

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Economics of Research and Innovation in Agriculture

Volume Authors/Editors: Petra Moser, editor

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-77905-8 (cloth),
978-0-226-77919-5 (electronic)

Volume URL:
<https://www.nber.org/books-and-chapters/economics-research-and-innovation-agriculture>

Conference Date: May 17, 2019

Publication Date: September 2021

Chapter Title: Indexes

Chapter Author(s):

Chapter URL:
<https://www.nber.org/books-and-chapters/economics-research-and-innovation-agriculture/indexes>

Chapter pages in book: p. 253 - 261

Contributors

Michael J. Andrews
Department of Economics
University of Maryland, Baltimore
County
1000 Hilltop Circle
Baltimore, MD 21250

Bradford Barham
Department of Agricultural and
Applied Economics
University of Wisconsin-Madison
427 Lorch Street
Madison, WI 53706

Nicola Bianchi
Strategy Department
Kellogg School of Management
2211 Campus Drive
Evanston, IL 60208

Matthew Clancy
Department of Economics
Iowa State University
513 Farm House Lane
Ames, IA 50011

Michael Ewens
California Institute of Technology
MC 228-77
1200 East California Avenue
Pasadena, CA 91125

Jeremy Foltz
Department of Agricultural and
Applied Economics
University of Wisconsin-Madison
427 Lorch Street
Madison, WI 53706

Alberto Galasso
Rotman School of Management
University of Toronto
105 St. George Street
Toronto, ON M5S 3E6 Canada

Gregory D. Graff
Department of Agricultural and
Resource Economics
Colorado State University
1200 Center Avenue Mall
Fort Collins, CO 80523

Paul Heisey
Economic Research Service
US Department of Agriculture
355 E Street SW
Washington, DC 20024-3221

Brent Hueth
Economic Research Service
805 Pennsylvania Avenue
Kansas City, MO 64105

Jared Hutchins
Department of Agricultural and
Consumer Economics
University of Illinois at Urbana-
Champaign
1301 W Gregory Drive
Urbana, IL 61801

Yongjie Ji
Center for Agricultural and Rural
Development
Iowa State University
518 Farm House Lane
Ames, IA 50011-1054

Ana Paula Melo
Department of Agricultural and
Applied Economics
University of Wisconsin-Madison
427 Lorch Street
Madison, WI 53706

Keith Meyers
D-IAS, Danish Institute for Advanced
Study
University of Southern Denmark
Campusvej 55
5230 Odense M, Denmark

GianCarlo Moschini
Department of Economics
Iowa State University
518 Farm House Lane
Ames, IA 50011-1054

Petra Moser

Subject Index

Note: Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- academic commercialization (AC) activities, defined, 180–82
- academic engagement (AE) activities, defined, 180–82
- agricultural and life science (ALS) faculties, 180; data, methods, and descriptive statistics for, 185–96; discussion of results for, 203–4; empirical strategy and results for, 196–203. *See also* land grant colleges; land grant universities (LGUs)
- agricultural innovations: financing future, 14–16; new knowledge and, 22; patents as measure of, 10–11; universities as source of, 9–12. *See also* innovations
- agricultural output: diminishing productivity and, 12; innovations and, 1
- agricultural patents: example, 40–41; identifying, 23
- agricultural productivity: land grant counties and, 11–12; tracing, 3–4
- agricultural R&D: critical role of, 21–22; financing of, literature review, 217–18; government investments in, 214; industry investments in, 214; internal rate of return (IRR) for, 1; recent studies of, 2; returns to, 1; venture capital exits from, 220–221; venture capital in, 214–17, 218–20
- agricultural R&D output: data, 25–26; measuring, 26–30
- agriculture, total factor productivity in, 2
- agriculture R&D: internal rate of return (IRR) for, 1
- AI (artificial insemination) technologies, 82–83
- ALS. *See* agricultural and life science (ALS) faculties
- animal health concepts, top text-novel, 67t
- artificial insemination (AI) technologies, 82–83
- Bayh-Dole Act of 1981, 179
- biocides concepts, top text-novel, 68–69t
- biological innovation, 81–82; farmers and, 6; as response to environmental shocks, 6–9; selection as challenge for measuring returns to, 5–6
- citations: journal, 43–45, 55; patent, 23–24, 41–43, 53–54
- “cleantech” investment funds, 230
- Clemson University, 144
- colleges, land grant. *See* land grant colleges
- Cornell University, 146, 147
- corn hybrids. *See* hybrid corn
- crop reporting districts (CRDs), for corn, 112–14, 113f
- dairy genetics, 86; data, 90–93; discussion of results, 99–102; empirical model, 87–89; heterogeneity distribution, 90;

