

This PDF is a selection from a published volume from the National Bureau of Economic Research

Volume Title: Economic Analysis and Infrastructure Investment

Volume Authors/Editors: Edward L. Glaeser and James M. Poterba, editors

Volume Publisher: University of Chicago Press

Volume ISBNs: 978-0-226-80058-5 (cloth),  
978-0-226-80061-5 (electronic)

Volume URL:

<https://www.nber.org/books-and-chapters/economic-analysis-and-infrastructure-investment>

Conference Date: November 15-16, 2019

Publication Date: November 2021

Chapter Title: Indexes

Chapter Author(s):

Chapter URL:

<https://www.nber.org/books-and-chapters/economic-analysis-and-infrastructure-investment/indexes>

Chapter pages in book: p. 453 – 468

Note: Page numbers followed by “f” or “t” refer to figures or tables, respectively.

- AADT (average annual daily traffic), 16, 170f
- adjusted present value (APV) approach, 374; cash flows, 374–75
- alliancing model, 285t
- American Recovery and Reinvestment Act (ARRA) of 2009, 10, 31, 221
- Amtrak, 11
- Appalachian Highway Development System, 9
- APV (adjusted present value) approach, 374; cash flows, 374–75
- Arrow-Lind theorem, 18
- asset betas, 377, 378t
- auction theory, 288, 289–90
- Australia: activity analysis in, 315t; bundling analysis in, 316f; procurement strategy in, 314–17
- average annual daily traffic (AADT), 16, 170f
- basic infrastructure, 40, 40f; assessing growth rate of real net capital stock per capital, 74–75, 74f; defining, 44; investment trends in, 61–64f, 61–66, 65f; price trends, 92f, 93–9495
- BEA (Bureau of Economic Accounts), 46
- bidder selection, 283–84, 289–90, 295, 310–11; adverse selection in, 292–93
- bidding aggressiveness, precontract information and, 296–98
- bill of quantities method, 286t
- bridges, 175–79; expenditure and cost of services for, 191–92; usage, stock, and condition of, 177f
- broadband, 433–35, 434f
- bundling, 335
- Bureau of Economic Accounts (BEA), 46
- buses, 17–18, 182–85; expenditure and cost of services for, 193–95; usage, stock, and age of fleet, 183f
- canal building: English, 5; Erie Canal, 4–5
- capital. *See* cost of capital; public capital
- capital asset pricing model (CAPM), 374, 377, 377n6
- capital improvements: features of, 54; maintenance/repairs vs., 53
- capital measures, alternative ways to prepare, 57–58
- capital stock, infrastructure, 41
- CAPM (capital asset pricing model), 374, 377, 377n6
- cash flows, 374–75
- CDNS (content delivery networks), 33, 417–19
- Chile: dispute resolution in, 353–54; present-value-of-revenue (PVR) contracts, 359
- cholera, 6
- “citizen voice,” 109

