronic myelogenous leukemia (CML), treatment of, 117  
common stock, 218  
  
corporate taxes, 203; innovation and, 156–59  
CPP (Canadian Pension Plan), 225–26  
CPP Investment Board (CPPIB), 226–27  
  
Defense Advanced Research Project Agency (DARPA), 7  
Department of Defense, US, 6, 118  
Department of Energy, US, 6, 213–14  
discrete time analog approach to innovation, 51–52  
Disraeli, Benjamin, 1  
duplication, negative spillovers and, 45  
dynamics: declining business, and innovation, 202–3; declining business, in US, 200–203; of innovations, 194  
  
education-oriented policies, 5; inventors and, 206–7  
Einstein, Albert, 3  
entrepreneurship: examples of failures in public initiatives for, 213–15; geographic challenges for policy makers and, 219–21; human dimension of, 224–25; hypothesis of superiority of large firms and, 216–19; independent governance reform of, 225–29; innovation and, 216–19; requiring matching funds for funding and, 229–31; timing dynamic of, 221–24

- entrepreneurship policies, 9; financial incentives for, 213
- entrepreneur visas, 100–101
- extramural grant systems, 128
- firms: composition of, and innovation, 203–4; hypothesis of superiority of large, for innovation and entrepreneurship, 216–19; optimal R&D policies, 204–6; reallocation of resources between, 204
- foundations, philanthropic, 126–27
- general tax policies, 193; effects of, on quantity and quality of innovation, 195–97
- Government Guidance Fund initiative (China), 231
- grant funding, scientific, 6–7, 70–71; developing science of, 139–44; reasons for scientific research through, 120–25; short history of, 125–29; themes, 119
- grant programs, designing: defining scope of, 130–31; determining scientific merit of, 134–36; developing goals and expectations for, 129–30; developing research priorities, 131–33; peer review and, 133–34; postaward management of, 136–37; translation efforts for, 137–39
- grant systems, scientific: “extramural” vs. “intramural,” 128; policy choices within, 7
- green cards, 6, 91; potential reforms for, 93–94. *See also* H-1B visas
- green technologies, innovation and, 209–10
- growth theory, modern, 15
- H-1B visas, 6, 91–93; potential reforms for, 94–98. *See also* green cards; visas
- human capital: for innovation, 4–6; innovation policies, 68–79; innovative, 4–5
- idea creation, root of, 4
- imitative spillovers, 43
- immigrant entrepreneurs: international examples of, 105–7; pathways for, 103–4; traits of companies founded by, 101–3, 102t. *See also* start-up visas
- immigrants, background on, 87–89
- immigrant systems, US, 5–6
- immigration: innovation and, 5–6, 71–72; STEM workers and, 71–72
- immigration reform, US, 100
- immigration system, US, summary of, 90–93
- incremental tax credits, 177–78
- innovation: average social returns to, 19–21; case for government promotion of, 65–6; corporate tax practice and, 156–59; declining business dynamics and, 202–3; economic growth and, 1–2; entrepreneurship and, 216–19; framework for taxation and, 192f; green technologies and, 209–10; human capital for, 4–6, 68–79; human capital policies for, 62; immigration and, 5–6, 71–72; inputs for, 192–93; long-run productivity growth and, 61; main actors for, 191; market failures in, 4; quantity and quality of, 195–99; rationale for support of, 152–53; reasons for having public policy for, 2–4; reasons for importance of, 189; social returns to, 4, 17–19; tax policies and, 7–9, 153–54; understanding social returns to, 14–15; US public policy and, 2; ways tax policies shape, 191–95. *See also* R&D (research and development)
- innovations: dynamics of, 194; measuring, 195; micro to macro responses to, 194–95
- innovative labor, 4–5. *See also* scientific workforce, R&D and
- innovators. *See* inventors
- In-Q-Tel, 227–28
- intellectual property (IP) boxes, designing, 7–8, 158–59, 162–63, 163f; effects of, 8
- intellectual property rights (IPRs), 154
- International Entrepreneur Rule, 108, 109
- intertemporal spillovers, 44–45
- intramural grant systems, 128
- inventive careers, interventions for, 5
- inventors: backgrounds of, 72–76; childhood exposure rates and, 75–79; composition and quality of, 203–7; education policies and, 206–7; increasing quality of, 72–79; mobility of, 198–99; policies for creating, 76–79; probability of becoming, as function of parental income, 73, 73f; R&D policies and, 206–7; relationship between math test scores and becoming, 73–74, 74f; visas for, 90–100
- investments: determining average returns to innovative, 15–16; innovative, and social returns, 14
- knowledge diffusion, teams and, 207–8
- labor, innovative, 4–5. *See also* scientific workforce; STEM workers
- labs, national, 71