- dairy genetics (*continued*)
 results, 93–99; theoretical framing, 86–87. *See also* quantitative genetics
- Dairy Herd Improvement (DHI) program, 6, 81–82
- development. *See* agricultural R&D
- environmental shocks, biological innovation as response to, 6–9
- experimental stations, 10
- farmers, biological innovation and, 6
- fertilizer concepts, top text-novel, 69–70t
- funding, industry, land grant colleges and, 12–13
- genetics. *See* dairy genetics; quantitative genetics
- genetic selection, impact of, 5
- government investments, in agricultural R&D, 214
- growing degree days (GDDs), defined, 116–17
- Hatch Act of 1887, 9, 10, 11, 142, 163–68, 183
- Henderson mixed model (HMM), 84
- hybrid corn, 6–9; adoption of, 107–8; data on adoption of, 112–13; data on yields of, and open-pollinated corns, 113–16; factors driving adoption of, 109–12; Iowa experimental farm results, 1926–1942, 119–21; methodology and results for study of, 118–19; past research on adoption of, 108–19; summary statistics for data, 117–18; US yields, 8f; weather data and, 116–17; yield regressions, 121–23. *See also* open-pollinated corn
- industry funding, land grant colleges and, 12–13
- industry investments, in agricultural R&D, 214
- innovations: analysis of, 11; R&D activities and, 213–14; venture capital and, 221. *See also* agricultural innovations
- internal rate of return (IRR), for R&D, 1
- investments, in agricultural R&D: government, 214; industry, 214; venture capital, 230–39
- Iowa experimental farm results, 1926–1942, for hybrid corn, 119–21
- Iowa State University, 145
- IRR (internal rate of return), for agricultural R&D, 1
- journal citations, 43–45, 55
- knowledge domains, originating, 33–34
- knowledge flows: measuring, 30–33; proxies for, 22
- knowledge spill-ins, measures of, 41–49; journal citations, 43–45, 55; patent citations, 23–24, 41–43, 53–54; shared text concepts, 45–48, 57
- knowledge spillovers, 3; in agricultural R&D studies, 22–23; into agriculture, 5f; findings on, 24; from outside agriculture, finding on, 24; text analysis of, 3–4
- land grant colleges, 10, 139–42; industry funding and, 12–13; list of experiments, 169–70t; non-land grant colleges and, 147, 170–72t; random site selection of, 147–49, 148–49t; results of outcome variables for selecting, 149–57; site selection experiments, 142–47; site selection of, compared to other types of colleges, 157–62. *See also* agricultural and life science (ALS) faculties; land grant universities (LGUs); universities
- land grant counties, agricultural productivity and, 11–12
- land grant legislation, most effective, 162–68
- land grant universities (LGUs), 180, 183–85. *See also* agricultural and life science (ALS) faculties
- Louisiana State University, 146
- machinery concepts, top text-novel, 71t
- management bias, 85
- Missouri University of Science and Technology, 145
- Morrill Land-Grant Acts of 1862, 9, 145, 149, 162–68, 183
- non-land grant colleges, 147, 170–72t
- North Dakota State University (NDSU), 143–44, 146
- open-pollinated corn: data on yields of, and hybrid corn, 113–16; yield regressions, 121–25. *See also* hybrid corn
- output. *See* agricultural output

- Palmer drought severity index (PDSI), 107–8n1, 116
- patent citations, 23–24, 41–43, 53–54
- patents: agricultural, 23, 40–41; as measure of agricultural innovations, 10–11
- patent subsectors, top 10 text-novel concepts by, 33t
- Plant Patent Act of 1930, 11
- plants concepts, top text-novel, 72t
- productivity. *See* agricultural productivity
- quantitative genetics, 83–84. *See also* dairy genetics
- R&D (research and development). *See* agricultural R&D
- Research and Marketing Act of 1946, 142, 163–68
- research tools concepts, top text-novel, 73t
- Roy model, 85
- shared text concepts, 45, 55–57
- Smith-Lever Act of 1914, 9, 10, 183
- spillovers. *See* knowledge spillovers
- start-up companies, agricultural: characterization of, by industry and technology, 239–42; global summary statistics, 224–27, 226; sub-sample of, with reported deals, 228–30; venture capital funded, 1977–2017, 224f; venture capital funds in, 214–17; venture-funded industry and technology categories for, 227t. *See also* venture capital (VC)
- Texas Agricultural and Mechanical University, 146
- text analysis, 3–4, 24–25
- text-novel concepts, 3, 24; animal health, 67t; biocides, 68–69t; fertilizer, 69–70t; machinery, 71t; plants, 72t; research tools, 73t
- total factor productivity (TFP), in agriculture, 2
- universities, 180; as source of agricultural innovation, 9–12. *See also* land grant colleges; land grant universities (LGUs)
- university-industry relations (UIR), 179–83
- University of Arizona, 147
- University of Arkansas, 145
- University of California, Davis, 144–45
- University of Florida, 145–46