- cloud service, 33, 420–21
- CM/GC (construction manager/general contractor) model, 285t
- competitive bidding, 282; capital asset pricing model, 377, 377n6
- congestion externalities, 8
- congestion pricing, 1–2, 8
- construction, new, 25–26
- construction manager/general contractor (CM/GC) model, 285t
- construction procurement, economic theory applications to, 288–95
- construction risk allocation, 281
- content delivery networks (CDNs), 33, 417–19
- contract power. *See* incentive (contract) power
- contracts: opposing forces in, 317–22; performance of high-powered vs. low-powered, 317–20
- contract theory, 277, 288, 307; choice of incentive power and, 292–94
- cost of capital, 376–81; estimation approaches, 378–80; governmental, 372–73; valuing a stand-alone project, 381
- cost overruns: in design-bid-build delivery model, 300–302, 301t; project size and, 302–3
- cost-plus a fee method, 286t
- cost-plus contracts, 3
- COVID-19, economic analysis of infrastructure and, 33–35
- data centers, 419–21
- DBB model. *See* design-bid-build (DBB) model
- DB model. *See* design and build (DB) model
- debt subsidies, 384–85
- Defense Advanced Research Project (DARPA), 412–13
- delivery model, 284, 295; bundled, 303–7; choice of, 290–92; commonly used, 285t; MAUA and, 311–12
- Department of Transportation (DOT) data, for toll road example, 388–91t
- depreciation rates, 56–57, 84–87; cross-country comparisons of, 85, 85t, 86t; revisiting estimates, 87
- design and build (DB) model, 285t; bundles design and, 304–5
- design-bid-build (DBB) model, 281, 285nt; cost overruns in, 300–302
- developing countries, PPPs in, 341–42, 342f
- digital infrastructure, 40, 40f, 409–11; assessing growth rate of real net capital per capita, 61; creating value at business, 427–30; creating value at households, 421–27; defining, 44; investment trends in, 69–70, 70f, 71f, 72f; price trends, 96–97, 97f; research questions, 435–41; value from improving protocols, 430–33. *See also* internet
- dispute resolution: in Chile, 353–54; in UK, 353–54
- distaste for distance, 421, 421n23
- Dulles Greenway, and PVR contracts, 356
- early contractor involvement (ECI) model, 285t
- economic activity, transportation infrastructure and, 195–99
- economic growth, infrastructure and, 107
- electric infrastructure. *See* power infrastructure
- Emergency Relief and Construction Act of 1932, 10
- endogenous capital, econometric problem of, 249–52
- engineering-procurement-construction (EPC) model, 285t; bundles design and, 305–7
- Erie Canal, 4–6
- Esch-Cummins Act of 1920, 10
- Europe, PPPs in, 340–41, 341f
- European Union, procurement procedures in, 283t
- externalities, 382; congestion, 8; local, 7–8; macroeconomic, 9–10
- externality mitigation, 28–29
- fair value approach, 369–70; defined, 370; PPPs and, 370–71
- Federal-Aid Highway Act of 1956, 111, 282. *See also* Interstate Highway System
- federal system, infrastructure in, 23–24
- first best, 199–206
- fixed asset accounts (FFAs), 46; alternative was to measure, 57–58; data sources for investment, 51–53; methodology, 50–51; price measures of, 54–56
- fixed assets, 47–49; defined, 53
- fixed-price contracts, 3

- fixed-price payment method, 286t
- funding, of transportation projects, 397–98
- funding, private, limits of, 4–6
- Global Competitiveness Report, The* (World Economic Forum), 15, 16–18
- governance, renegotiations and, 349–55
- gross domestic income (GDI), 46, 46n11
- gross domestic product (GDP), 46, 46n11
- guaranteed maximum price method, 286t
- health infrastructure, assessing growth rate of real net capital stock per capita, 77–79, 79f
- Hepburn Act of 1906, 10
- highway grades, 170f, 173–74
- Highway Performance Monitoring System (HPMS), 168–71
- highway spending, 107–10; expenditure and cost of services for, 187–91; federal role in, 24; new prototype measures of, by state, 81–83, 82f, 83f, 84f. *See also* interstate highway spending; Interstate Highway System, US
- ICC (Interstate Commerce Commission), 10–11
- import price indexes (IPIs), 55–56
- improvements. *See* capital improvements
- incentive (contract) power, 284–88, 295, 312–13; choice of, 292–94; large(r) projects and, 308–10; and performance in small contracts, 307–8
- infrastructure, 40f; as antirecessionary spending, 10; assessing growth rate of real net capital stock per capita, 72–74, 73f, 73t; component examples, 48t; COVID-19 and economic analysis of, 33–35; data on geographic distribution of, 42; defining, 40, 40f, 44–46; economic growth and, 107; economic theory applications to, 288–95; in federal system, 23–24; forces that determine optimal spending on, 2; improving spending and utilization efficiency for, 3–4; intergovernmental allocation of responsibility for, 3; investment trends in, 59–61; maintenance expenditures, 42; management of and funding of, 2–3; prices of, 42; privatization of, 3; public vs. private provision of, 21–23; quality of US, 108; reasons for public investment in, 2; reasons governments invested in, 4–11; US spending on, 1; water, 6–8; world, and PPPs, 338–40, 339t. *See also* bridges; interstate highway spending; Interstate Highway System, US; public transit; subsidies: to infrastructure
- infrastructure capital stock, age of, 87–91
- infrastructure pricing/funding, efficient, 19–21
- Infrastructure Report Card* (American Society of Civil Engineers), 15
- infrastructure spending, public: determining optimal level of, 11–19, 199–206; improving efficiency of, 26–27; macroeconomic determinants of optimal, 18–19; macroeconomic theory and, 220; macroeconomic vs. microeconomic approaches to optimal, 12–15; microeconomic analysis of optimal, 15–18; public capital and, 220; short-run stimulus and, 230; theory of optimal, 199–206
- infrastructure stock, age of, 87–91, 88f, 89f, 90f
- infrastructure capital stock, 41
- in-kind subsidies, 375–76
- international roughness index (IRI), 24–25, 171–74, 172f
- internet: adoption and use of, 415–17; four layers of, 409–10, 410f; origins of, 411–15. *See also* digital infrastructure
- Internet Engineering Task Force, 412
- Interstate Commerce Commission (ICC), 10–11
- interstate construction, 111
- interstate fatalities per million vehicles traveled, 170f, 173
- interstate highway spending, 139t; absolute, by states, 114, 116f; data for, 112–14, 115t; documenting cross-state variation in, 114–31; due to policy maker discretion and related private/public spending, 124–31, 125t; evaluating isolation of, from policy maker discretion, 121–24; evidence on root causes, 135–38; geographic pattern of, 119f; geographic variation in, 138–41; limiting to spending driven by policy maker choices, 117–21, 118f; Medicare spending per capita and, 110, 127–30, 129f; per mile, 112; predetermined features, 112–13; public vs. private, 113; relationship between highway outcomes and, 138; root causes of variation in, 131–35. *See also* highway spending