- large firms. *See* firms
- lobbying, 201–2
- marginal social returns: vs. average social, 36–42; empirical studies on, 37; macro-reasoning on, 38–42; microreasoning on, 37–38
- market failures, in innovation, 4
- matching funds, requiring, for funding entrepreneurs, 229–31
- Matter of Dhanasar, 108–9
- modern growth theory, 15
- “money chasing deals” phenomenon, 222–23
- National Institutes of Health (NIH), 6, 126n4, 127–28; research funded by, 117–18
- national labs, 71
- National Science Foundation (NSF), 6, 117–18
- Optional Practical Training (OPT) visas, 6, 99
- Page, Larry, 125
- “Pasteur’s quadrant,” 208
- patent boxes: evaluating, 167–69; vs. R&D tax incentives, 159–61
- patents, 121–22, 124
- PATH (Protecting Americans from Tax Hikes) Act of 2015, 171
- philanthropic foundations, 126–27
- PHS (Public Health Service), US, 127
- Pigouvian subsidy, 7
- political connections, 201–2
- postgraduates, increasing number of, 68–69
- preferred stock, 218
- prizes, research, 122–24
- productivity growth: long-run, innovation and, 61; in US, 61
- Protecting Americans from Tax Hikes (PATH) Act of 2015, 171
- Public Health Service (PHS), US, 127
- public policy, US: innovation and, 2; reasons for having, for innovation, 2–4
- R&D labs, 71
- R&D policies: inventors and, 206–7; optimal, firms and, 204–6
- R&D (research and development): case study approach to, 46; country-level analyses, 48–49; empirical estimates of social returns to, 45–49; as proportion of GDP in selected countries, 62–65, 63f; regression methods to study social returns to, 46–48; scientific workforce and, 62–65; tax price as instrument for, 166–67; US, by source of funds, 64f. *See also* innovation
- R&D tax credits, 161–62, 162f, 193–94; considerations on designing, 174–76; evaluating, 163–66; history and current status of, in US, 169–74; incremental, 177–78; private R&D and, 7–8; in US, 169–75
- R&D tax incentives, vs. patent boxes, 159–61
- R&D tax subsidies, around the world, 182, 183f
- research, applied and basic, 208–9
- researchers: ratio of, in US, 64t; ratio of, in US vs. selected countries, 63–65, 64t
- research-funding ecosystem, 123–24, 123f
- ridesharing, innovation of, 3
- Riemann, Bernhard, 3
- Rockefeller Foundation, 126–27, 127n5
- Royal Society (UK), 126
- Sand Hill Econometrics index, 220
- SBIC (Small Business Investment Company), 229
- SBIR (Small Business Innovation Research) program, 220–21, 228–29
- Schumpeter, Joseph, 216–17
- scientific grant funding. *See* grant funding, scientific
- scientific grant systems. *See* grant systems, “extramural” vs. “intramural”
- scientific workforce, R&D and, 62–65. *See also* labor, innovative; STEM workers
- Small Business Innovation Research (SBIR) program, 118, 220–21, 228–29
- Small Business Investment Company (SBIC), 229
- small firms. *See* firms
- social returns: calculating, 13–14, 15; discrete time analog approach, 51–52; empirical estimates of, to R&D, 45–49; with health benefits, 52–53; to innovation, 4, 17–19; innovative investments and, 14; vs. private, 14; reasons baseline for, may be too high, 23–30; reasons baseline for, may be too low, 31–36; understanding, to innovation, 14–15; variation in, 14. *See also* average social returns
- Solow, Robert, 15

- spillovers, 3–4, 14–15; imitative, 43; inter-temporal, 44–45; negative, duplication and, 45; positive, 14; user, 43–44
- start-ups: small vs. large firms, 201; US tax treatment of, 179–82; venture capital and, 200–201
- start-up visas, 100–101; international websites on, 110; US modifications to, 108–9; US proposals for, 107–8. *See also* entrepreneur visas
- stealing, business, 45
- STEM workers: immigration and, 71–72; policies for increasing, 68–69
- student visas, 99
- talent, pool of potential, 5
- targeted, innovation-specific tax policies, 193–94
- taxation: framework for innovation and, 192f; mobility of inventors and firms and, 198–99
- tax credits, incremental, 177–78
- taxes: corporate, 203; general, 190
- tax policies: categories of, 193; comparing different incentives and, 159–61; design issues for, 154–56; general, 193, 195–97; innovation and, 7–9, 189–90; questions for, 151–52; responses to, 194; targeted, innovation-specific, 193–94; ways, shape innovation, 191–95
- teams: composition and quality of, 203–7; knowledge diffusion and, 207–8
- temporary visas, 91
- undergraduates, increasing number of, 68
- United States (US): declining business dynamics in, 200–203; history and current status of R&D tax credit in, 169–75; immigration system of, summary, 90–93; mobility of inventors and firms in, 198–99; potential reforms within existing immigration system of, 93–100; ratio of researchers in, 64, 64t; tax treatment of start-ups in, 179–80
- universities, expanding, 68–71
- user spillovers, 43–44. *See also* spillovers
- venture capital funding, staging of investments and efficiency of, 218
- venture capitalists, 200, 216–19; preferred stock and, 218
- venture capital (VC)–backed start-ups, 200–201
- visas, 6; for entrepreneurs, 100–107; for inventors, 90–100; Optional Practical Training, 6, 99; start-up, 100–101, 107–10; student, 99–100; temporary, 91. *See also* H-1B visas
- Yozma Venture Capital Ltd., 230–31