- Interstate Highway System, US, 108–9, 167–75, 168t; data for, 110; history of, 111; usage, stock, and condition, 169, 170f. *See also* transportation infrastructure
- investment trends: basic infrastructure, 61–64f, 61–66, 65f; infrastructure, 59–61; social infrastructure, 66–69
- IPIs (import price indexes), 55–56
- local externalities, 8
- lump-sum contracts, 281–82
- lump-sum payment method, 286t
- macroeconomic externalities, 8
- macroeconomic models, 221–22; calibration of, 227–29, 228t; experiments with no implementation delays, 229–34; experiments with time to spend and time to build, 234–36; medium-scale New Keynesian Model, 225–27; multipliers and, 236–41; results from models in literature, 241–45; stylized neoclassical model, 222–25
- macroeconomic theory, infrastructure spending and, 220
- maintenance, 25–26; capital improvements vs., 53; estimates of, 91–92, 91f; expenditures, 42; features of, 53–54
- maintenance policy, efficient, 24–25
- management, project, 3, 27–28
- management, public, 23
- Manhattan Water Company, 6–7
- Mann-Elkins Act of 1910, 10
- marginal costs, 19–20
- master builders, 280–81
- MAUA (multi-attribute utility approach), 311–12
- Medicare spending per capita, Interstate spending and, 110, 127–30, 129f
- minimum revenue guarantee: toll road example, 392–94, 393t
- minimum revenue guarantees, 385
- mitigation, externality, 28–29
- mitigation spending, 4
- multi-attribute utility approach (MAUA), 311–12
- municipal bonds, 382–84
- National Bridge Inventory (NBI), 174–76
- National Economic Accounts, 39–40
- National Environmental Policy Act of 1969, 109
- National Household Transportation Survey (NHTS), 174–75
- National Income Product Accounts (NIPAs), 46–47
- National Transit Databases (NTD), 179–80
- nation building, in US, 8–9
- NBI (National Bridge Inventory), 174–76
- negotiations, less renegotiation and, 298–303
- net present value (NPV) analysis, 374, 376
- New Keynesian Model, medium-scale, 225–27, 263–65
- NHTS (National Household Transportation Survey), 174–75
- NIPAs (National Income Product Accounts), 46–47
- NPV (net present value) analysis, 374, 376
- NTD (National Transit Databases), 179–80
- optimal infrastructure investment, macroeconomic determinants of, 18–19
- optimal infrastructure spending: economic analyses of, 15–18; macroeconomic vs. microeconomic approaches to, 12–15
- Orange County's State Route 91, PVR contracts and, 355
- payment mechanisms, commonly used, 286t
- Penn Central railroad, 11
- perpetual inventory method (PIM), 50
- PIM (perpetual inventory method), 50
- power infrastructure: assess growth rate of real net capital stock per capita, 75–76, 80f, 81f; assessing growth rate of real net capital stock per capita, 76f; price trends, 95
- PPI (producer price indexes), 54–56
- PPPs. *See* public-private partnerships (PPPs)
- precontract information, bidding aggressiveness and, 296–98
- present-value-of-revenue (PVR) contracts, 355; advantages of, 355–58; in Chile, 359; Dulles Greenway and, 356; Orange County's State Route 91 and, 356–57; in UK, 358–59
- prices, infrastructure, 43; efficient, 19–21; trends for major categories, 92–97, 92t, 93f; usage and, 19–21
- principal-agent theory, 292
- private funding, limits of, 4–6
- privatization, 3, 21–22

- procurement, 3, 26–27
- procurement choices: characteristics of infrastructure, 282–88; economic theory dealing with, 289–95; history and, 280–82; informed, 310–17
- procurement formats, 277–78
- procurement procedures: characteristics of, 282–88; in European Union, 283t
- procurement strategy: in Australia, 314–17; expanding, in United Kingdom, 313–14
- producer price indexes (PPI), 54–56
- Project Initiation Route Map (UK), 313–14
- project management, 3, 27–28
- project size, cost overruns and, 300–303
- property rights theory, 290–91
- protocols: defined, 430n41; development of, 430; improvement of, 430–31; research about, 431–33
- protocol stacks, 430; defined, 430n41
- prototype, 42, 42n4; new measures, of highway investment by state, 81–83
- public capital, 219–20; empirical evidence on short-run effects of government investment in, 252–58; endogeneity of, problem of, 249–52; infrastructure spending and, 220; overview of existing estimates of, 245–47; production function vs. general equilibrium output elasticities and, 247–49; question of US underinvestment in, 258–61
- public information, reducing uncertainty through, 317–20
- public management, 23
- public-private partnerships (PPPs), 22, 31–32, 291, 292, 305–6, 305n36, 333–34; in developing countries, 341–42, 342f; distorted policy choices and, 344–45; economic reasons governments use, 335–36; effect of, on transportation funding, 398; efficiency arguments for, 345–47; in Europe, 340–41, 341f; fair value approach and, 370–71; incentives and risk allocations arguments for, 347–49; as means of evading fiscal spending constraints, 342–44; reasons governments choose, 334–35; renegotiations and, 350–51; in US vs. other parts of world, 397, 397t; world infrastructure and, 338–40, 339t
- public/private provision, factors determining optimality of, 22–23
- public safety, net capital stock per capita of, 78f, 79
- public transit, 179–87; aggregate statistics, 180t; buses, 182–85; expenditure and cost of services for, 193–95
- PVR contracts. *See* present-value-of-revenue (PVR) contracts
- Railroad Revitalization and Regulatory Reform Act of 1976, 11
- railroads, monopoly power and regulation of, 10–11
- Railroad Safety Appliance Act of 1893, 10
- remeasurement method, 286t
- renegotiations, 3–4; bundled delivery models and, 303–7; financing and, 360–61; governance and, 349–55; governments and, 337–38; negotiations and, 298–300; origins and consequences of, 351–55; pervasive, and remedies, 353–55; pervasiveness of, 350–51
- repairs. *See* maintenance
- rule of thumb in construction, 347n22
- second rule of thumb in construction, 347n22
- service lives, 56–57, 84–87
- social infrastructure, 40, 40f; assessing growth rate of real net capital stock per capita, 76–77; investment trends in, 66–69, 67–68f, 69f; price trends, 92f, 95–96, 96f
- software, price measures for, 56
- stimulus, infrastructure spending and, 230
- subsidies: cash, 382; debt, 384–85; finding fair values for, 382–84; to infrastructure investments, 372; in-kind, 375–76, 382; valuing, 382–86
- subways: expenditure and cost of services for, 195; usage, stock, and age of fleet, 186f
- target price contract, 286t
- tax-increment financing, 21
- Telecommunications Act of 1996, 433
- TIFIA (Transportation Infrastructure Financing and Innovation Act) program, 394–95
- toll road example, 386–97; cash flows, 87f, 386–87; cost of capital, 387–92; DOT data, 388–91t; minimum revenue guarantees, 392–94, 393t; subsidies from municipal bond and TIFIA financing, 394–96; value of, 392

- total factor productivity, 73–74
- transit. *See* buses; public transit; subways
- transportation infrastructure, 165–67;  
  assessing growth rate of real net capital  
  stock per capita, 76, 77f, 78f; bridges,  
  175–79; economic activity and, 195–99;  
  interstate highways, 167–75, 168t; price  
  trends, 95, 95f; public transit, 179–87;  
  subways, 185–87. *See also* infrastructure
